## NextEra Energy Canada, ULC

NextEra Energy Canada, ULC is an indirect, wholly-owned subsidiary of NextEra Energy Resources, LLC, North America's leading generator of renewable energy from the wind and sun with more than 8,800 wind turbines in operation in North America. NextEra Energy Resources is the largest generator of wind energy in North America with nearly 90 wind projects in 17 U.S. states and three Canadian provinces capable of generating more than 8,500 MW of energy, enough to power nearly two million homes.

# NextEra Energy Canada, ULC First Nation and Métis Relationship Policy

## PRINCIPLES

During the course of developing, constructing, operating and decommissioning its renewable energy projects in Canada, NextEra Energy Canada (“NEEC”) will be guided by the following principles:

1. Fostering a collaborative working relationship with potentially impacted First Nation and Métis communities as early as practicable.
2. Understanding and recognizing applicable aboriginal and treaty rights and interests.
3. Understanding and respecting the cultural integrity of First Nation and Métis communities potentially impacted by NEEC’s projects.
4. Fulfilling all delegated obligations to consult and (where applicable) accommodate First Nation and Métis communities.
5. Being open to discuss a broader relationship with potentially impacted First Nation and Métis communities and host First Nation and Métis communities.

In putting these principles into practice, NEEC is committed to the following practices:

### PRINCIPLE 1

#### Forming a Collaborative Working Relationship

- » providing notification to potentially impacted First Nation and Métis communities as early as possible
- » providing relevant project information (including information about project impacts) to potentially impacted First Nation and Métis communities in a timely manner and in a format that is meaningful
- » establishing a mutually-agreeable schedule for regularly meeting with Chief and Council or Métis leadership (or their appointed representatives) through the project development and construction phase
- » offering to hold an open house in each potentially-impacted First Nation or Métis community
- » establishing a mutually-agreeable arrangement for the exchange of information during project operations and decommissioning

### PRINCIPLE 2

#### Understanding and Recognition of Rights and Interests

- » early in the project development phase, assessing the nature of any existing aboriginal or treaty rights or unresolved First Nation or Métis claims in the project area
- » learning about First Nation and Métis interests and traditional practices (e.g., harvesting practices, sacred sites, etc.) in the project area
- » providing support to potentially impacted First Nation and Métis communities to allow such communities to undertake a meaningful review of the NEEC project
- » where applicable, employing mutually acceptable methods to identify the community interests of potentially impacted First Nation and Métis communities

### PRINCIPLE 4

#### Fulfilling Delegated Consultation and Accommodation Obligations

- » meeting all legally-binding consultation requirements delegated from government
- » taking into consideration any consultation protocol or policy developed by any potentially impacted First Nation and Métis community
- » where applicable, accommodating impacted First Nation and Métis communities

### PRINCIPLE 5

#### Considering a Broader Relationship

- » where applicable, considering opportunities for aboriginal scholarships, cultural funding and/or training in the renewable energy sector
- » where applicable, providing employment opportunities for communities (e.g., advance job postings, targeted recruitment, preferential hiring for qualified members, etc.) to: (a) members of potentially impacted First Nation and Métis; and (b) host First Nation and Métis communities
- » where applicable, providing business opportunities (e.g., communicating project needs, unbundling supply contracts, support for training, preferential contracting, subcontractor requirements, etc.) to qualified, cost-competitive First Nation and Métis businesses

### PRINCIPLE 3

#### Understanding and Respecting Cultural Integrity

- » providing training on First Nation and Métis history and law to NEEC employees with project development responsibilities in Canada
- » ensuring that work at project sites does not cause avoidable impacts to archaeological resources
- » maintaining an archaeological protocol that can be tailored to individual projects depending upon circumstances
- » where feasible, involving local First Nation and/or Métis communities or individuals in archaeological field work and construction monitoring

## **Appendix B**

### **NextEra Energy Canada, ULC Ontario Project – Archaeological Protocol**

## **NextEra Energy Canada ULC**

### **Ontario Projects - Archaeological Protocol**

NextEra Energy Canada ULC (“NEEC”) is pursuing wind energy projects in Ontario. Under the Ontario Renewable Energy Approvals regulation (the “REA”), there is a requirement to undertake archaeological assessments where the project may impact an archaeological resource.

NEEC is also committed to working collaboratively with potentially affected Aboriginal communities to ensure that archaeological and construction work at project sites does not cause avoidable impacts to archaeological resources. In this regard, NEEC will abide by this protocol and will require its archaeological contractors to acknowledge and respect it as part of their contract for services with NEEC, as well as any additional process agreed to between NEEC and those communities.

*NEEC invites comments on this protocol from affected Aboriginal communities and will update and amend it as required for relevance and effectiveness.*

#### **Guiding Principles for Archaeological Work on NEEC Projects:**

- This process may be updated and refined to ensure that all archaeological field work is completed in a manner acceptable to all relevant parties, and within the regulations of the Ministry of Tourism and Culture
- NEEC recognizes that each potentially affected Aboriginal community may identify different interests, or specific areas of concern, and that this protocol may need modification to address those specifics
- NEEC is committed to pursuing a positive relationship with Aboriginal communities built on trust, and is committed to ensuring that all archaeological work undertaken is respectful and addresses the needs of the affected community

#### **Objectives:**

- To protect aboriginal archaeological resources from avoidable impacts
- To ensure open, respectful, and timely communications between aboriginal communities and NEEC on archaeological matters
- To provide a means of active participation by aboriginal communities in archaeological activities conducted in their traditional territory

- To identify representatives that each party can contact and consult with on matters related to the archaeological process
- To ensure affected Aboriginal communities are aware of any archaeological finds
- To provide a process for dealing with specific issues or unforeseen discoveries as a result of archaeological and construction work

### **General Process:**

1. The archaeological team and NEEC will arrange a meeting with the potentially impacted First Nations and/or Métis communities in the vicinity of the project work area. The meeting would present an overview of the proposed work, including maps showing areas where investigations will be undertaken, and showing any known archaeological sites in the area (Stage 1 assessments).
2. Feedback will be requested from the communities on any known sites of interest for cultural, spiritual or heritage importance. The specific terms on which this information may be provided by the communities will be discussed and agreed to in writing including any confidentiality provisions required, in order to ensure there is prior and informed consent for any use of such information.
3. A request will be made for each community to identify a lead contact called the "liaison" for ongoing communications throughout the archaeological work. NEEC will also consider requests to have a qualified monitor on-site during field work.
4. Where an archaeological monitor is requested, NEEC will make good faith efforts to reach mutually acceptable arrangements with the affected community(ies) for the scope of the monitor's role, budget for reasonable costs to perform the work, a final monitor's report and any required insurance coverage and/or training such as safety procedures. Where requests for more than one monitor are received, NEEC will request that any arrangements not result in duplication of roles. These arrangements will be recorded in writing with leadership or authorized staff of the affected community.
5. The consulting archaeologist team will contact the community liaison or monitor, if applicable, at least two (2) business days before going into field, to ensure that they are aware of the work plans, and confirm the following process in the event of a discovery of artifacts or remains.
6. If an artifact is discovered, and it can be determined to be of aboriginal origin, the monitor will be notified, and asked to assist if necessary. The monitor, with the archaeology team, will determine whether the artifact is of significant or of special interest. If specific care must be taken with the item, the monitor should indicate

such. Any artifacts that are removed must be moved to an accredited archaeological repository in order to preserve them and in accordance with the applicable guidelines and standards of Ministry of Tourism and Culture. The monitor will be informed about the location of the repository. Work will continue at the site.

7. If no monitor is available, the designated community liaison will be promptly notified when an artifact of suspected aboriginal origin is found. The liaison will be advised if the artifact will be removed to an Archaeological Repository and the location of the Repository. Work will continue at the site.
8. If a Stage 2 archaeological assessment uncovers aboriginal artifacts requiring a Stage 3 assessment based on the guidelines of the Ministry of Tourism and Culture, the monitor and the consulting archaeologist will determine if there is a need to involve other community members/elders to see the site and discuss its potential implications. If the monitor or liaison expresses concern about whether the site should be considered for a Stage 3 assessment based on its unique cultural, heritage, or spiritual value to the community, a meeting between the archaeologist, liaison, monitor (if applicable) and NEEC shall be convened to discuss the findings, and options for proceeding with the work for appropriate mitigation strategies.
9. If human remains are found, NEEC and its consulting archaeologist will adhere to all applicable laws and regulations. This will require notification of the Police and/or Coroner's office. All work at the site will stop, and the community liaison will be notified immediately. If the site is determined not to be a crime scene, and evidence suggests that the remains are aboriginal, the community liaison must be immediately contacted again to request their attendance at the site.
10. The manner in which the human remains are treated will be determined by the community liaison in accordance with the appropriate regulations and legislation (or other community members as determined by the liaison) in discussion with the consulting archaeologists and the landowner. The process and procedures associated with any recovery, handling, and reburial will be determined by the community liaison.
11. Where human remains are discovered, and a determination of their origin is not possible, all community liaisons will be asked for advice in consultation with NEEC and the consulting archaeologist to determine the best course for recovery and reburial of the remains, or the mitigation of the site.
12. The final archaeological report and details of each artifact of aboriginal origin (including the archaeological repository to which it has been sent) will be

provided to the community liaison when the work has been completed. A plain language summary will also be provided.

Upon completion of the archaeological reports, NEEC will determine in consultation with the community liaison, whether continued field monitoring will be required during construction activities that involve ground disturbance, and if so, the mutually acceptable arrangements for same.

### **Community Reference Materials Binder Index**

## **NextEra Energy Canada - Community Reference Materials**

The enclosed binder of materials has been compiled by NextEra Energy Canada to be a helpful resource for community leadership, staff and individuals who are seeking basic information about the wind energy industry and our company. The purpose is to help foster a basic understanding of our industry and our company. This can be an important foundation and a starting point on which to have dialogue about our specific project proposals, as they are brought forward.

This binder is organized into sections that include information on NextEra Energy Canada, our industry and additional references to get more information on renewable energy approvals and our current projects. We have left room in the binder for additional project-related materials as they become available.

Additional copies of all materials can be obtained by contacting NextEra Energy Canada at:

### **List of Projects and Milestone Dates provided to Aboriginal Communities**

NextEra Energy Canada, ULC Ontario FIT Projects  
**Estimated Timelines for Planning**  
 Updated: MAY 2012

These timelines are estimates and subject to change. Field conditions, agency review time, regulatory process and other factors beyond NextEra's control will influence timing.

Project Name	Archaeology Field Work	Draft REA Report Package*	Target to Submit REA Application	MOE REA Decision	Start Construction
Adelaide	January 2012	Late-April or early May 2012	Late-July 2012	February 2013	Late Summer 2013
Bornish	April through May 2012	Late April or early May 2012	Mid-July 2012	February 2013	Late Summer 2013
Bluewater	April through May 2012	Early March, 2012	Late-June, 2012	February 2013	Summer 2013
Conestogo	February/March 2012 (Stage 2)	Completed	Completed	Approved, pending ERT Decision	TBC
East Durham	April through July 2012	October 2012	January 2013	August 2013	Spring 2014
Goshen	April through July 2012	Early August, 2012	Late October 2012	Early June, 2013	Winter 2014
Jericho	April through June 2012	October 2012	January 2013	August 2013	Spring 2014
Summerhaven	TBC	Completed	Completed	Approved, pending ERT Decision	TBC

\* The potential reports for a complete package include most or all of the following reports:

NextEra Energy Canada, ULC Ontario FIT Projects  
**Estimated Timelines for Planning**  
Updated: MAY 2012

Potential Reports Under REA

1. Project Description Report
2. Plain Language Summary Reports
3. Stage 1 Archaeological Assessment Report
4. Stage 2 Archaeological Assessment Report
5. Stage 3 Archaeological Assessment Report, if required and typically done after submission of REA.
6. Heritage Assessment Report
7. Construction Plan Report
8. Consultation Report (including Aboriginal Consultation Report containing a Table of Concordance to other reports concerning any *pre-identified* "Aboriginal Values" or issues lists)
9. Decommissioning Plan Report
10. Design and Operations Report (includes Environmental Effects Monitoring Plan and Emergency Response and Communication Plan)
11. Natural Heritage Assessment Report (includes Records Review, Site Investigation, Evaluation of Significance and Environmental Impact Study)
12. Noise Study Report
13. Site Plan Report
14. Wind Turbine Specification Report
15. Water Body and Water Assessment Report

## **Appendix E**

### **NextEra Energy Canada, ULC Archaeology Communiqué, Spring 2012**

**SPRING/SUMMER 2012 ARCHAEOLOGICAL UPDATES**

In the Fall 2011 we provided you with a second update on NextEra Energy Canada, ULC (“NEEC”) fieldwork that is required for its wind projects in southern Ontario. This work will continue in Spring 2012 once fields are ploughed and weathered. This update is to continue our ongoing communications about the work.

**Field Work Planned**

The following work will take place:

Project*	Work Planned and Consultant Name	Timeframe
<p><b>Conestogo</b></p>	<p><b>Archaeological Consultant:</b>            Archaeological Services Inc.            Contact: Andrew Riddle            E-Mail: <a href="mailto:ariddle@iasi.to">ariddle@iasi.to</a></p>	<p>Early spring once ploughing and soil weathering is complete.</p>
	<p><b>Independent Monitor, Saugeen Ojibway Nations Environment Office:</b>            Individual to be confirmed through SON EO</p>	
	<p><b>Work Description:</b>            The work will complete the Stage 2 archaeological surveying and will be conducted in accordance with the 2011 Ministry of Tourism, Culture and Sport’s (MTCS) Standards and Guidelines. The lands will be ploughed and allowed to weather for at least 2 significant rainfalls. This will be followed a pedestrian survey led by a licensed archaeologist. The surveying will be done only when there is at least 80% ground visibility.</p> <p>A representative sample of archaeological artifacts that are found will be picked up, documented, and archived at an appropriate repository according to MTCS requirements. A Stage 2 Archaeological Assessment report will be completed that describes the study and any artifacts found and will be submitted to MTCS for review and to interested Aboriginal communities.</p>	

Project*	Work Planned and Consultant Name	Timeframe
	The remaining fieldwork will require only 1 day to complete and includes pedestrian survey of one MET tower location and one electrical line corridor	
<b>East Durham</b>	<p><b>Archaeological Consultant:</b>                      Scarlett Janusas Archaeological And Heritage Consulting                      Contact: Scarlett Janusas,                      E-mail: <a href="mailto:jscarlett@amtelecom.net">jscarlett@amtelecom.net</a></p> <p><b>Independent Monitor, Saugeen Ojibway Nations Environment Office:</b>                      Individual to be confirmed through SON EO</p> <p><b>Work Description:</b>                      The work is to start and complete stage 2 archaeological surveying. The lands will be plowed and allowed to weather for at least 2 significant rainfalls. This will be followed a pedestrian survey led by a licensed archaeologist. Land surveyors walk side by side and mark 5 metre intervals on cultivated fields. The surveying will be done when there is at least 80% ground visibility and the soil has been weathered by rain. That is why a set start date cannot be given.</p> <p>Any archaeological artifacts that are found will be picked up, documented, and archived at an appropriate repository according to Ministry of Tourism and Culture (MTC) requirements.</p> <p>A Stage 2 Archaeological Assessment report will be completed that describes the study and any artifacts found and will be submitted to MTC for review and to interested Aboriginal communities.</p> <p>The surveying is expected to take 5 to 10 days to complete.</p> <p>Stage 2 will be conducted as per the 2011 MTC Standards and Guidelines.</p>	Spring 2012

<b>Project*</b>	<b>Work Planned and Consultant Name</b>	<b>Timeframe</b>
<p><b>Adelaide and Bornish</b></p>	<p><b>Archaeological Consultant:</b>                      Golder Associates                      Contact: Jeff Muir, Field Manager                      E-Mail: Jeffrey_Muir@golder.com</p>	<p>Spring 2012</p>
	<p><b>Independent Monitors:</b>                      Brandy George Archaeological Services Inc.                      Contact: Brandy George, Monitoring Archaeologist                       Wayne Hill, Two Row Archaeology</p>	
	<p><b>Work Description</b>                      The goal is to conduct the remaining Stage 2 archaeological fieldwork. This will consist of a pedestrian survey led by a licensed archaeologist. Field archaeologists walk side by side at 5 metre intervals on cultivated fields. The surveying will be conducted when there is at least 80% ground visibility (i.e. crops have been harvested and the land re-ploughed) and the soil has been weathered by rain.</p> <p>A large portion of the work has been done on each project but this fieldwork will accommodate any changes made to the wind farm design layout and to any modifications to the proposed transmission lines.</p> <p>Any archaeological artifacts that are found will be documented, and a sample will be picked up, catalogued, and archived at an appropriate repository according to Ministry of Tourism, Culture and Sport requirements.</p> <p>A Stage 2 Archaeological Assessment report will be completed that describes the study area and any artifacts found. It will be submitted to Ministry of Tourism, Culture and Sport for review and to interested Aboriginal communities. This will supplement the Stage 2 Archaeological Assessment reports already submitted for these projects.</p> <p>The work schedule is currently being developed but is expected to take place throughout the spring. Field ploughing and weather may affect the schedule and duration of the field work.</p>	

<b>Project*</b>	<b>Work Planned and Consultant Name</b>	<b>Timeframe</b>
<p><b>Bluewater, Goshen and Jericho</b></p>	<p><b>Archaeological Consultant:</b>                      Golder Associates                      Contact: Jeff Muir, Field Manager                      E-Mail: Jeffrey_Muir@golder.com</p>	<p>Spring 2012</p>
	<p><b>Independent Monitors:</b>                      Brandy George Archaeological Services Inc.                      Contact: Brandy George, Monitoring Archaeologist</p>	
	<p><b>Work Description:</b>                      The goal is to conduct the remaining Stage 2 archaeological fieldwork. This will consist of a pedestrian survey led by a licensed archaeologist. Field archaeologists walk side by side at 5 metre intervals on cultivated fields. The surveying will be conducted when there is at least 80% ground visibility (i.e. crops have been harvested and the land re-ploughed) and the soil has been weathered by rain.</p> <p>This work is a continuation of the fieldwork already conducted by Golder with Brandy George's assistance in the fall of 2010 and throughout 2011.</p> <p>Any archaeological artifacts that are found will be documented, and a sample will be picked up, catalogued, and archived at an appropriate repository according to Ministry of Tourism, Culture and Sport requirements.</p> <p>For the Bluewater project, a Stage 2 Archaeological Assessment Report has already been submitted for the wind farm layout and the additional report submitted in the spring of 2012 will deal with the transmission line field work and any modifications to the existing wind farm layout. For both Goshen and Jericho, a Stage 2 Archaeological Assessment report for each project will be completed that describes the study area and any artifacts found. All reports will be submitted to the Ministry of Tourism, Culture and Sport for review and to interested Aboriginal communities.</p> <p>The work is anticipated to last for about 6 to 8 weeks.</p>	

Project*	Work Planned and Consultant Name	Timeframe
	Field ploughing and weather may affect the schedule and duration of the fieldwork.	
Summerhaven	<p><b>Archaeological Consultant:</b>                      Golder Associates                      Contact: Jeff Muir, Field Manager                      E-Mail: Jeffrey_Muir@golder.com</p>	Spring 2012
	<p><b>First Nation Monitor with Golder Crew:</b>                      Jason Silver (for Six Nations of Grand River)                      Sheila Silver (for Six Nations of the Grand River)                      Jedekiah Secord (for Mississaugas of New Credit)</p> <p><b>Independent Monitor:</b>                      Wayne Hill, Two Row Archaeology</p>	
	<p><b>Work Description:</b>                      The Stage 1 desktop study is completed and the Stage 2 archaeological fieldwork is about 95% done. All diagnostic artifacts and a sample of other artifacts have been collected and catalogued, while others were left <i>in situ</i>.</p> <p>Curated artifacts are kept securely in Golder’s office as per Ministry of Tourism and Culture regulations and recorded as part of the Ontario Archaeological Sites Database. There have been about 900 sites found to date, with some portions of the proposed transmission line and collector cables still to be surveyed.</p> <p>About 150 sites have undergone Stage 3 archaeological assessment to date, with other sites recommended for Stage 3 archaeological assessment avoided through wind farm layout changes. Stage 4 work has already been conducted on 7 sites. This year’s fieldwork will still follow the first priority of avoidance, but as the wind farm design advances, this becomes more difficult. Where avoidance is not possible, Stage 4 excavation, documentation and cataloguing is required.</p>	

**Please see the enclosed map for the general locations of all current NEEC wind projects.**

As explained above, the exact start date in of site work depends on weather and soil conditions. We cannot predict a specific date but certainly will begin as soon as fields are ploughed and soils are weathered.

### **Field Briefings**

NEEC and its archaeological consultants will arrange a field briefing for communities who wish to send a representative to meet directly with the archaeological consultant. The field briefing is a suggestion we received from one of the interested communities in 2010. They would last about 1 hour.

**Field briefing arrangements will be made based on requests we receive by April 1, 2012.**

The field briefing is described in NEEC's Ontario Projects Archaeological Protocol (enclosed). We would like the field briefing to include:

1. Opportunity to meet the personnel involved in this work, including any monitors who will be on site
2. Description of archaeological fieldwork plans and locations
3. Discussion of NEEC's Archaeological Protocol and roles of the archaeological crew and monitors
4. Receive any advice or direction from community representatives that may help us to complete this work in a respectful and thorough way
5. Ensure all involved parties know who the appropriate contact persons are, and how to contact them

### **Contact Information**

*For any questions about field briefings, or to request additional arrangements for monitoring*, please contact the coordinating archaeologists above *by April 1, 2012* and R. D. (Bob) Waldon of Bedford Consulting & Associates, who is coordinating the Aboriginal consultation work at:

Bob Waldon  
Bedford Consulting & Associates  
e-mail: rdwaldon@bedfordC4.com  
1-905-838-4256

*If you have any questions about the archaeological field work itself*, please contact:

Tom Bird  
Project Manager, Environmental Services  
NextEra Energy Canada, ULC  
1-905-335-4904

## **Appendix F**

### **Aboriginal Community Consultation Protocols**

## **F.1 Aamjiwnaang First Nation**

## Consultation Protocol—Aamjiwnaang

### 1. Preamble

The Aamjiwnaang First Nation, formerly known as the Sarnia Indian Reserve 45 or Chippewas of Sarnia First Nation, is a First Nations community of about 1000 Anishinabek people residing on reserve land along the shores of the St. Clair River near Sarnia, Ontario. The reserve land is the result of Treaties 27 ½ and 29 that were negotiated with the Crown in the 1820's. These treaties of the "Huron Tract" offered some compensation to the First Nation for the land surrendered, established reserves, and form the basis for Aamjiwnaang First Nation's treaty rights.

Though the reserve is the current location of the Anishinabek people of Aamjiwnaang, the traditional territory that Aamjiwnaang's ancestors inhabited covers much of south western Ontario and the Great Lakes Region, including significant territory in what is now Michigan. It is a habitat for distinctive flora and fauna and is known for its main waterway, the St. Clair River. Aamjiwnaang First Nation and its ancestors have been living, hunting and fishing in this territory since time immemorial. The people of Aamjiwnaang First Nation therefore assert aboriginal rights throughout this region.

Aamjiwnaang's environment is unique and as Anishinabek people they are given the responsibility as caretakers of Mother Earth. Aamjiwnaang's reserve lands are now bordered by significant industrial and petro-chemical developments, and there are significant concerns about the short and long term impacts of the presence and growth of these industries. Environmental remediation activities are carried out by Aamjiwnaang in response to concerns about the land, water, air, animals and people situated within Aamjiwnaang's territory and in an effort to continue to preserve the traditional ways of the community. Efforts to protect and restore the natural environment are, however, not limited to efforts which involve its own residents. The First Nation is also actively engaged in applying its own high standards of environmental concern and management to a range of external issues, including proposed project activities by Industries and Government in the traditional territory.

### 2. Guiding Principles:

Aamjiwnaang First Nation understands the following basic principles to be a key part of any consultation and accommodation discussion.

- a. The Guidelines listed in this document are the minimum requirements for consultation and accommodation and are the expectations of Aamjiwnaang with respect to consultation and accommodation.
- b. Aamjiwnaang has inherent treaty rights and aboriginal rights as well as a traditional territory and must be consulted with on any project that will or might have an impact on these rights.
- c. All parties must recognize that the duty to consult and accommodate with Aamjiwnaang rests with the Crown (Federal and Provincial Governments) and that all authority for decision-making and approvals will remain on a government-to-government basis.
- d. All proponents must commit to satisfying all environmental regulations and to seek best practice solutions and to use best available technology as regards any environmental concerns on any project within Aamjiwnaang's traditional territory. Aamjiwnaang must be made aware of any real or potential risks to health and safety, and every measure should be provided to avoid impacting the health of the Aamjiwnaang people.
- e. Proponents, the Crown, and the First Nation will approach meetings in good faith, with respect, and with a desire to be flexible and seek a fair agreement for all parties.
- f. Proponents, in their desire to complete projects in a reasonable time frame, should seek to satisfy all relevant federal and provincial guidelines and legislation for the project.
- g. Consultations and negotiations should be held with full disclosure that includes, but should not be limited to, detailed project reports, details about regulations and fees that relate to the property or development in question, and any information given also to the Crown to satisfy regulatory measures.
- h. All consultation and negotiation should be free of all coercion (including financial and time constraints), and should begin as soon as possible to ensure First Nations are included before irreversible decisions are made.
- i. That all parties recognize that consultation is an on-going process that spans the life of a project through construction, operation, and decommissioning. Therefore, any agreements resulting from this process should allow for the possibility of renegotiation if the circumstances surrounding the agreement change.
- j. Decisions should be made by consensus wherever possible. There must be a willingness to provide accommodation for the reasonable concerns of Aamjiwnaang before the project proceeds.

- k. Nothing in this document shall offer any justification for taking away or superseding treaty and/or aboriginal rights within the meaning of Section 25 and 35 of the Constitution Act, 1982 or the duty to consult and accommodate.
- l. Nothing in this document shall be considered an endorsement by Aamjiwnaang of any current legislation, regulations, policies, procedures, or practices of the Crown or proponents in Aamjiwnaang's traditional territory where Aamjiwnaang has no meaningful role in their development or administration, or do not reflect the reconciliation of the relationship between the Crown and Aamjiwnaang.
- m. Nothing in this protocol implies consent or approval of any past, existing, new, or ongoing activities within Aamjiwnaang's traditional territory.

### 3. Definitions:

**Aamjiwnaang First Nation:** Means the aboriginal people within the meaning of section 35 of the Constitution Act, 1982, which is a First Nation, and a Band pursuant to the Indian Act. The First Nation is formerly known as the Chippewas of Sarnia. The First Nation's reserve is located near Sarnia, Ontario and is un-ceded land.

**Aamjiwnaang Rights (Aboriginal Rights):** Aamjiwnaang members have Aboriginal rights within the meaning of Section 25 and 35 of the Constitution Act, 1982 which are collective and not individual. The rights belong to the community and arise from presence, occupation and practice on the land prior to European contact. These rights continue to exist unless modified or extinguished by treaty.

**Aamjiwnaang Title (Aboriginal Title):** is a common law property interest in land. Aboriginal title arises from occupation of Canada by Aboriginal peoples prior to the *Royal Proclamation of 1763*. Aboriginal title is a collective right to land held by all members of an Aboriginal nation.

**Accommodation:** An amicable agreement achieved by consultation between two or more parties to deal with concerns and to avoid irreparable harm or to minimize the effects of infringement by seeking compromise in an attempt to harmonize any conflicting interests.

**Activity:** Any legislation, regulation, policy, procedure, plan, tenure, grant, license, permit, restriction, amendment, approval, authorization, transfer, transaction, operation, or other activity, which may have an impact on Aamjiwnaang's Aboriginal Title or other Aboriginal Rights.

**Consultation:** A deliberation, in good faith, on a matter involving two or more parties having concern for the consideration of a First Nation's wishes in planning and acting; with a mutual goal of arriving at an agreeable decision prior to any undertaking by any party.

**Crown:** Her Majesty in right of Canada and Her Majesty in right of Ontario and their respective governments and agencies.

**Information:** Refers to materials that can be disclosed in accordance with applicable law

**Impact:** Any adverse effect that any activity may cause to the Environment within Aamjiwnaang's traditional territory or the health of Aamjiwnaang or any of its members or any Aamjiwnaang right.

**Proponent:** A person, including corporations, which may include the Crown, who proposes a project to be implemented that may affect Aamjiwnaang interests.

**Reserve:** Refers to the un-ceded land near Sarnia, ON that was set aside under Treaty 27 ½ and 29 for the Sarnia band, now known as Aamjiwnaang First Nation and formerly known as the Chippewas of Sarnia.

**Traditional Territory:** The Traditional Territory of Aamjiwnaang is not confined to its reserve boundaries, but rather to the area of past occupation and land use. For this purposes of this consultation protocol, the Traditional territory of the Aamjiwnaang First Nation stretches along the shores of Lake Huron, north to Goderich, east to Stratford and south to Point Pelee.

#### 4. Consultation principles

The Crown must initiate consultation at the earliest stage in the decision-making process before decisions are made that infringe on Aamjiwnaang title or rights, and without Aamjiwnaang first having to raise questions about the proposed activity. Consultation must occur at all stages of any proposed activity that potentially impact on asserted or recognized rights of Aamjiwnaang, including legal or policy changes, strategic planning, scientific or technical decision making, operational decisions, environmental assessments, impact assessments, approvals which may lead to a permit, license, lease, or change in land status, and any amendment to any such decisions.

The consultation process, while involving non-crown proponents, shall have an ongoing government-to-government relationship based on the recognition and affirmation of the aboriginal and treaty rights and aboriginal title of the people of Aamjiwnaang. The concerns, interests, and ideas of Aamjiwnaang must be integrated into the decisions or developments that impact their territory, rights, or title.

Consultation with Aamjiwnaang must be separate and distinct from consultation with other interest groups.

The Crown or its designate shall provide all necessary financial or other resources required by Aamjiwnaang in order to effectively participate in all aspects of the consultation.

All discussions must be undertaken in good faith, and all alternative options must be available, including a "no-activity" option if the impacts of the decision or development are expected to cause undue infringement on Aamjiwnaang's rights, title, or people.

Aamjiwnaang must be prioritized in any strategic level decisions, before operational decisions are undertaken. Resources and time must be provided to Aamjiwnaang in order to conduct the necessary studies or reviews to better understand the potential impacts or infringements that may occur as the result of an activity.

## 5. Anticipated Outcomes:

It is the desired hope that all consultations will result in fair and mutually beneficial meetings that are conducted in good faith, without prejudice, and designed to incorporate Aamjiwnaang into the decision making process. It is further expected that the Crown and Proponents must accommodate and/or mitigate any activity that may infringe on Aamjiwnaang's Aboriginal title, rights, or interests.

Common types of Accommodation include, but are not limited to:

- Modification of the project, including scope, scale, or technology changes
- Employment
- Joint Ventures
- Co-management of resources
- Joint land use planning
- Training
- Limiting resource extraction and harvesting
- Conservation measures
- Hunting access
- Environmental protections and ongoing monitoring
- Alternate land arrangements
- Relocation
- Alternative food source compensation
- Equity in companies
- Preferential contracts for services
- Community-use buildings
- Financial compensation
- Compensatory damages for past infringements or impacts

- Other arrangements

## 6. Responsibilities of Each Party

### 6.1 Crown

The Crown is responsible to:

- Respect and uphold the treaty and aboriginal rights enshrined in the Constitution Act, 1982 related to First Nations.
- Consult with and seek accommodate for Aamjiwnaang whenever there is an activity that may or will impact the treaty and aboriginal rights of the community.
- Work with Aamjiwnaang on a government-to-government basis.
- Uphold the honour of the Crown.
- Consider and give reasonable consideration to Aamjiwnaang rights and interests.

### 6.2 Proponent(s)

The Proponent is responsible to:

- Recognize that Aamjiwnaang is a level of government that seeks to uphold the treaty and aboriginal rights held by Aamjiwnaang community members.
- Ensure that good faith consultation and flexibility guide relations with the Aamjiwnaang community with an aim to seeking mutually beneficial solutions.
- Recognize that an activity cannot be permitted within Aamjiwnaang's traditional territory without consultation and accommodation with Aamjiwnaang.
- Recognize that the duty to consult rests with the crown and that any decision or agreement reached must ultimately be made on a government to government basis.
- Provide contact persons and all information in a timely manner to ensure that good communication is the cornerstone of effective and transparent consultation.
- Provide adequate details and information about the project and any associated timelines or project schedules.

### 6.3 Aamjiwnaang

Aamjiwnaang is responsible to:

- Provide information to Proponents and the Crown when asked related to the Aboriginal Rights and Treaty Rights asserted on or near the activity under discussion.
- Provide contact person(s) for whom inquiries could be made regarding the status and execution of the consultation process of Aamjiwnaang.
- Represent the views of community members at all times.

- Make a reasonable effort to provide Aamjiwnaang members with adequate notice of all major projects and time allowances for comments.
- Monitor compliance by all parties of the consultation and accommodation process.
- Operate in good faith and with a desire to seek mutually beneficial outcomes wherever possible.
- Provide information and guidance in order to ensure that activities are undertaken with consideration of the land-use principles and potential impact on sites of cultural, spiritual, or heritage interest.

## 7. Funding and Capacity to meet Consultation Needs:

The Crown is responsible for providing funding and capacity to enable First Nations and Proponents to hold meaningful discussions about activities and for both parties to understand the issues at stake. This funding is critical for the consultation process in order to proceed without delays.

Proponents must recognize that the Aamjiwnaang First Nation often does not have the internal capacity or resources necessary to meet all consultation goals without outside funding. Proponents must recognize that Aamjiwnaang does not receive adequate resources to undertake all consultation requests received. Proponents may be asked to provide capacity for various portions of the consultation process.

Consultation needs are often extensive, including:

- Hiring Aamjiwnaang members to review and meet with proponents.
- Hiring outside experts or staff to provide critical analysis.
- Completion of third-party reviews of Environmental Assessment documents or Legal agreements.
- Travel, accommodation, and other honoraria.
- Administrative costs.
- Other costs.

The necessity of consultation and accommodation and the lack of capacity of Aamjiwnaang requires proponents to meet many of the capacity and consultation costs associated with the process to ensure the meeting of deadlines and deliverables in a timely manner. Costs may also rise or decrease depending on the size, scope, and community involvement necessary to hold adequate and good faith consultations. Proposed budgets will be developed and shared with the proponent throughout the process.

## 8. General Consultation and Accommodation Steps

The following outlines the general process of consulting and accommodating Aamjiwnaang.

**1. Initial Contact:** Notice of a proposed project or decision is made to Aamjiwnaang. Any notice must be submitted to the Chief, the Council, and the Health and Environment Committee. Proponents must submit adequate information and details about the proposed activity including:

1. The appropriate contact person and his or her contact information
2. Reference maps of the proposed project site or area
3. Information about the activity and potential impacts in plain language format, including potential impact on resources and land
4. Information on the anticipated economic impact on Aamjiwnaang and on surrounding communities
5. The timeframe or activity schedule with critical dates identified
6. Information about the potential impacts on treaty or aboriginal rights

**2. Information Sharing:** Following an internal review, a response will be sent to the proponent, indicating the next steps and the appropriate contact person at Aamjiwnaang. This will likely take one of three forms:

1. More information is required from the proponent or the Crown to adequately assess the proposal
2. At this time Aamjiwnaang is not interested in entering into a full consultation process, however the proponent should continue to inform Aamjiwnaang throughout the process, especially if there are any changes in scope or expected impact.
3. Aamjiwnaang is considering entering into a full consultation process and requires more information and capacity.

**3. Pre-Consultation:** If the response is to consider entering a full consultation process, the Proponent will be asked to provide more information and attend meetings. Details of the process, budget, and information required will be discussed. This stage in the process will lead to one of three responses

1. More information is required from the proponent or the Crown to determine whether there are potential or real impacts on constitutional rights or title issues.
2. At this time Aamjiwnaang is not interested in entering into a full consultation process, however the proponent should continue to

inform Aamjiwnaang throughout the process, especially if there are any changes in scope or expected impact.

3. Aamjiwnaang requires the proponent or Crown to enter a full consultation process.
4. **Consultation:** If the response following pre-consultation is 3, the proponent may be asked to sign a consultation agreement or memorandum of understanding. This agreement will identify the process and requirements to complete the consultation and accommodation process, and may include:
  1. A request for more information, including plain language summaries
  2. A request to participate in meetings with Chief and Council, the Health and Environment Committee, the community as a whole, or other groups as required.
  3. A request for capacity to undertake the necessary review of the proposal, including expert legal, technical, or other advice
  4. A request to undertake more studies, or to expand on existing studies.

Following the consultation process, an internal analysis of the potential or real impacts will be undertaken. The results of this analysis will determine whether there is a need to progress to the next step, accommodation and mitigation.

5. **Accommodation and Mitigation:** Following the further studies and analysis undertaken in step 4, Aamjiwnaang will negotiate with the proponent or Crown to determine the requirement to develop mitigation strategies or accommodations for the potential or real impacts.
6. **Reconciliation:** Following the end of the consultation process, Aamjiwnaang will provide a response to the Crown and proponent indicating that the consultation process has been completed, and whether the interests and rights of Aamjiwnaang have been accommodated. The response may include agreeing to the proposal as described, agreeing to the proposal with conditions and accommodations, agreeing to abandon or postpone the proposed project, or no agreement.

## 9. Dispute Resolution

In order to avoid resorting to the court system, if at any point throughout the consultation process the parties feel that an agreement cannot be reached they may opt to pursue a dispute resolution process.

Any dispute resolution process must be:

- conducted in a manner where Aamjiwnaang has equal decision making power;
- conducted in an impartial and mutually acceptable manner; and
- conducted in a timely manner.

The process of consultation shall cease for the duration of a dispute resolution process.

The Crown, Aamjiwnaang, and the Proponent must be parties to any dispute resolution process.

If the parties required in a dispute resolution by subsection 15.4 deem it appropriate they may agree to grant standing to any Aamjiwnaang Member or party in a dispute resolution.

A third party may receive standing in a dispute resolution.

A dispute resolution process may be sought where the end result of the consultation process is 'no agreement.'

## **10. Existing Activities Affecting and Impacting Aamjiwnaang**

The Crown must work with Aamjiwnaang to review past decisions about activities undertaken in Aamjiwnaang's traditional territory and reserve lands that were made without honourable consultation and accommodation and continue to affect and impact Aamjiwnaang in the present.

The Crown or Third Parties must inform Aamjiwnaang about existing activities undertaken by the proponent or Crown in the traditional territory or reserve lands of Aamjiwnaang when proposing any new activities or changes to existing uses.

## **11. Review and Amendment**

Aamjiwnaang shall review this policy regularly on at least an annual basis.

Ongoing consultations are not affected by this policy that began before the signing date unless agreed upon by all parties.

This agreement was approved on June 22, 2010 . The First Nation reserves the right to establish new procedures, fees, or consultation measures at any time.

## **F.2 Walpole Island First Nation**

# Walpole Island First Nation Consultation and Accommodation Protocol

## A. Purpose and Application

1. This Protocol sets out Walpole Island First Nation's (WIFN's) rules, under its laws and its understanding of respectful application of Canadian law, for the process and principles for consultation and accommodation between WIFN, the Crown and Proponents, about any Activity that is proposed to occur in WIFN's Traditional Territory or that might cause an Impact to the Environment or Health therein or WIFN Rights. WIFN expects the Crown and Proponents to respect this Protocol in all such interactions with WIFN.

## B. Definitions

1. Definitions:
  - a. **Activity** means any Crown Activity or Proponent Activity.
  - b. **Canada** means the federal government or the federal Crown, her Majesty the Queen in right of Canada.
  - c. **Crown** means either or both of Canada and Ontario, and any component part of each.
  - d. **Crown Activity** means:
    - i. New legislation, regulations, policies, programs and plans that provide authority to or are implemented or to be implemented by the Crown;
    - ii. Changes to legislation, regulations, policies, programs and plans that provide authority to or are implemented or to be implemented by the Crown;
    - iii. Issuance, varying, approval, suspension or cancellation of permits, licenses, authorizations, renewals or anything similar, by the Crown; and
    - iv. Anything else authorized or undertaken by the Crown.
  - e. **Crown Designate** means such person with or appointed by the Crown to be the lead contact on behalf of the Crown for consultation and accommodation with WIFN in respect of any Activity.
  - f. **Day** means a business day and excludes weekends and statutory holidays.
  - g. **Emergency Situation** means a situation that is likely to endanger the life or health of any person, or that is likely to result in an environmental catastrophe.

- h. **Environment** means the components of the earth, and includes:
  - i. land, water and air, including all layers of the atmosphere;
  - ii. all organic and inorganic organisms including flora and fauna and humans;
  - iii. the physical, social, economic, cultural, spiritual and aesthetic conditions and factors that affect the physical or socio-psychological health of WIFN or any of its members;
  - iv. physical and cultural heritage, any structure, site or thing that is of historical, archaeological, paleontological or architectural significance; and
  - v. any part or combination of those things referred to in paragraph (i) to (iv), and the interrelationships between two or more of them.
- i. **Health** means the physical or socio-psychological health of WIFN or any of its members.
- j. **Impact** means any adverse effect that any Activity may cause to the Environment within WIFN's Traditional Territory or the Health of WIFN or any of its members or any WIFN Right.
- k. **Information** means, to the extent permitted to be disclosed in accordance with applicable law:
  - i. Location (including if possible a map of the site of and area of impact of the Activity if applicable), timing, and as a full a description as possible of the Activity;
  - ii. a written draft of the Crown Activity, if applicable;
  - iii. known or potential Impacts as a result of the Activity;
  - iv. the name and contact information for the Crown Designate;
  - v. the name and contact information of the Proponent, if applicable;
  - vi. all information and documents provided by the Proponent to the Crown in respect of the Proponent Activity, if applicable; and
  - vii. any other information that the Crown and/or Proponent considers relevant.
- l. **Notification** means the initial written notice sent to the WIFN Contact by the Crown and/or Proponent, which shall contain as much Information as is in the possession of the Crown and/or Proponent at this stage after reasonable efforts to acquire same.

- m. **Ontario** means the provincial government or Crown or Queen in right of Ontario (“Ontario”).
- n. **Proponent** means the party (which could include the Crown, a corporation, partnership, sole proprietorship, association, organization, person or the like) other than WIFN or a business in which WIFN has majority control or a majority financial interest, that would undertake or is undertaking the Proponent Activity, as the case may be.
- o. **Proponent Activity** means any activity pursuant or incidental to anything authorized or ordered by the Crown, or that the Crown is contemplating authorizing or ordering, and does not include any activity of WIFN or a member of WIFN or a business in which members of WIFN have majority control or a majority financial interest which activity WIFN has authorized.
- p. **Protocol** means the Walpole Island First Nation Consultation and Accommodation Protocol.
- q. **Reserve** means the unceded reserve of WIFN which is Walpole Island Reserve No. 46, which is a reserve as under the *Indian Act* R.S.C. 1985 c. I-5, as amended (the “*Indian Act*”), is referred to in Ojibwe as "Bkejwanong" (where the waters divide), and which forms a large river delta on Lake St. Clair consisting of six islands which are Walpole, St. Anne, Potawatomi, Squirrel, Bassett and Seaway, totaling approximately 24,000 ha./58,000 acres. For the purposes of this Protocol, the Traditional Territory of WIFN does not include the Reserve.
- r. **Traditional Territory** means that territory as described in Schedule “A” hereto.
- s. **Walpole Island First Nation (“WIFN”)** means the aboriginal people within the meaning of section 35 of the *Constitution Act, 1982*, which is a First Nation, and a Band pursuant to the *Indian Act*.
- t. **WIFN Contact** means the person appointed by WIFN to whom Notification is sent and who is mandated to ensure that where applicable WIFN Representative(s) is/are appointed in respect the particular Activity referred to in the Notification.
- u. **WIFN Representative(s)** means the person(s) appointed by WIFN to participate in the consultation and accommodation process about a particular Activity, and such person(s) must have the authority to act on behalf of WIFN in regard to same.
- v. **WIFN Rights** means any of WIFN’s or its members’ aboriginal or treaty rights or the ability to exercise such rights, or asserted aboriginal or treaty rights (where there is prima facie merit to that asserted right).

- w. **WIFN Sustainability** means the ability of WIFN to survive and thrive including through a healthy Environment, through good Health of WIFN and its members, and through respect for and honouring of WIFN Rights.

### **C. Legal Status**

2. No WIFN Right may be abrogated or derogated from through operation of this Protocol other than by proper legal authority of WIFN.
3. Nothing in this Protocol may be construed to limit any consultation or accommodation obligations owed to WIFN by the Crown or any Proponent.
4. Notwithstanding anything in this Protocol, WIFN retains the right to challenge, by way of judicial review or any other legal or other process, any Activity.

### **D. Context and General Principles to Guide Consultation and Accommodation**

5. WIFN is part of the Ojibwe, Potawatomi and Odawa people who together comprise a political and social compact known as the Three Fires Confederacy.
6. The Anishnabeg of WIFN have lived in their Traditional Territory since time immemorial, practicing their ways and living according to their laws and culture. They are a self-defined people.
7. WIFN continues to assert (see Ontario Superior Court of Justice court file no. 00-CV-189329) and exercise aboriginal title and aboriginal rights to and in all parts of its Reserve, and to those parts of its Traditional Territory to which it has not been a party to a treaty, including lands under water in Canadian portions of Lake Erie, Lake Huron, Lake St. Clair, the St. Clair River and the Detroit River (see map attached as Schedule A for parts of Traditional Territory in which WIFN claims Aboriginal title). In all other parts of its Traditional Territory, WIFN maintains treaty rights and maintains aboriginal rights to the extent not explicitly surrendered in the treaty.
8. In addition to aboriginal title, WIFN's rights in its Reserve and Traditional Territory include rights to hunt, fish and trap, to harvest plants for food and medicine, to protect and honour burial sites and other sacred and culturally significant sites, to sustain and strengthen its spiritual and cultural connection to the land, to protect the Environment that supports its survival, to govern itself, and to participate in all governance and operational decisions about how the land and resources will be managed, used and protected.
9. WIFN's laws require WIFN to preserve and even enhance a mutually respectful relationship with the Environment, to co-exist with Mother Earth and protect this relationship. WIFN under its laws has the responsibility to care for its Traditional Territory for future generations, to preserve and protect wildlife, lands, waters, air and resources. WIFN relies on the health of the Environment in its Traditional Territory for its survival. The health of the lands and waters is essential to the

continued existence of WIFN as a people and it and its members' Health, its culture, laws, livelihood, and economy.

10. WIFN is recognized as a respected and principled steward of the Environment. WIFN's input and perspective in any consultation and accommodation process will likely include the use of traditional ecological and cultural knowledge alongside knowledge from western scientific and technical sources.
11. All decisions about any Activity that might cause an Impact must be made carefully and in the best interests of WIFN Sustainability. WIFN has suffered significant adverse effects from development, use and pollution of its Traditional Territory (WIFN's Reserve and main residential community is downstream and down-wind from one of the most industrialized parts of North America) and from taking and using of parts of its Traditional Territory including those to which it asserts aboriginal title.
12. WIFN may decide that consideration of cumulative effects must be included in any consultation and accommodation process. Cumulative effects include not only those of the Activity combined with other existing projects or Activities or residual impacts from past activities, but with other planned Activities.
13. It may be necessary for the Crown and/or Proponent to fund cumulative effects analyses, WIFN land use and occupancy studies, and other relevant studies to enable informed decision-making about any Activity.
14. WIFN expects to play a meaningful role in any environmental assessment ("EA") or related process, including, if WIFN requests, to have a role in establishing the scope and terms of reference for such EAs and to appoint a member to any EA panel review, and to review and comment on environmental impacts statements, and any screening, study or like reports, but EAs and any role that WIFN might take in regard to these do not of themselves satisfy the Crown's or any relevant Proponent's duty to consult with and accommodate WIFN.
15. WIFN recognizes the need to identify and develop new and appropriate ways through which aboriginal and non-aboriginal parties may create sustainable development opportunities from the resources found within WIFN's Traditional Territory. WIFN's understanding of what is "sustainable" is informed by WIFN's traditional knowledge and laws. WIFN's laws require WIFN to assess an Activity by anticipating its potential effects at least seven generations into the future.
16. Consultation and accommodation processes must be designed and implemented with flexibility to reflect the nature and importance of the WIFN Right or Health or elements or conditions of the Environment that could be affected by the Activity, and the seriousness of the possible Impact. WIFN and only WIFN might decide in certain circumstances that it does not require consultation and/or accommodation in respect of an Activity, and it may determine the level of consultation and accommodation it considers necessary (minor, medium, major).

17. It takes time to make good decisions that consider all relevant matters, and it takes time to build and maintain good relations, and sufficient time must be provided for consultation with and accommodation of WIFN by the Crown and Proponents.
18. All parties to consultation and accommodation processes are expected to treat each other with respect and act in good faith, in an honest, transparent and open manner.
19. WIFN must be consulted by the Crown and if applicable Proponents from the earliest stages of any contemplated Activity, so that strategic and long-term planning is facilitated, WIFN's input can be taken into account in the consideration of relevant alternatives to such Activity (including the alternative of no activity), and in the design of such Activity. This should be a significant benefit to the planning exercise, and greatly reduce the potential for conflict at later stages.
20. The Crown and if applicable Proponents must always consult with WIFN with the intent, and where required by WIFN by taking all feasible steps, to accommodate WIFN by substantially addressing all of WIFN's legitimate concerns about the Activity.
21. The Crown may delegate aspects of consultation and accommodation to the Proponent so long as the Crown maintains an oversight role over the entire process unless WIFN requests otherwise.
22. Accommodation will generally include:
  - Prevention and remediation of Impacts to the extent feasible (and where WIFN requires as below, by not proceeding with the Activity),
  - mitigation of Impacts to the extent feasible
  - provision of capacity building and other benefits from the Activity to the extent reasonably feasible
  - provision of compensation and related benefits from the Activity to the extent reasonably feasible in general to compensate for Impacts
  - measures to increase WIFN's comfort with or trust in the Activity, including community monitoring, community liaison or oversight committees, a role on Proponent's board, other decision-making roles, etc.
23. The Crown is expected to fund, and/or ensure funding is provided by any relevant Proponent for all the reasonable costs of WIFN to participate in a meaningful and informed way in any consultation and accommodation process. These costs will be estimated in a workplan and budget provided by WIFN. Template versions of a workplan and budget are attached to this Protocol as Schedules B and C, but these are examples only.

24. In respect of accommodation, WIFN generally expects Proponents to enter into a Memorandum of Agreement (“MOA”) or the like in respect of Activities that WIFN expects to result in some, but not significant, Impacts, and to enter into an Impacts Benefits Agreement (“IBA”) or the like when WIFN expects significant Impacts but does not decide to stop the Activity. The Crown is expected to work with WIFN when requested to ensure that Proponents meet these expectations. A template version of possible topics to be included in an MOA and IBA are attached to this Protocol as Schedule D, but this is an example only.
25. WIFN has the right to stop any contemplated Crown or Proponent Activity that would likely have a significant Impact.
26. The Crown must not dispose of or grant to any third party any interest in land that is part of WIFN’s aboriginal title claim area (see Ontario Superior Court of Justice court file no. 00-CV-189329, and Schedule A to this Protocol), without the prior and informed consent of WIFN.

#### **E. Trigger for Consultations**

27. The Crown must consult with and accommodate WIFN and where applicable ensure that the Proponent also consults with and accommodates WIFN, in respect of any Activity, when this duty is triggered.
28. In addition, WIFN expects where possible to engage in consultations and negotiations for accommodation at the strategic-planning level, including in respect of the following:
  - co-management of resources (eg: fisheries, wildlife protection plans, and the like)
  - protection and management of watersheds and ecosystems
  - land use planning for broader areas in the Traditional Territory
29. Consultations with and accommodation of WIFN are triggered when the Crown is contemplating any Crown Activity or is aware of any Proponent Activity that might have an Impact.
30. Unless WIFN otherwise decides, if any Activity has begun or is underway before consultation with WIFN is completed, and such consultation would have been triggered, the Crown and where applicable the Proponent must undertake consultation with and ensure accommodation of WIFN forthwith. WIFN expects the Crown to suspend such Activity where to do so would not cause undue hardship to the Crown or any relevant Proponent, until consultations are completed.

#### **F. Consultation and Accommodation Process**

**31. *Step One: Initial Contact***

- a. The WIFN Contact is the WIFN Consultation Manager or a person standing in for him, or such other person or office as the Band Council from time to time appoints.
- b. All Notifications are to be sent to the WIFN Consultation Manager, with a copy sent to the WIFN Chief. If the WIFN Contact is absent or otherwise unable to fulfill his duties of being the WIFN Contact, and there is no person standing in for him, the Chief shall appoint the WIFN Contact.
- c. The Crown Designate must send Notification normally by email and fax to the WIFN Contact, of the contemplated Activity, at the earliest possible stage.
- d. The Proponent shall also send Notification to the WIFN Contact of its Proponent Activity, but WIFN expects consultation and accommodation processes to be initiated by the Crown and for the Crown to have oversight unless WIFN otherwise requests.
- e. Neither the Crown nor the Proponent are required to send such Notification and engage in the process in this Part, if they are contemplating or taking action to address an Emergency Situation. However, as soon as possible after dealing with the Emergency Situation, the Crown or Proponent must send a Notification or other notice to the WIFN Contact of the action taken to address the Emergency Situation. The Crown and/or Proponent must engage in the process in this Part if such action would have otherwise triggered consultations under this Protocol and it could result in further Impact in the future.
- f. The WIFN Contact will where possible confirm receipt of such Notification to the Crown Designate and if applicable the Proponent, within 3 days of receiving it.
- g. If the Crown Designate and Proponent if applicable do not receive such confirmation within 3 days, they must contact the office of the Chief and/or the office of the Director of Operations, to determine if the Notification was received and who the WIFN Representative(s) is/are.

**32. *Step Two: Determination of Consultation and Accommodation Needs and Appointment of WIFN Representatives if Applicable***

- a. The WIFN Contact will if possible within 3 days of receipt of the Notification, forward to the Band Council or a committee of or a delegate of the Band Council as the Band Council may determine from time to time:
  - the Notification;

- a recommendation as to whether consultation and accommodation is required, and if so, the level of same that is likely to be required (minor, medium or major);
- if consultation and accommodation is recommended, a request to appoint WIFN Representative(s) for this consultation and accommodation process within 10 days or a shorter period of time as the WIFN Contact reasonably determines is necessary;

and subject to s. 32(b), the Band Council or a committee of or a delegate of the Band Council as the case may be, will make the determination as to whether consultation and accommodation is required. If so, it will determine the likely level of same, and will appoint WIFN Representative(s) and inform them of the likely level of same. If no consultation and accommodation is required, it will instruct the WIFN Contact to provide notice to the Crown and if applicable the Proponent that no consultation or accommodation is required.

- b. If no response as above is provided to the WIFN Contact within the requested time, the WIFN Contact will:
  - if he recommended that no consultation or accommodation is required, provide notice to the Crown and if applicable the Proponent that no consultation or accommodation is required;
  - if he recommended that consultation and accommodation is required, appoint the WIFN Representative(s) and inform them of his recommendation as to the level of consultation and accommodation likely to be required (minor, medium or major).
- c. Further steps in this Protocol assume that WIFN has determined that consultation and accommodation are required.

### ***33. Step Three: Preparation of Workplan and Budget***

- a. The WIFN Representative(s) will review the Notification to determine whether other Information is required in order for WIFN to develop a workplan and budget for consultation and accommodation in respect of the Activity (eg: whether WIFN has enough Information to determine what technical studies it might have to commission, what legal input it might require, what community input it might require).
- b. The WIFN Representative(s) will contact the Crown Designate and Proponent if applicable as soon as possible after being appointed, to identify him/herself or themselves, to request other Information that is required if any and to determine when it will be delivered, and to set a target date when a workplan and budget for WIFN's participation in the process will be forwarded by WIFN to the Crown Designate and if applicable the Proponent.

- c. If information is to come in stages over the process, then workplans and budgets may be developed for each stage.
- d. The WIFN Representative(s) will prepare a draft workplan for the process of consultations and negotiations, and a budget for WIFN to participate in a meaningful and informed way in same.
- e. The workplan will generally include:
  - Provision of all required Information to WIFN Representative(s): what information, and when it will be provided.
  - Collection of required information from WIFN: what information (such as nature and extent of the exercise of affected Rights, and how such Rights or the Environment or Health might be Impacted by the Activity), when it will be collected, and then provided to the Crown Designate and if applicable the Proponent.
  - Expert analysis or input (if required): what type(s) (such as environmental experts, archaeologists, anthropologists, forestry experts, etc.); nature of the work (which might include field study, review of Information and other relevant documentation, preparation of a report); when each step in the work will be completed.
  - Legal analysis or input (if required): nature of the work (including assisting WIFN in the consultation and negotiation process, evaluation of Information and other relevant documentation from experts and others as to the implications on WIFN's Rights of the proposed Activity, and preparation of legal memoranda re same); when each step in the work will be completed.
  - Consultation and negotiation meetings: their locations, participants, purposes or goals, and timing.
  - Work to be accomplished between each consultation and negotiation meeting (including collection and provision of information, expert and legal analysis and input).
  - Internal community consultation: what is required (might include community meetings, development and dissemination of material to community members, staff and administrative work); when this work will be completed.
  - Negotiating an MOA and/or IBA or the like with the Proponent (if required).

- Ratification of any MOAs, IBAs or the like by the WIFN Community (if required): community processes, when each step in such processes will be completed.
- f. The budget will generally include:
- Expenses to collect, copy and disseminate information.
  - Expert fees and expenses (if required).
  - Legal fees and expenses (if required).
  - Fees or honoraria and expenses for WIFN Representatives for their work in the consultations and negotiations.
  - Meeting costs (to book room and provide refreshments etc)
  - Internal community consultation costs (booking meeting rooms, refreshments for meetings, creating, copying and disseminating written information packages, administrative and staff work for this).
- g. The WIFN Representative(s) will forward the workplan and budget to the Crown Designate and Proponent if applicable as soon as it is completed, generally within 30 days of receipt of the Notification if the Information it contains is sufficient for this purpose.
- h. WIFN expects the Crown and Proponent if applicable to abide by the workplan and budget submitted by WIFN, and for the Crown to cover the budgeted costs or to ensure that the Proponent covers such costs.
- i. If in the opinion of the Crown and/or Proponent, elements of the workplan or budget are not reasonable, they must send to the WIFN Representative(s) their proposed changes and reasons for same before taking any other steps in the consultation or negotiation process.
- j. WIFN expects the Crown and Proponent if applicable to negotiate the workplan and budget in good faith with WIFN, so all parties may arrive at a mutually agreeable workplan and budget.

**34. Step Four: Follow Workplan and Revise When Necessary**

- a. The parties will follow the workplan to the extent reasonable, and WIFN Representative(s) will revise the workplan (and budget if necessary) if circumstances warrant. In case of revision, relevant parts of step three would be repeated.
- b. Consultations may take many forms, and parties should be flexible and patient as the process progresses.

- c. WIFN often makes decisions with the participation of its members. Workplans may therefore contain provision for internal community consultation. In addition, in some cases there may be need for further consultation with particular families or individuals who might be most affected. The number of meetings and internal consultations will depend on the complexity and significance of the Activity and seriousness of Impacts.
- d. The final phase of the process will often involve the negotiation of an MOA and/or IBA, the terms and conditions of which WIFN will analyse to determine whether or not it wishes the Activity to proceed. The WIFN community will often have to ratify or consent to such agreements. The signing of any such MOA or IBA or the like, or if same is not required, the submission by WIFN to the Crown Designate and Proponent if applicable of a letter or other notice stating WIFN agrees the Activity may proceed, constitutes WIFN's consent to the Activity on whatever terms and conditions are contained in the MOA or IBA or letter or the like.

35. General:

- a. The Crown and Proponent must disclose all relevant Information to WIFN Representatives as it becomes available, throughout the consultation and accommodation process.
- b. WIFN may determine whether it wishes to hold any aspect of consultation and accommodation process with the Crown, the Proponent or both, and expects such parties to respect such decisions if they are reasonable.
- c. Any party to consultation and accommodation processes may involve such experts, lawyers or support persons as are reasonably required.
- d. Generally, notes of and correspondence related to all consultation and accommodation processes are the responsibility of each respective party.
- e. Parties to consultation and accommodation processes may enter into confidentiality agreements and may agree that all discussions and correspondence pertaining to such processes are confidential to the extent allowed by law.
- f. If WIFN requires accommodation through negotiations with the Proponent for an MOA or IBA or the like, the Crown is expected to, when requested by WIFN, assist WIFN to ensure that the Proponent engages in such negotiations pursuant to the portion of the workplan and budget that pertain to same. WIFN expects the Crown to not approve the relevant Activity unless and until agreement is reached between WIFN and the Proponent on the MOA or IBA or the like.
- g. This Protocol and any MOA, IBA or the like that WIFN might enter into, are all without prejudice to WIFN's claim in Ontario Superior Court of Justice

court file no. 00-CV-189329 and any of its other specific claims and land claims.

**SCHEDULE A****Walpole Island First Nation's Traditional Territory (in Canada)  
consists of the following lands (see also map versions in this Schedule):**

1. The Canadian portions of the beds of Lake St. Clair, the St. Clair River and the Detroit River.
2. That part of the Canadian portion of Lake Huron south of a line drawn from the northeast corner of the boundary of the 1807 Treaty of Detroit to the northwest corner of the boundary of Treaty #29 of 1827 (approximately the Canadian portion of Lake Huron south of Goderich)
3. That part of the Canadian portion of Lake Erie west of the extrapolation of the eastern boundary of Treaty #2 of 1790 (roughly a line drawn south from London)
4. For greater certainty, any islands encompassed within the lands described above.
5. The area which was the subject of Treaty 25 on July 8, 1822 (which treaty was not signed by WIFN or its predecessors)
6. The geographic Township of Anderdon
7. The lands subject to the following treaties:
  - (a) Treaty #2 (19 May 1790)
  - (b) Treaty #6 (7 September 1796)
  - (c) Treaty #7 (7 September 1796)
  - (d) Treaty #12 (11 September 1800)
  - (e) Treaty #29 (10 July 1827)

# Treaties with the British Crown

# Aboriginal Title Territory

**SCHEDULE B TO WALPOLE ISLAND FIRST NATION  
CONSULTATION AND ACCOMMODATION PROTOCOL**

**Work-Plan for Consultations / Negotiations**

<b>STAGE</b>	<b>TASK</b>	<b>DESCRIPTION / COMMENTS</b>	<b>WHO TO COMPLETE</b>	<b>DATE TO BE COMPLETED</b>	<b>STATUS / DATE ACTUALLY COMPLETED</b>
WORKPLAN & BUDGET	Identification of WIFN needs for participation	WIFN Representatives to work with Crown Designate and Proponent to determine WIFN needs to participate in an informed and meaningful way	WIFN Representatives	20 days after receipt of Notification	
	Provision of further information to WIFN	All further information to be provided by Crown Designate and Proponent to WIFN Representatives	Crown Designate		
	WIFN to prepare draft workplan and budget	WIFN Representatives to review all information to determine technical advisors and internal requirements and draft workplan and budget	WIFN Representatives	30 days after receipt of Notification	
	Agreement on Workplan	Parties to negotiate and agree on workplan and budget	Parties	40 days after receipt of Notification	

CONSULTATION PRE-MEETING 1	Pre- Meeting; Engage Technical Advisors	WIFN to engage technical and legal advisors and experts, provide with agendas, workplan, and terms of engagement (including to interview traditional users to determine potential impacts of Activity, if required)	WIFN Representatives	Prior to First Meeting	
CONSULTATION MEETING 1	Meeting 1	All Parties (or Crown and WIFN if WIFN so requests) to meet to share and review information, raise questions for need for further information, and discuss potential impacts. Deadlines for work and next steps to be determined	All Parties. WIFN Representatives to arrange for meeting.		
CONSULTATION POST MEETING 1	Further questions and answers	Further information shared to respond to questions raised at meeting 1.	All Parties	Within X days of Meeting 1 (and ongoing)	
	Technical reports	WIFN technical advisors and experts undertake technical research and analysis and issue reports. Distribute reports to Crown Designate and Proponent.	WIFN Representatives to oversee and manage	Within X days of Meeting 1	
CONSULTATION MEETING 2	Meeting 2	Discussion of all information shared post meeting 1, and determine any need for further information. Discuss options to ensure that WIFN's concerns are substantially addressed, and measures to ensure this.	All Parties. WIFN Representatives to arrange meeting.		

CONSULTATION POST MEETING 2	Share proposals	Parties to share proposals on ways to address WIFN's concerns, which might include MOA or IBA.	All Parties	X days after meeting 2	
NEGOTIATION	Negotiate MOA or IBA, if applicable	WIFN Representatives, likely with assistance of legal advisor, to prepare draft MOA or IBA and distribute to Proponent and Crown if applicable. Parties to exchange drafts to negotiate MOA or IBA, via email/fax or at in-person meeting(s).	WIFN Representatives	X days after meeting 2	
	Agree on MOA or IBA, if applicable	Parties to negotiation to come to agreement on MOA or IBA terms, possibly with assistance of Crown if WIFN so requests.	All Parties to MOA or IBA	X days after meeting 2	
COMMUNITY CONSULTATION	Meetings in WIFN community	WIFN Representatives to prepare information and present it in community meetings to get input and in some cases the final decision re Activity. Might be more than one meeting required. Crown and Proponent Reps might be requested to attend.	WIFN Representatives		
	Sharing of Community Response	WIFN Representatives prepare and present response re community reaction or decision to Crown and Proponent	WIFN Representatives		

<p>CONSULTATION MEETING 3 3</p>	<p>If required, meeting 3 if outstanding issues</p>	<p>If agreement not reached between parties by this stage, hold another meeting(s) to determine if agreement can be reached and how, and next steps for doing this.</p>	<p>All Parties. WIFN Representatives to arrange for meeting(s)</p>		
<p>CONSULTATION AND NEGOTIATION POST MEETING 3</p>	<p>Agreement reached if possible</p>	<p>Steps required to ratify MOA or IBA, or for WIFN to send letter approving Activity or otherwise for agreement between Crown and WIFN re Activity</p>	<p>All Parties. WIFN Representatives to oversee.</p>		

**SCHEDULE C TO WALPOLE ISLAND FIRST NATION  
CONSULTATION AND ACCOMMODATION PROTOCOL**

**BUDGET**

This Budget may be divided into two parts -- one for Consultation and one for Negotiation – if the Crown pays for Consultation costs and the Proponent pays for costs to negotiate MOA or IBA or the like.

<b>CONSULTATION &amp; NEGOTIATION BUDGET</b>		
<b>ITEM</b>	<b>DESCRIPTION</b>	<b>EXPECTED COST</b>
Administrative Expenses	Copying fees, postage, long distance fees, %age overhead for WIFN administration	
WIFN Representative Fees / Per Diems	Salary recovery, fee, or per diem for each WIFN representative (itemize separately)	
WIFN Representative Expenses	Travel and other expenses	
Consultation / Negotiation Meetings	Meeting rooms, refreshments, etc (list for each projected consultation meeting)	
Community Meetings Expenses	Copying and dissemination of material, meeting rooms, refreshments, elder or other honoraria (list for each community meeting)	
Internal Technical Advisor/ Expert Fees	Describe which kinds of WIFN technical advisors/experts required, their deliverables and their fees	
Internal Technical Advisor/Expert Expenses	Travel and other expenses	
Outside Technical Advisor/Expert Fees	Describe which kinds of outside experts or technical advisors required, their deliverables and their fees	
Outside Technical Advisor/Expert Expenses	Travel and other expenses	
Legal Fees	Describe type of work required and fees for consultations	

Legal Expenses	Travel and other expenses	
<b>TOTAL</b>		

### **F.3 Saugeen Ojibway Nations**

## Principles for Proponents working in the Traditional Territories of the Saugeen Ojibway Nations

The Saugeen Ojibway Nations consist of the Chippewas of Saugeen and the Chippewas of Nawash Unceded First Nation. The traditional lands of the Saugeen Ojibway Nations extend east from Lake Huron to the Nottawasaga River and south from the tip of the Bruce Peninsula to the Maitland River system (11 miles south of Goderich). The traditional waters around these lands include the lakebed of Lake Huron from the shore to the US border and the lakebed of Georgian Bay to the halfway point.

The following principles will form the basis of any future relationship with the proponent and a negotiated protocol for consultation and accommodation.

### 1. Rights and Interests

The rights and interests of the Saugeen Ojibway Nations are as follows:

- a) Pursuant to our 19<sup>th</sup> century Treaties with the Crown, the SON occupy large Reserves bordering Lake Huron or Georgian Bay. Because these reserve lands were exempted from the surrender in the Treaty, the SON have Aboriginal title to those lands. Those reserves sustain the SON's future in various ways. They are our residential communities, include places of cultural and spiritual significance, and are the base for our fisheries and other economic opportunities, including valuable recreational properties. Those proprietary rights and interests depend on a safe and stable, toxic-free environment, including clean water from Lake Huron or Georgian Bay.
- b) The SON have **subsistence fisheries and land-based harvesting practices and rights** throughout our territory. These provide vital support for our Aboriginal culture and way of life, as well as the economy, health and social relationships in the SON communities.
- c) The SON also have commercial fishing rights in Lake Huron and Georgian Bay. These Aboriginal and Treaty rights were confirmed in *R v Jones and Nadjiwan*, [1993] 3 CNLR 178, and are an interest of growing economic importance, in light of the large scale settlement and development in the territory.
- d) The SON also have two major land claims before the courts. One is an aboriginal title claim to the lakebeds of our traditional waters. The other affects the whole of Bruce Peninsula, including the land under navigable rivers and lakes.

## 2. Consultation

The Supreme Court of Canada has recently explained the Crown's legal obligations to consult aboriginal peoples, in three decisions: *Taku River Tlingit v British Columbia* [2005] 1 CNLR 366, *Haida Nation v British Columbia* [2005] 1 CNLR 72, and *Mikisew Cree v Canada* [2006] 1 CNLR 78. In subsequent decisions by courts in British Columbia and Ontario, further details have been clarified – see e.g., *Musqueam Indian Band v Canada* [2005] 2 CNLR 212 (B.C.C.A.), *Platinex Inc. v Kitchenuhmaykoosib Inninuwig First Nation* (Ont. SCJ, July 28, 2006).

It is now settled that a government must engage in consultations with an Aboriginal people when considering a decision that might adversely affect their Aboriginal or Treaty rights or interests intended for protection by section 35 of the *Constitution Act, 1982*. **If there is a potential for substantial adverse impacts or infringement, there is a corresponding obligation to protect and accommodate the affected rights or interests.**

These consultation and accommodation obligations are based on the honour of the Crown. They reflect the ongoing requirement to pursue the reconciliation of pre-existing Aboriginal rights and interests with Crown sovereignty. These are continuing obligations that emerge from the Crown-Aboriginal relationship, and **which arise whenever there is a reasonable likelihood that Aboriginal interests could be at risk**. If governments do not fulfill these obligations, the courts may disallow authorizations for proposals that triggered the duty.

Therefore, in the context of the SON:

- a) The process must **focus on the impacts/infringement**. The Crown must genuinely seek to inform itself about and substantially address the First Nation's concerns.
- b) The **focus must be on the outcome and not just the process**. The appearance must not triumph over content.
- c) The key is to focus the consultation process on the constitutionally protected aboriginal rights in question. This is not just a chat. This is not a discussion about "interests". This is a process required because the Crown is proposing to allow something to take place that could infringe a right or rights protected by s.35 of the Canadian Constitution. **The scope and nature of the consultation and accommodation are inextricably linked to the rights at stake.**
- d) The substantive requirement is that the Crown "demonstrably integrate" the rights and title claims raised by the First Nation into the decision making process.
- e) The Crown's legal duty to consult with the Saugeen Ojibway Nations cannot be delegated to third parties.
- f) Consultation cannot proceed in the absence of the Crown.

- g) The SON, after the Environmental Assessment process, will be consulted about any subsequent permitting, approval and licensing processes that are a part of the overall project.

### 3. Protection of the Environment

The Saugeen Ojibway Nations' traditional territories have been their home long before contact and will continue to be their home for generations to come. The full expression of Saugeen Ojibway Nations' rights depends on healthy, biologically diverse ecosystems. Therefore:

- a) The SON must have full participation in any environmental screening or assessment process.
- b) The SON are entitled to share and have access to all necessary information relating to environmental screening or assessment reports and processes, especially those that might reveal potential impacts on Saugeen Ojibway Nations' rights, claims and way of life.
- c) The SON must have full participation in the ongoing monitoring of the project.
- d) A separate Environmental Agreement will be required. Components of the Environmental Agreement would include (but would not be limited to):
  - i. terms and conditions that are necessary as identified by the SON's environmental review of the project;
  - ii. a determination of the level of engagement of the SON in the ongoing environmental management of the project, including decommissioning of the project;
  - iii. delivery of environmental monitoring data, studies and other information to the SON for periodic evaluation;
  - iv. periodic independent evaluation of the proponent's environmental performance;
  - v. the collection of baseline data for use as environmental health indicators.
  - vi. environmental reporting to the SON on a regular basis;
  - vii. review and approval authority by SON of environmental management plans (especially closure/decommissioning plans);
  - viii. an endorsement of the precautionary principle;
  - ix. agreement on the preservation of sensitive naturally occurring ecologies, including species of particular cultural interest to the SON;
  - x. restoration, where practical and appropriate, of indigenous species;
  - xi. compliance with regulations, standards and best practices of the day.

### 4. Sustainability of the First Nations

In the past, many projects, legislation, policies and practices have proven incompatible with the Saugeen Ojibway Nations' rights, interests and way of life. Therefore:

- a) The proponent must accommodate the rights and interests of the SON such that the project contributes to the SON's well-being and does not undermine it.
- b) Any adverse impact or infringement upon the SON's rights and way of life and the sustainability of these interests within their traditional territories must be fully addressed and mitigated by the proponent. This would include impacts on harvesting rights, particularly SON rights to a commercial fishery.
- c) The proposed project must be consistent with the SON's vision for the land and waters of their traditional territories, respectful of their rights and interests and it must contribute to the cultural, economic and social vitality of their people.

#### 5. Protection of Culturally Specific Sites (burial grounds, ancient habitation sites etc.)

Areas within the traditional territories of the Saugeen Ojibway Nations are sacred and are of significant cultural value. It is imperative that these sites are properly identified and protected. Therefore:

- a) The proponent must, with SON participation, determine whether the site for the proposed project is of any cultural significance to the SON.
- b) The proponent and the SON must assess whether the project will have an adverse impact on any existing culturally specific site(s).
- c) If the heritage resource potential of any site(s) proposed for surface disturbance has not yet been assessed for archaeological potential, then, prior to any disturbance, the proponent must conduct a site archaeological survey according to terms agreed to by the SON.
- d) If artefacts or remains are found, all work at the site must cease and the SON notified immediately. The proponent and First Nation representatives will then enter into negotiations regarding the disposition of artefacts and the protection of remains.
- e) Socio-cultural impact assessment studies may need to be conducted at the proponent's expense.

#### 6. Experts and Assessments

- a) The proponent must seek the approval of the SON for the appointment of experts who will conduct traditional land use studies, archaeological studies and ethnographic studies that assess the impacts of the project.
- b) The SON must play a meaningful role in any assessments or studies regarding the project and its impact on their rights and way of life and the sustainability of these

interests within their traditional territories. This role might include the setting of terms of reference and the peer review of such studies.

## 7. Mitigation Strategies

Accommodation is an integral part of consultation. Therefore:

- a) The proponent and the SON must jointly develop mitigation strategies that fully address the SON's concerns.

## 8. Information Sharing

An open and transparent process, conducted in good faith is at the heart of proper consultation. The Saugeen Ojibway Nations must be able to make informed decisions, understand fully the effects that a decision may have, and ensure their decisions are consistent with the needs, aspirations and concerns expressed by their communities. Therefore:

- a) The proponent must provide the necessary vital and detailed information pertinent to the project and its impacts on the SON's rights and interests and the sustainability of these interests within their traditional territories.
- b) The SON must share all information with the proponent that addresses their concerns regarding potential impacts of the project and any other information that is necessary in terms of assessing and or monitoring the project as well as designing and implementing any required mitigation measures.
- c) All information must be provided in a timely manner.

## 9. Capacity

- a) The proponent must provide the Saugeen Ojibway Nations with sufficient funding to ensure that the SON can participate fully in the negotiation of a Protocol Agreement and in the consultation process itself, which includes the various studies, and stages of the assessment process.

## 10. Benefits

The SON is generally excluded from the educational, employment and business opportunities that industry brings to others in their traditional territories. Therefore:

- a) The proponent and SON will negotiate an agreement that will include, but is not limited to, compensation, employment, training and business opportunities.

## **F.4 Six Nations Elected Council**

## **Six Nations of the Grand River Land Use Consultation & Accommodation Policy**

### **A Policy for Obtaining Free, Prior, and Informed Consent from Six Nations**

#### **1. Preamble**

Six Nations of the Grand River is the largest First Nation by population in Canada. The current territory spans 46 500 acres and is bordered by the Mississaugas of the New Credit First Nation and the counties of Norfolk, Brant, and Haldimand. This territory represents only 4.8% of the 950,000 acres of the Haldimand Tract lands that were granted to Six Nations by the Haldimand Proclamation in 1784.

As the official governing body of the territory and working with all Six Nations Community Members, Six Nations Elected Council (SNEC) on behalf of the people of Six Nations of the Grand River has interests in and a duty to protect land within the Haldimand Tract. These interests include unsurrendered lands; conditionally surrendered lands which are subject to unfulfilled conditions; and the Grand River including the river bed. Additionally Council asserts a responsibility to protect the land, air, and water within the wider area specified by the 1701 Fort Albany/Nanfan Treaty. By 1995, Six Nations has filed with the Federal Crown, 29 specific claims with more to be researched. At this time, the Federal Crown is typically taking between 10-20 years to review and settle specific claims. However, in 1995 when Six Nations commenced a court action against the Crown requesting an accounting of all the real and personal property that Six Nations should have had from the Haldimand Tract, the Government of Canada ceased any attempts to settle the claims submitted under the Specific Claims Policy. The Crown's failure to settle these claims has resulted in land disputes that harm relations and waste both money and resources. This failure has resulted in frustration for developers, municipalities, communities, as well as the people of Six Nations.

#### **2. Policy Statement**

Six Nations Elected Council (SNEC) requires that the Crown, Proponents and municipalities consult with SNEC in good faith in order to obtain its free and informed consent on behalf of Six Nations of the Grand River prior to SNEC approval of any project potentially affecting Six Nations' Interests. SNEC expects that effective mechanisms shall be provided by the Crown and/or Proponent for just and fair redress for any significant development activities; and all parties shall take appropriate measures to mitigate adverse environmental, economic, social, cultural or spiritual impacts. SNEC supports development that benefits the people of Six Nations and is conducted in a manner that is cognisant and respectful of the water, air, land, rights and interests of the people of Six Nations. SNEC fully expects all Proponents, municipalities and the Crown to respect this policy.

#### **3. Guiding Principles**

The following principles shall guide all consultation and accommodation endeavours.

- 3.1 The process of consultation and accommodation must be guided by the principles established by the United Nations Declaration on the Rights of Indigenous Peoples. At a minimum this must include:
  - (i) a lack of any and all coercion including, but not limited to, financial and time constraints;
  - (ii) commencing consultation at the onset of a project, prior to decisions being made; and

- (iii) full disclosure including, but not limited to, detailed reports on the project and the property; details of all federal, provincial, and municipal fees and taxes related to the property; and information as to the purchase price of the property.
- 3.2 The decision-making process must be proactive, holistic, and strategic in scope that works toward joint planning approaches. Decisions should be made by consensus wherever possible.
- 3.3 The process shall have an ongoing government-to-government relationship based on the recognition of Six Nations inherent rights, treaty rights, and title. Six Nations must have a formal role in all decisions influencing and impacting the territory at all levels reasonably necessary to protect the rights and interests of Six Nations. SNEC must not be just considered part of a larger Ontario community who might be consulted.
- 3.4 The process shall have respect for the sacred bonds between Six Nations and the land, through long term agreements that provide measures to protect the land and resources that Six Nations relies on to sustain its culture, Community, and economy.
- 3.5 There shall be available financial resources for Six Nation's full and effective participation in all aspects of the consultation and accommodation process.
- 3.6 There must be a willingness to provide accommodation for the reasonable concerns of Six Nations prior to the commencement of the project.
- 3.7 There must be a willingness to engage in a jointly accepted dispute resolution process in the event an agreement cannot be reached.
- 3.8 There must be a commitment to deal with each development on an individual and flexible basis. The controlling question in all situations must be what is required to maintain the honour of the Crown and to effect reconciliation between the Crown and Six Nations peoples with respect to the interests at stake.

#### **4. Application**

- 4.1 This policy and related procedures apply to any and all Federal, Provincial and Municipal land use policies or regulations; all land use development projects within the Haldimand Tract; and any proposed land projects outside of the Haldimand Tract that may reasonably be seen to affect the rights and interests of Six Nations as outlined in the Policy Statement section above.
- 4.2 This policy does not apply to land use projects proposed by Members of Six Nations within the Six Nations territory.

#### **5. Enforcement**

- 5.1 If a Proponent or the Crown fails to abide by this policy SNEC may take one or more of the following actions:
  - (i) legal action;
  - (ii) publication of projects that are not in compliance with the policy; and
  - (iii) any other action deemed reasonable.

#### **6. Definitions**

- 6.1 Accommodation – an amicable agreement achieved by consultation between two or more parties to reconcile Six Nations concerns and to avoid irreparable harm or to minimize the effects of infringement by seeking compromise in an attempt to harmonize any conflicting interests. Accommodation may include, but is not limited to:
  - (i) Partnerships;
  - (ii) joint ventures;
  - (iii) revenue sharing;
  - (iv) employment and educational opportunities; and
  - (v) other arrangements that benefit the Six Nations Community.
- 6.2 Consultation – a deliberation, in good faith, on a matter involving two or more parties, having concern for and consideration of Six Nations' wishes in planning and acting; with a mutual goal of arriving at an agreeable decision prior to any undertaking by either party.
- 6.3 Haldimand Tract – the land six miles on either side of the Grand River from its source to Lake Erie granted to Six Nations by the Haldimand Proclamation of October 25, 1784

6.4 Major projects – Projects that SNEC believes have a reasonable potential to cause environmental damage, result in non-compensable damage, or projects on lands to which Six Nations has a strong *prima facie* case for recognition or restoration of beneficial title. These projects may include, but are not limited to:

- (i) Some estate residential developments;
- (ii) large residential developments;
- (iii) commercial and industrial developments;
- (iv) changes to Municipal or Provincial land use policies or plans;
- (v) major transportation projects;
- (vi) projects that border and/or cross the Grand River;
- (vii) aggregate resource projects
- (viii) energy, electric and water projects, and associated transmission or transportation;
- (ix) waste management facilities;
- (x) projects deemed Special Projects by SNEC. (*amended by LAR#8-02/25/2010*)

6.5 Minor projects – Projects that SNEC believes present very little potential for negative effects on the environment, cultural, social and economic damage, or infringement on Six Nations’ Interests, and Treaty rights. These projects may include, but are not limited to:

- (i) severances;
- (ii) variances;
- (iii) lot line adjustments;
- (iv) garden suites;
- (v) some estate residential developments; and
- (vi) the majority of notices outside of the Haldimand Tract not deemed to be Special Projects.

(*amended by LAR#8-02/25/2010*)

6.6 Proponent – A person including corporations, which may include the Crown, who proposes a minor or major project to be implemented that may affect Six Nations’ Interests.

6.7 SNEC – Six Nations Elected Council including its authorized agents and employees.

6.8 Special Projects – Projects of a significant size or importance that have a reasonable potential to affect Six Nations Interests or infringe on Six Nations rights. (*amended by LAR#8-02/25/2010*)

6.9 Six Nations Interests – SNEC asserts their interest in the following lands:

- (i) Unsurrendered lands within the Haldimand Tract;
- (ii) Conditionally surrendered lands which are subject to unfulfilled conditions;
- (iii) The Grand River including the river bed; and
- (iv) The 1701 Fort Albany/Nanfan Treaty territory.

6.10 Six Nations Land Use Consultation Team – A panel delegated by SNEC, as per the *Six Nations Land Use Consultation Team Terms of Reference*, to carry out the process of consultation and accommodation on behalf of SNEC.

6.11 The Crown – Her Majesty in right of Canada and Her Majesty in right of Ontario and their respective governments and agencies.

6.12 Third Parties – A person; other than the Crown, SNEC, or the Proponent; who is either directly or indirectly affected by a project.

## 7. Non-Derogation

7.1 Nothing in this policy, pursuant to section 25 of the Charter of Rights and Freedoms, shall be construed so as to abrogate or derogate from the protection provided for Six Nations’ existing Aboriginal or Treaty rights as recognized by section 35 of the *Constitution Act* 1982, the Royal Proclamation of October 7, 1763, and any rights or freedoms that now exist by way of land claims agreements or may be so acquired.

7.2 Nothing in this policy shall be construed as to affect the Aboriginal or Treaty rights, as recognized by section 35 of the *Constitution Act*, 1982, of any other First Nation.

## 8. Responsibilities of the Crown

8.1 The Crown is responsible to:

- (i) operate in good faith;
- (ii) uphold the honour of the Crown;
- (iii) accommodate Six Nations concerns up to the point of undue hardship where Six Nations rights and interests have been asserted but not necessarily proven;
- (iv) keep abreast of the status of the consultation process throughout and contribute in a meaningful way when necessary;
- (v) participate in consensus decision making;
- (vi) give reasonable consideration to Six Nations' rights and interests;
- (vii) ensure the consultation process is adequately and securely funded; and
- (viii) conduct consultation in the most expeditious manner possible consistent with SNEC internal policies and processes.

## 9. Responsibilities of SNEC

9.1 SNEC is responsible to:

- (i) operate in good faith;
- (ii) represent the concerns, values, and opinions of all Six Nations Community Members;
- (iii) make a reasonable effort to provide all Six Nations Community Members with adequate notice of all major projects;
- (iv) make a reasonable effort to provide all Six Nations Community Members with an opportunity to comment on major projects;
- (v) promote and encourage the utilization of this consultation and accommodation process;
- (vi) lobby for the necessary resources to operate the consultation and accommodation process; and
- (vii) monitor compliance, by all parties, with the consultation and accommodation process.

## 10. Responsibilities of Proponents

10.1 Proponents are responsible to:

- (i) operate in good faith;
- (ii) notify SNEC at the onset of the project;
- (iii) adhere to the consultation and accommodation process; and
- (iv) disclose, in a timely manner, all information required by SNEC including but not limited to:
  - (a) a detailed description of the project;
  - (b) a description of the property;
  - (c) the purchase price of the property; and
  - (d) all taxes, including land transfer, paid on the property.

## 11. Overview of the Early Consultation Process

11.1 This overview shall not be interpreted to be exhaustive of the process for consulting with Six Nations.

For greater clarity please reference the SNEC document, "Six Nations of the Grand River Land Use Consultation and Accommodation Procedure Annual".

11.2 Prior to the onset of the project the Proponent shall notify SNEC, in writing, of their intentions and shall provide SNEC with detailed descriptions of the proposed development.

11.3 Contact between SNEC and a Proponent may be initiated at this time during informal meetings and/or other forms of communication. This may be interpreted as a sign of good faith and honourable intention however; this initial communication shall not be considered to fulfill the duty to consult.

11.4 Following receipt of notice as described in 11.2, SNEC shall give notice in conjunction with the Proponent to the Crown requiring it to consult with Six Nations.

11.5 The Proponent shall submit, in a timely manner, any studies, plans, environmental assessments, reports, property descriptions, taxation information, or other related documentation reasonable in the circumstances and relevant to the project that may be requested by SNEC.

11.6 SNEC shall maintain detailed records in order to provide, in writing, to the Crown indication of the financial/human resources utilized to perform a preliminary review of a project.

11.7 Following the preliminary review SNEC will provide the Crown and the Proponent with:

- (i) any preliminary concerns or objections from Six Nations; and

- (ii) notification as to whether the project is being considered as a major or minor project.

## 12. Minor Projects

- 12.1 If a project is considered minor the Proponent shall submit all documentation requested by SNEC to ensure that SNEC is fully informed on the land being used and the project itself.
- 12.2 SNEC reserves the right to request regular updates on specific aspects of minor projects.
- 12.3 SNEC will notify the Crown and provide the Proponent with a letter indicating the satisfactory fulfillment of consultation when the Proponent has complied with all reasonable requests of SNEC.

## 13. Major Projects

SNEC recognizes that not all major projects present equal levels of risk to the interests or Treaty rights of the Six Nations Community. The following represents an overview of how SNEC is prepared to address major projects. SNEC reserves the right to deal with each project on an individual basis within this framework.

- 13.1 If a project is considered major, SNEC shall publicize the location and nature of the proposed project.
- 13.2 SNEC will provide the Crown and the Proponent with any concerns, issues or objections. SNEC shall allow an adequate period of time for the Proponent and the Crown to respond to the identified concerns, issues and objections.
- 13.3 When SNEC has acquired all relevant information concerning the proposed project and notified the Crown and Proponent of any concerns or objections, SNEC shall make a reasonable attempt to inform all Six Nations Community Members.
- 13.4 SNEC shall allow adequate time for all Six Nations Community Members to submit objections or support for the project. SNEC shall give all reasonable submissions consideration in drafting a response to the Proponent.
- 13.5 If SNEC decides to consult on the project a Six Nations Council Resolution shall be passed to that effect. This resolution shall require SNEC to engage in meaningful dialogue by way of negotiation and mediation with the Crown and Proponent, to attempt to resolve any identified issues, concerns and objections.
- 13.6 If SNEC decides not to consult on the project a Letter of Objection shall be furnished to the Crown and to the Proponent.

## 14. Overview of Accommodation Process

- 14.1 Any party that wishes to fulfill the duty to consult with Six Nations shall not be considered to have fulfilled that duty until the concerns of Six Nations Land Use Consultation Team and the Six Nations Community have been heard and any reasonable concerns satisfactorily addressed.
- 14.2 After the Six Nations Land Use Consultation Team and Six Nations Community have been provided with the opportunity to submit comments regarding the project, SNEC shall compile a Report of Concerns detailing the concerns identified throughout the process, as well as recommendations for how to accommodate those concerns. SNEC will then submit the report to the Crown and the Proponent. This report will be made available to the public.
- 14.3 The Proponent and the Crown may opt to agree with the concerns and recommendations suggested in the Report of Concerns.
- 14.4 If the Report of Concerns is not agreed to by the Proponent or the Crown a detailed, written response to the Report of Concerns and alternative means of accommodation shall be furnished to SNEC, in a timely manner, by the disagreeing party.
- 14.5 Upon receipt of any response from the Proponent or the Crown, SNEC and the Proponent shall attempt to reach a mutually acceptable agreement through a process of conciliation.
- 14.6 If a mutually acceptable agreement is obtained by the parties, SNEC shall furnish a letter to the Proponent recognizing the project and indicating that the duty to consult and accommodate has been fulfilled.
- 14.7 If a mutually acceptable agreement is no longer reasonably attainable SNEC shall notify the Crown of its desire to commence a further negotiation process.

14.8 Negotiations shall be carried out in a mutually agreeable, impartial manner. The structure, procedure, timing, location and parties shall be agreed to by the Crown and SNEC prior to the negotiation process being undertaken.

## **15. Dispute Resolution**

15.1 In order to avoid resorting to the court system, if at any point throughout the consultation process the parties feel that an agreement cannot be reached they may opt to pursue a dispute resolution process.

15.2 Any dispute resolution process must be:

- (i) conducted in a manner where Six Nations has equal decision making power;
- (ii) conducted in an impartial and mutually acceptable manner; and
- (iii) conducted in a timely manner.

15.3 The process of consultation shall cease for the duration of a dispute resolution process.

15.4 The Crown, SNEC, and the Proponent must be parties to any dispute resolution process.

15.5 If the parties required in a dispute resolution by subsection 15.4 deem it appropriate they may agree to grant standing to any Six Nations Member or party in a dispute resolution.

15.6 A third party may receive standing in a dispute resolution.

15.7 A dispute resolution process may be sought where the end result of the consultation process is 'no agreement.'

## **16. Review and Amendment**

16.1 SNEC shall review this policy on at least an annual basis.

16.2 Any ongoing consultations shall not be affected by changes to the policy, unless agreed to by all parties.

16.3 SNEC reserves the right to amend or clarify the policy as it considers necessary to reflect its intended application.

## **17. Regulations**

17.1 SNEC reserves the right to establish procedures, regulations and fees, from time to time, under the authority of this policy. This right may be delegated to agents, successors and employees of Six Nations Elected Council.

## **18. Authorization**

18.1 This policy was approved at the General Council meeting held on June 2, 2009 by SNCR #197-02/06/2009 and #198-02/06/2009 to be effective on June 3, 2009. This policy shall repeal and replace any previous Six Nations Council policies relating to land consultation.

18.2 This policy was amended at the Lands and Resources meeting held on February 25, 2010 under the authority of **LAR#8-02/25/2010**. All occurrences of such amendments have been noted herein and shall be effective immediately.

## **Appendix G**

### **Tables of Concordance G**

## **G.1 Kettle and Stony Point First Nation**

Issue/Value	Response	Corresponding Report and Section
<ul style="list-style-type: none"> <li>Concern about impacts to terrestrial harvest species (deer mentioned) and how to assess impacts post-construction, during operations stage</li> </ul>	<ul style="list-style-type: none"> <li>Potential effects to terrestrial species are addressed through the Natural Heritage Assessment and Environmental Impact Study Report. Within the Report, NextEra identified and assessed Candidate Significant Wildlife Habitats including Winter Deer Yards and Deer Migration Corridors. Although the Ministry of Natural Resources (MNR) identified a Winter Deer Yard associated with the Hay Swamp Provincially Significant Wetland, this feature is located beyond 120 m from the Project Location and as per MNR guidelines, was not carried forward to site investigation. Negative effects to deer are not anticipated as a result of the project and no post-construction monitoring is required.</li> </ul>	<ul style="list-style-type: none"> <li>Natural Heritage Assessment and Environment Impact Study Report: Section 2.2.2.4 - Wildlife Habitat (including rare species)</li> </ul>
<ul style="list-style-type: none"> <li>Will want archaeological observer in field work and for ground disturbance/excavation</li> </ul>	<ul style="list-style-type: none"> <li>During field work, a fully independent First Nations monitor was supported by NextEra, who reported directly to four interested First Nations governments, including Kettle and Stony Point First Nation. The monitor was a licensed archaeologist and First Nations person. To date, the monitor's reports of field work have been positive and no concerns identified. NextEra also agreed with the monitor's recommendation to have archaeological monitoring in place for archaeological sites as follows: archaeological sites recommended for Stage 3 archaeological assessment that have been fenced with a 20 m buffer will have construction activities monitored within an additional 50 m zone outside of that buffer; and archaeological sites recommended for Stage 4 avoidance that have been fenced with a 10 m buffer will also be monitored in case additional archaeological resources are present outside of that buffered area.</li> </ul>	<ul style="list-style-type: none"> <li>Construction Plan Report: Table 3-1 – Mitigation Measures, Residual Effects and Monitoring Plan: Cultural Heritage</li> </ul>
<ul style="list-style-type: none"> <li>Interest in bird/bat mortality and monitoring</li> </ul>	<ul style="list-style-type: none"> <li>NextEra will develop and implement a monitoring program for bird and bat mortality consistent with <i>Birds and Bat Habitats: Guidelines for Wind Power Projects</i> (MNR, 2010) and <i>Bats and Bat Habitats: Guidelines for Wind Power Projects</i> (MNR, 2011) which will include:                         <ul style="list-style-type: none"> <li>Conducting 3-years of post-construction mortality surveys for birds including raptors (such as hawks and owls) and bats;</li> <li>Conducting subsequent monitoring for two years at individual turbines (and unmonitored turbines in close proximity) if significant bird or bat mortality is identified.</li> <li>Conducting effectiveness monitoring at individual turbines for three years where mitigation has been implemented.</li> </ul> </li> <li>The findings of the bird and bat mortality monitoring programs will be reported back to MNR on an annual basis for the first 3 years of operation.</li> </ul>	<ul style="list-style-type: none"> <li>Natural Heritage Assessment and Environment Impact Study Report: Section 5.3.2.1 – Generalized Significant Wildlife Habitat Mitigation Measures</li> <li>Design and Operations Report: Table 6-2 – Mitigation Measures, Residual Effects and Monitoring Plan: Natural Heritage Resources</li> </ul>

Issue/Value	Response	Corresponding Report and Section
<ul style="list-style-type: none"> <li>• Wildlife                             <ul style="list-style-type: none"> <li>(i) consideration relating to threatened and/or endangered species</li> <li>(ii) harvesting as it relates to the gathering of traditional plants &amp; herbs, hunting and/or use of lumber</li> <li>(iii) flora and fauna population impacts</li> <li>(iv) any biodiversity initiatives</li> <li>(v) monitoring</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>• Effects on wildlife are assessed in the Natural Heritage Assessment and Environmental Impact Study Report and summarized in the Construction Plan and Design and Operations Report. NextEra is presently working with Historic Saugeen Métis (“HSM”) and any information received about potential concerns for specific areas where harvesting may be taking place will be addressed directly with HSM within that process.</li> <li>• Please see the rows below for details with corresponding Report/Section references provided.</li> <li>(i) Due to the sensitive nature of Species at Risk, they are not identified in the Natural Heritage Assessment and Environmental Impact Study Report. Species at Risk and their habitats potentially occurring within the Study Area are being identified through site investigations, background research and in consultation with the Ministry of Natural Resources. To date, three species at risk were identified during the 2011 field studies. Additional field studies are being undertaken this year. Potential effects to Species at Risk will be addressed through a Species at Risk Report and submitted to the Ministry of Natural Resources to determine if a permit is required. An Endangered Species Act permit is required if the proposed works will have an adverse effect on a protected species or its habitat, as determined by the Ministry of Natural Resources. Any required permits will be obtained from the Ministry of Natural Resources prior to commencing construction and any required mitigation measures or monitoring commitments will be implemented.</li> </ul>	<ul style="list-style-type: none"> <li>• Natural Heritage Assessment Report: Section 2.2.2.4 – Wildlife Habitat (Including Rare Species)</li> </ul>
	<ul style="list-style-type: none"> <li>(ii) The Project is sited predominantly on actively farmed agricultural fields. However, where vegetation removal is required, NextEra will restore temporary work areas following the construction phase. Stripped topsoil will be replaced and recontoured in the construction areas and disturbed areas will be re-seeded, as appropriate. Once the turbines are constructed, farming practices can continue up to within a few metres of the turbine base. Temporary access roads will be revegetated to pre-construction conditions as soon as possible following construction activities using species native to Ontario in naturally vegetated areas. Vegetation removal will be kept to a minimum and limited to non-significant habitats (e.g. hedgerows). Damaged trees will be pruned through the implementation of proper arboricultural techniques. Where vegetation removal is to occur within 30 m of a natural area, protective fencing will be installed to define the construction area and prevent accidental damage to vegetation. For any vegetation removal required along the transmission line route, a detailed inventory of species/abundance to be removed will be completed. Following construction, vegetation will be re-planted using an area ratio of 1:1 of similar species association (native species) if the area removed was greater than 1% of the woodland cover.</li> <li>(iii) Effects on flora and fauna are discussed in terms of vegetation removal for construction (see row above for details) and bird and bat mortality during turbine operation (see row below for details).</li> </ul>	<ul style="list-style-type: none"> <li>• Construction Plan Report: Table 3-3 – Mitigation Measures, Residual Effects and Monitoring Plan: Generalized Candidate Significant Wildlife Habitat; and,</li> <li>• Construction Plan Report: Table 3-4 – Mitigation Measures, Residual Effects and Monitoring Plan: Significant Wetlands, Woodlands, Valleylands and Wildlife Habitat</li> </ul>
	<p>NextEra will develop and implement a monitoring program for bird and bat mortality consistent with <i>Birds and Bat Habitats: Guidelines for Wind Power Projects</i> (MNR, 2010) and <i>Bats and Bat Habitats: Guidelines for Wind Power Projects</i> (MNR, 2011) which will include:</p>	<ul style="list-style-type: none"> <li>• N/A</li> <li>• Natural Heritage Assessment and Environment Impact Study Report: Section 5.3.2.1 – Generalized Significant Wildlife Habitat Mitigation Measures</li> </ul>

Issue/Value	Response	Corresponding Report and Section
	<ul style="list-style-type: none"> <li>▪ Conducting 3-years of post-construction mortality surveys for birds including raptors (such as hawks and owls) and bats;</li> <li>▪ Conducting subsequent monitoring for two years at individual turbines (and unmonitored turbines in close proximity) if significant bird or bat mortality is identified.</li> <li>▪ Conducting effectiveness monitoring at individual turbines for three years where mitigation has been implemented.</li> </ul> <p>The findings of the bird and bat mortality monitoring programs will be reported back to MNR on an annual basis for the first 3 years of operation.</p>	<ul style="list-style-type: none"> <li>• Design and Operations Report: Table 6-2 – Mitigation Measures, Residual Effects and Monitoring Plan: Natural Heritage Resources</li> </ul>
	<p>If mortality thresholds set by the Province are exceeded, NextEra would propose the following operational mitigation techniques for birds (which would be applied at times of the year when mortality risks to the affected bird species are particularly high (e.g., migration):</p> <ul style="list-style-type: none"> <li>▪ Periodic shut-down of select turbines; and,</li> <li>▪ Blade feathering (i.e. reduced operations at certain wind speeds).</li> </ul> <p>NextEra proposes the following operational mitigation techniques for bats:</p> <ul style="list-style-type: none"> <li>▪ Changing the wind turbine cut-in speed to 5.5 m/s;</li> <li>▪ Feathering of blades when wind speeds are below 5.5 m/s; and,</li> <li>▪ Co-ordinating turbine shut-down for maintenance with periods of high bat activity and/or mortality.</li> </ul> <p>The above-mitigation measures would be implemented if deemed necessary by the results of post-construction monitoring and the Ministry of Natural Resources (for details on post-construction monitoring, see row below).</p> <p>Finally, NextEra will utilize a lighting scheme that will minimize risk to bird or bat collisions, while fulfilling Transport Canada requirements.</p>	<ul style="list-style-type: none"> <li>• Design and Operations Report: Table 6-2 – Mitigation Measures, Residual Effects and Monitoring plan: Natural Heritage Resources</li> <li>• Natural Heritage Assessment Report: Section 5.8 – Summary and Conclusions</li> </ul>
	<p>(iv) As noted above, temporary work areas will be reseeded, as appropriate, using species native to Ontario in naturally vegetated areas.</p> <p>Furthermore, vegetation removal will be kept to a minimum and limited to non-significant habitats (e.g. hedgerows).</p>	<ul style="list-style-type: none"> <li>• Construction Plan Report: Table 3-3 – Mitigation Measures, Residual Effects and Monitoring Plan: Generalized Candidate Significant Wildlife Habitat</li> <li>• Construction Plan Report: Table 3-4 – Mitigation Measures, Residual Effects and Monitoring Plan: Significant Wetlands, Woodlands, Valleylands and Wildlife Habitat</li> <li>• N/A</li> </ul>
	<p>(v) Monitoring will occur during the construction phase for natural heritage features. The following rows detail the monitoring plans. Note that monitoring for bird and bat mortality is described in the rows above.</p> <p>An environmental inspector will monitor on-site conditions (i.e. erosion and sediment control, spills, flooding, etc.) where construction occurs within 30 m of a natural heritage feature on the following basis:</p> <ul style="list-style-type: none"> <li>▪ Weekly during active construction periods;</li> <li>▪ Prior to, during and post forecasted large rainfall events (&gt;20 millimetres in 24 hours) or significant snowmelt events (i.e., spring freshet);</li> </ul>	<ul style="list-style-type: none"> <li>• Construction Plan Report: Table 33 – Mitigation Measures, Residual Effects and Monitoring Plan: Generalized Candidate Significant Wildlife Habitat; and,</li> <li>• Construction Plan Report: Table 3-4 – Mitigation Measures, Residual Effects and Monitoring Plan: Significant Wetlands, Woodlands, Valleylands and Wildlife Habitat</li> </ul>

<ul style="list-style-type: none"> <li>Potential Impacts to watercourses that may support harvestable aquatic species</li> </ul>	<p>Effects on fish habitat were assessed as part of the Water Assessment and Water Body Report. The construction phase of the project is the time during which potential effects to fish habitat could occur; therefore, a mitigation plan has been developed.</p> <ul style="list-style-type: none"> <li>With the implementation of the recommended mitigation measures, residual effects are anticipated to be low. Mitigation measures to address potential effects to fish habitat include:                             <ul style="list-style-type: none"> <li>Design and install culverts to prevent creation of barriers to fish movement and maintain bankfull channel functions.</li> <li>Design culverts to accommodate high flows of the watercourse.</li> <li>Embed the culvert below the streambed to maintain lateral flow.</li> <li>Install adequate gravel base to maintain flow of shallow groundwater.</li> <li>Locate crossings within straight sections of the stream, perpendicular to the bank. Avoid crossings on meander bends, braided streams and any other unstable areas.</li> <li>Use only clean material (i.e., rock or coarse gravel) for approaches to culverts.</li> <li>Regular maintenance to ensure no debris build-up is impeding stream flow.</li> </ul> </li> <li>In addition to the above mitigation measures, NextEra will also implement the following to reduce potential effects to fish:                             <p><b>Timing Windows</b></p> <ul style="list-style-type: none"> <li>Schedule construction to avoid periods of habitat use to the extent possible, these timing windows are applied to protect fish from any works in and around water during spawning, migration and other critical life history stages. Construction timing windows are based on site specific criteria such as type of fish species present, thermal regime and fish spawning times (spring or fall). The generic restricted in-water work timing windows established by DFO are:                                     <ul style="list-style-type: none"> <li>Fall Spawning Period – October 1st to May 31st</li> <li>Spring Spawning Period – May 1st to July 15th</li> </ul> </li> </ul> <p><b>Isolated Crossing</b></p> <ul style="list-style-type: none"> <li>Install in-water works for permanent water bodies in the dry via dam and pump method or creation of a diversion channel to maintain flow around the work site. For intermittent water bodies, work is preferred to be completed in the dry and carried out during seasonally dry or when the water body is frozen to the bottom.</li> <li>Develop and implement a fish rescue plan for dewatering areas. This will include appropriate sized end-of-pipe fish screen to prevent potential losses of fish due to entrainment or impingement as outlined in the DFO Freshwater Intake End-of-Pipe Fish Screen Guideline.</li> <li>Retain an adequate portion of channel with sufficient width and depth to allow for fish passage if construction requires that an instream work area be isolated from the primary channel. In the event that an area must be blocked from bank to bank, construct a temporary by-pass to allow fish passage around the construction area.</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>Water Assessment and Water Body Report: Table 5-3 – Effects Associated with Road Crossings, Temporary Crane Paths and Pads/Turnaround Areas</li> <li>Construction Plan Report: Table 3-5 – Mitigation Measures, Residual Effects and Monitoring Plans: Surface Water and Groundwater</li> </ul>

Issue/Value	Response	Corresponding Report and Section
<ul style="list-style-type: none"> <li>Potential impact to habitat that may support harvestable plant species or to the plants themselves.</li> <li>Getting species information was not possible but we were referred to the Kettle and Stony Point Native Women's Workshop proceedings of Southern Ontario Aboriginal Health (forum?) that produced information on medicinal plants. Note that NextEra has not been able to locate the workshop proceedings.</li> </ul>	<ul style="list-style-type: none"> <li>The Project is sited predominantly on actively farmed agricultural fields. However, where vegetation removal is required, NextEra will restore temporary work areas following the construction phase. Stripped topsoil will be replaced and recontoured in the construction areas and disturbed areas will be re-seeded, as appropriate. Once the turbines are constructed, farming practices can continue up to within a few metres of the turbine base.</li> <li>Temporary access roads will be revegetated to pre-construction conditions as soon as possible following construction activities using species native to Ontario in naturally vegetated areas.</li> <li>Vegetation removal will be kept to a minimum and limited to non-significant habitats (e.g. hedgerows). Damaged trees will be pruned through the implementation of proper arboricultural techniques. Where vegetation removal is to occur within 30 m of a natural area, protective fencing will be installed to define the construction area and prevent accidental damage to vegetation.</li> <li>For any vegetation removal required along the transmission line route, a detailed inventory of species/abundance to be removed will be completed. Following construction, vegetation will be re-planted using an area ratio of 1:1 of similar species association (native species) if the area removed was greater than 1% of the woodland cover.</li> </ul>	<ul style="list-style-type: none"> <li>Construction Plan Report: Table 3-3 – Mitigation Measures, Residual Effects and Monitoring Plan: Generalized Candidate Significant Wildlife Habitat; and,</li> <li>Construction Plan Report: Table 3-4 – Mitigation Measures, Residual Effects and Monitoring Plan: Significant Wetlands, Woodlands, Valleylands and Wildlife Habitat</li> </ul>
<ul style="list-style-type: none"> <li>Archaeology</li> </ul>	<ul style="list-style-type: none"> <li>The archaeological studies were conducted by licensed archaeologists according to Ministry of Tourism, Culture and Sport standards. A total of 25 archaeological sites were identified as of January 2012 and included 18 pre-contact Aboriginal sites and seven historic Euro-Canadian sites. Four of the historic Euro-Canadian sites were recommended for further Stage 3 archaeological assessments because greater than 20 artifacts dating prior to 1900 were identified at the locations thus lending cultural heritage value or interest to the site. The cultural heritage value or interest of the remaining sites was considered to be sufficiently documented and as such, no further studies were recommended.</li> </ul>	<ul style="list-style-type: none"> <li>Stage 2 Archaeological Assessment Report: Section 4.0 – Analysis and Conclusions</li> </ul>
	<ul style="list-style-type: none"> <li>During field work, a fully independent First Nations monitor was supported by NextEra, whose reports are available to any interested First Nation. The monitor was a licensed archaeologist and First Nations person. To date, the monitor's reports of field work have been positive and no concerns identified. NextEra also agreed with the monitor's recommendation to have archaeological monitoring in place for archaeological sites as follows: archaeological sites recommended for Stage 3 archaeological assessment that have been fenced with a 20 m buffer will have construction activities monitored within an additional 50 m zone outside of that buffer; and archaeological sites recommended for Stage 4 avoidance that have been fenced with a 10 m buffer will also be monitored in case additional archaeological resources are present outside of that buffered area.</li> </ul>	<ul style="list-style-type: none"> <li>Construction Plan Report: Table 3-1 – Mitigation Measures, Residual Effects and Monitoring Plan: Cultural Heritage</li> </ul>

## **Appendix H**

### **Chronologies of Contacts with Aboriginal Communities**

## **H.1 Kettle and Stony Point First Nation**

## Contact Record and Issues List

Projects:	<b>Adelaide, Bornish, Bluewater, Goshen and Jericho Wind Energy Centres</b>	Main Contact:	Chief Tom Bressette Chief Liz Cloud (>2008) Sue Bressette (>2011)
Community:	<b>Chippewas of Kettle and Stoney Point</b>		

NextEra Energy Canada ULC (“NEEC”) proposes to develop, construct and operate a number of wind energy projects in Ontario. This report details all communications with the Aboriginal community identified above, in support of the Ontario Regulation 359/09 Renewable Energy Approval requirement for consulting with Aboriginal peoples. Information is current to the date shown at the bottom of this report. Please contact NEEC for clarification or to receive any available updates.

The projects for which this Aboriginal community has expressed interest, or that have been confirmed by the Director of Renewable Energy Approvals “list of aboriginal communities” are identified above. Please refer to the Project Description Reports and supporting reports as set out in Table 1 of Ontario Regulation 359/09 for information about these projects, potential impacts and proposed mitigation. All available reports may be found at:

<http://www.NextEraEnergyCanada.com>

- **Adelaide** Wind Energy Centre
- **Bluewater** Wind Energy Centre
- **Bornish** Wind Energy Centre
- **Goshen** Wind Energy Centre
- **Jericho** Wind Energy Centre

*Please note that this report summarizes all communications related to this Aboriginal Community, which may include more than one NEEC project. Such an overview is important because information-sharing and knowledge-building about wind energy, as well as relationship building with communities takes place across all projects. This report is therefore an overall summary of contacts with this Aboriginal community, their purpose and content. **Issues that are specific to a single project, however, are identified, discussed and reported in the individual project Aboriginal Consultation report, which forms part of NEEC’s Renewable Energy Application under Ontario Regulation 359/09.***

2009-10-27	David Miller, MWA	Anna Batten, Lands, and Councillor Pete Cloud Sr.	Delivery of Table 1 package and letter for <b>Bornish</b> . Confirmed project is in the Traditional Territory. There is a lot of other renewable development activity in the area. Community is interested in having a third party review.	<ul style="list-style-type: none"> <li>Communication</li> </ul>	Confirm terms of reference, costs and schedule for a third party review.

Date	Contact By	Contact With	Description	Purpose	Follow-up and Results
2009-11-23	David Miller, MWA	Patricia Shawnoo, Community Liaison and Cultural Programming	Initially, Patricia was identified to Ben Greenhouse as contact person, and Patricia confirmed she is the key contact but has not seen the REA documents, will obtain from Anna Batten	<ul style="list-style-type: none"> <li>Communication</li> </ul>	
2009-11-25	David Miller, MWA	Patricia Shawnoo, Community Liaison and Cultural Programming	Called to discuss the ongoing stage 2 archaeological work for <b>Bornish and Adelaide</b> . Concerns expressed about lack of First Nations participation in the archaeological work.  Also discussed the Duty to Consult, and consultation.	<ul style="list-style-type: none"> <li>Communication</li> </ul>	Set up a meeting with ASI so Patricia Shawnoo and Brandy George could discuss the work that was ongoing.
2010-01-07	David Miller, MWA	Patricia Shawnoo, Community Liaison and Cultural Programming	Called to discuss the <b>Bornish REA</b> review. Patricia still has not had chance to obtain REA documents from Anna Batten.	<ul style="list-style-type: none"> <li>Communication</li> </ul>	Provided electronic links to the <b>Adelaide</b> project information.
2009-11-20	Tom Bird, NEEC	Chief Bressette [Note: letter was misaddressed. S/b Chief Cloud]	<b>Letter mailed enclosing notice of application for Bornish Renewable Energy Approval and December 7 Public Information Centre.</b>	<ul style="list-style-type: none"> <li>Regulatory compliance</li> </ul>	Due to ongoing communications with Patricia Shawnoo, the letter was not re-issued. A follow-up letter, correctly addressed, was sent to Chief Cloud on 2010-01-25.
2010-01-14	Mark Gallagher, TCI	Chief Cloud	E-mail explaining about the transition to the REA process and notifying of the upcoming Public Information Centre for <b>Adelaide</b>	<ul style="list-style-type: none"> <li>Communication</li> </ul>	No reply on record.

Date	Contact By	Contact With	Description	Purpose	Follow-up and Results
2010-01-25	David Miller, MWA	Patricia Shawnoo, Community Liaison and Cultural Programming	E-mail requesting suggestions for an archaeological protocol system in the short and longer term.	<ul style="list-style-type: none"> <li>Communication</li> <li>Information-sharing</li> </ul>	Develop an archeological protocol that complies with MoC (now MTC) requirements and addresses Community concerns.
2010-01-25	Ben Greenhouse	Chief Cloud	<b>Letter requesting response as per s. 17 of REA for Bornish</b>	<ul style="list-style-type: none"> <li>Regulatory compliance</li> </ul>	Letter delivered electronically 2010-02-01
2010-02-10	Ben Greenhouse David Miller Bob Waldon	Patricia Shawnoo, Community Liaison and Cultural Programming	Meeting scheduled to discuss the <b>Bornish</b> project.	<ul style="list-style-type: none"> <li>Information-sharing</li> </ul>	Meeting cancelled by Patricia Shawnoo due to unavailability of key personnel.  Reschedule meeting for early March 2010.
2010-02-12	David Miller, MWA	Patricia Shawnoo, Community Liaison and Cultural Programming	Follow-up call to reschedule 2010-02-10 meeting.	<ul style="list-style-type: none"> <li>Administrative</li> </ul>	Left a message.
2010-02-24	David Miller, MWA	Patricia Shawnoo, Community Liaison and Cultural Programming	E-Mail to confirm meeting on March 22 and to advise that the REA application will be filed soon. Comments requested.	<ul style="list-style-type: none"> <li>Communication</li> <li>Regulatory compliance</li> </ul>	Meeting scheduled for March 22, 2010.  Meeting cancelled by Patricia Shawnoo due to an unexpected conflicting commitment.
2010-03-22	Mark Gallagher, TCi	Chief Cloud,	Joint TCi-NEEC letter advising that the <b>Adelaide</b> REA will be filed in the next few weeks and requesting any feedback to be included in finalizing the REA documentation.	<ul style="list-style-type: none"> <li>Regulatory compliance</li> </ul>	No reply on record.

Date	Contact By	Contact With	Description	Purpose	Follow-up and Results
2010-03-25	David Miller, MWA	Patricia Shawnoo, Community Liaison and Cultural Programming	E-mail inviting participation in a meeting to discuss archaeological work (to date and upcoming field work) and also requesting dates in April to reschedule the March 22 meeting.	<ul style="list-style-type: none"> <li>Communication</li> </ul>	
2010-03-31	David Miller, MWA	Patricia Shawnoo	Phone call and follow-up e-mail advising the archaeological field work schedule has been moved up to April 5 due to the unusually warm spring weather.	<ul style="list-style-type: none"> <li>Communication</li> </ul>	
2010-04-01	David Miller, MWA	Patricia Shawnoo	E-Mail providing contact information for archeology field manager and Walpole Island observer.	<ul style="list-style-type: none"> <li>Communication</li> </ul>	Brandy George retained by Oneida Council of Chiefs is a member of Kettle and Stoney Point and a registered archaeologist. She will also provide observer service for Kettle and Stoney Point.
2010-04-16	Brandy George Archaeologist	Bob Waldon	Brandy George called and confirmed she will be able to provide monitoring on behalf of Kettle and Stoney Point as well as Oneida Council of Chiefs. She mentioned having spoken to Chief Cloud and that there was an issues list outstanding from past meetings. She also asked about archaeological monitoring during ground disturbance (construction)	<ul style="list-style-type: none"> <li>Communication</li> </ul>	Question about archeological monitoring referred to Tom Bird and GENIVAR to address. What archaeological monitoring is done during ground disturbance activities on site?  Contact Chief Cloud to determine content of issues list.
2010-04-16 to 2010-04-21	Brandy George, Bob Waldon	Chief Cloud and Councillor Cloud	Brandy George referred the issues list question to Chief Cloud, which was followed up by Bob Waldon. Chief Cloud referred the matter to Councillor Peter Cloud Sr. and Bob Waldon followed up to request a clarification from him.	<ul style="list-style-type: none"> <li>Communication</li> </ul>	See 2010-06-07

Date	Contact By	Contact With	Description	Purpose	Follow-up and Results
2010-05-31 to 2010-06-02	Councillor Cloud	Bob Waldon	E-mails were exchanged to set up a meeting to discuss the issues list, but also to review all NEEC projects in southern Ontario.	<ul style="list-style-type: none"> <li>Administrative</li> </ul>	Meeting scheduled for June 7, 2010.
Dated as of 2010-06-04	Nicole Geneau	Chief Cloud	Community Reference Binder including draft project description reports for <b>Bluewater, Goshen and Jericho</b> .	<ul style="list-style-type: none"> <li>Regulatory compliance</li> <li>Information sharing</li> </ul>	Delivered at meeting of June 7, 2010.
2010-06-07	Bob Waldon David Miller	Chief Cloud, Coun. Henry, Coun. Cloud	<p>A meeting was held to determine the nature of the issues list identified by Brandy George and to review all NEEC projects in southern Ontario. Key issues were:</p> <ul style="list-style-type: none"> <li>Will wind farms affect hunting, especially deer?</li> <li>Will turbines affect raptors?</li> <li>Do vibrations from turbines affect terrestrial wildlife?</li> <li>Are there human health concerns from transformers?</li> <li>Issues encountered with SkyGen project would also be questions for NEEC, namely: radio and television interference, questions about impact to golf course business, shadow flicker in nearby homes, bird and bat mortality higher than forecast.</li> <li>Will construction and commissioning affect hydro service to community?</li> <li>Arrangements for an archeological observer during construction.</li> </ul>	<ul style="list-style-type: none"> <li>Communication</li> </ul>	Arrange for a presentation to Council after the June 11, 2010 election, most likely followed by a community presentation.
2010-06-22	R. Waldon	Mark French, Band Manager	Telephone call to request clarification of Stoney and Kettle Point traditional territory. Does it include <b>Conestogo and/or Summerhaven?</b>	<ul style="list-style-type: none"> <li>Communication</li> </ul>	Mark French to check available mapping and advise.

2012-05-30	R. Waldon	Sue Bressette	E-mail enclosing draft of <b>Bluewater</b> Aboriginal consultation report section for Kettle & Stony Point, for review and comment.	<ul style="list-style-type: none"> <li>Communication</li> </ul>	No reply as of the date of this report.

## H.2 Historic Saugeen Métis

### Contact Record and Issues List

Project:	<b>Bluewater, East Durham, Goshen and Jericho Wind Energy Centres</b>	Main Contact:	≤ 2011 Jason Indoe, President ≥ 2011 Archie Indoe, President Patsy McArthur, Secretary ≤ 2011 Christopher Wentworth, Lands & Resources Consultation Coordinator ≥ 2011 Audrey Erin Holden, Lands & Resources Consultation Coordinator
Community:	<b>Historic Saugeen Métis</b>		

NextEra Energy Canada ULC ("NEEC") proposes to develop, construct and operate a number of wind energy projects in Ontario. This report details all communications with the Aboriginal community identified above, in support of the Ontario Regulation 359/09 Renewable Energy Approval requirement for consulting with Aboriginal peoples. Information is current to the date shown at the bottom of this report. Please contact NEEC for clarification or to receive any available updates.

The projects for which this Aboriginal community has expressed interest, or that have been confirmed by the Director of Renewable Energy Approvals "list of aboriginal communities" are identified above. Please refer to the Project Description Reports and supporting reports as set out in Table 1 of Ontario Regulation 359/09 for information about these projects, potential impacts and proposed mitigation. All available reports may be found at:

[www.NextEraEnergyCanada.com](http://www.NextEraEnergyCanada.com)

- **Bluewater** Wind Energy Centre
- **East Durham** Wind Energy Centre
- **Goshen** Wind Energy Centre
- **Jericho** Wind Energy Centre

*Please note that this report summarizes all communications related to this Aboriginal Community, which may include more than one NEEC project. Such an overview is important because information-sharing and knowledge-building about wind energy, as well as relationship building with communities takes place across all projects. This report is therefore an overall summary of contacts with this Aboriginal community, their purpose and content. Issues that are specific to a single project, however, are identified, discussed and reported in the individual project Aboriginal Consultation report, which forms part of NEEC's Renewable Energy Application under Ontario Regulation 359/09.*

2011-03-14	R. Waldon	Audrey Erin Holden	E-mail to provide information on Spring 2011 archaeology for <b>Bluewater, Goshen, Jericho and East Durham</b> including a work description and invitation to take part in a field meeting.	<ul style="list-style-type: none"> <li>Communication</li> <li>Information-sharing</li> </ul>	See 2011-03-18
2011-03-18	Audrey Erin Holden	R. Waldon	Reply to invitation to attend field meeting.	<ul style="list-style-type: none"> <li>Administrative</li> </ul>	R. Waldon replied 2011-03-19 that HSM was the 1st response and a meeting will be arranged upon receipt of other responses.
2011-03-31	R. Waldon	Audrey Erin Holden	E-mail to follow-up confirming that HSM was the only community to reply to the field meeting invitation. The contact information for Golder and ASI archaeologists (HSM projects of interest) and well as Audrey Holden was provided for direct coordination. It was also explained that Brandy George Cultural Research Inc. was providing independent monitoring through Oneida Council of Chiefs.	<ul style="list-style-type: none"> <li>Communication</li> </ul>	Audrey Holden confirmed she would contact the archaeologists to make arrangements to meet them.
2011-04-26	R. Waldon	Audrey Erin Holden	E-mail to explain that I would be in the area tomorrow and can drop in to the HSM office if there is anything to discuss about <b>Bluewater, Goshen, Jericho and East Durham</b> .	<ul style="list-style-type: none"> <li>Communication</li> </ul>	2011-04-27 Audrey replied that responses to the HSM lists of questions was still expected, even if partial answers, but that she was going to clarify some of the questions which we had discussed.
2011-04-28	R. Waldon	Audrey Erin Holden	E-mail reply to 2011-04-27 explaining that NEEC had expected HSM to clarify a number of questions, which I listed in the e-mail. Also explained that MOE had not included HSM in the Director's List for <b>Jericho</b> .	<ul style="list-style-type: none"> <li>Communication</li> </ul>	Awaiting HSM clarifications.

Date	Contact By	Contact With	Description	Purpose	Follow-up and Results
2011-04-11 to 12	R. Waldon	Audrey Erin Holden	E-mail exchange about Audrey contacting the archaeologists, but she has been busy. Audrey requested NEEC provide partial answers to the list of questions for <b>Bluewater, Goshen, Jericho and East Durham</b> because HSM did not have time to clarify those which were unclear.	<ul style="list-style-type: none"> <li>Communication</li> </ul>	Followed-up with NEEC.
2011-06-30	R. Waldon	Audrey Erin Holden	E-mail to notify that <b>East Durham</b> project was on hold due to grid connection issues.	<ul style="list-style-type: none"> <li>Communication</li> </ul>	Acknowledged by Audrey and that HSM looks forward to discussing the project once it moves forward again.
2011-07-05	R. Waldon	Audrey Erin Holden	E-mail to advise that I was notified today that <b>East Durham</b> is active again.	<ul style="list-style-type: none"> <li>Communication</li> </ul>	Acknowledged by Audrey.
2011-07-25	Audrey Erin Holden	R. Waldon	Audrey advised that HSM leadership had decided not to provide a summary of HSM interests for use by the environmental consultants, until a relationship agreement has been negotiated with NEEC for <b>Bluewater, Goshen, Jericho and East Durham</b> .	<ul style="list-style-type: none"> <li>Process</li> </ul>	R. Waldon replied requesting further information on the nature and scope of agreement and confirming that the information on HSM interests previously provided by HSM had been passed on to the consultants to inform the REA studies.
2011-07-26	Audrey Erin Holden	R. Waldon	Patsy McArthur had thought an outline and budget had previously been sent to NextEra for <b>Bluewater, Goshen, Jericho and East Durham</b> .	<ul style="list-style-type: none"> <li>Communication</li> </ul>	Audrey to provide a copy of outline and budget for relationship agreement. (Budget received 2012-02-17).
2011-07-29	Audrey Erin Holden	R. Waldon	Copy of draft MOU sent for review and comment concerning <b>Bluewater, Goshen, Jericho and East Durham</b> .	<ul style="list-style-type: none"> <li>Process</li> </ul>	2011-08-02 MOU forwarded to NEEC with recommendations for response. Reminders sent periodically.
2011-08-09	R. Waldon	Audrey Erin Holden	E-Mail enclosing communicate describing Fall archaeological field work for <b>all current NEEC Ontario projects</b> and offering a field meeting.	<ul style="list-style-type: none"> <li>Communication</li> <li>Information-sharing</li> </ul>	No reply received.

Date	Contact By	Contact With	Description	Purpose	Follow-up and Results
2011-08-16	Audrey Erin Holden	R. Waldon	E-mail acknowledging the archaeology update on <b>all projects</b> and asking to meet NEEC's new project developers from their "restructuring" (i.e. Changes in project assignments) and discuss "NEEC's commitment to a broader engagement process and a long term-agreement with HSM as discussed in July".	<ul style="list-style-type: none"> <li>• Communication</li> </ul>	See 2011-09-16
2011-09-16	R. Waldon	Audrey Erin Holden	E-mail reply to clarify the restructuring was only workload balancing among project managers and the correct people would be available for any meetings. Also confirmed our July telephone discussion that NEEC is developing a program for <b>all projects</b> . Acknowledged HSM's interests in such an initiative, as indicated in their MOU, but that it was too soon to express specific expectations about specifics of the program. An offer to meet and discuss capacity to review the anticipated REA studies for <b>Bluewater, Goshen, Jericho and East Durham</b> was made and invited HSM's participation in this process.	<ul style="list-style-type: none"> <li>• Communication</li> <li>• Process</li> </ul>	See 2011-09-19
2011-09-19	Audrey Erin Holden	R. Waldon	E-mail in reply stating that third party capacity is part of the HSM proposed MOU so that a response to the MOU is required for that discussion about <b>Bluewater, Goshen, Jericho and East Durham</b> . Also suggesting communications be in e-mail to ensure no further misunderstandings.	<ul style="list-style-type: none"> <li>• Process</li> </ul>	E-Mail reply the same day to acknowledge concern but encouraging continued open communications and again reiterating the importance of starting to discuss setting up capacity for review of NEEC's upcoming REA studies for <b>Bluewater, Goshen, Jericho and East Durham</b> .
2011-10-16	R. Waldon	Audrey Erin Holden	E-Mail enclosing a copy of the Public Notice for the November 10, 2011 Public Open House for the proposed Adelaide, Bornish and <b>Jericho</b> transmission line.	<ul style="list-style-type: none"> <li>• Regulatory compliance</li> </ul>	No reply.

Date	Contact By	Contact With	Description	Purpose	Follow-up and Results
2011-11-02	T. Bird	Archie Indoe, President, HSM	Letter enclosing a copy of the Public Notice for the November 10, 2011 Public Open House for the proposed Adelaide, Bornish and <b>Jericho</b> transmission line and a copy of the Public notice for the December 7 and 8 Public Open Houses for <b>Bluewater</b> and <b>Goshen</b> together with updated copies of the <i>Project Description Reports</i> for <b>Bluewater</b> , <b>Goshen</b> and <b>Jericho</b> .	<ul style="list-style-type: none"> <li>Regulatory compliance</li> </ul>	No reply.
2011-11-03	R. Waldon	Audrey Erin Holden	Telephone call and a follow-up e-mail to confirm that President Indoe will be receiving a letter from T. Bird (see 2011-11-02) and apologizing for the delay in responding to HSM's proposed MOU as well as their lists of questions for <b>Bluewater</b> , <b>Goshen</b> , <b>Jericho</b> and <b>East Durham</b> . HSM was requested to advise if the updated Project Description Reports for three of those projects have answered some of those questions about what HSM felt were deficiencies in the original PDR's. It was also offered again to meet and discuss capacity needs to help HSM review the REA reports for these projects. This is addressed in section 3 of HSM's proposed MOU.	<ul style="list-style-type: none"> <li>Communication</li> </ul>	During the call Audrey advised that a meeting would have to take place first (i.e. Before capacity assistance to review the REA reports) to discuss the proposed HSM MOU. I acknowledged this in the e-mail reply to her.
2011-11-15	Archie Indoe, President, HSM	T. Bird N. Geneau	Letter expressing frustration that NEEC seems to expect HSM to review reports such as the <i>Project Description Reports</i> for <b>Bluewater</b> , <b>Goshen</b> and <b>Jericho</b> without a capacity budget and that HSM will not do so without a budget. The letter expressed HSM's belief that capacity budget is a requirement under the proposed MOE draft Aboriginal Consultation Guide.	<ul style="list-style-type: none"> <li>Process</li> </ul>	Letter reply drafted for from NEEC proposing an informal December 9, 2011 meeting, which was cancelled (see 2011-12-05).

Date	Contact By	Contact With	Description	Purpose	Follow-up and Results
2011-12-05	R. Waldon	Patsy McArthur	Telephone call to discuss the possibility of meeting informally with Nicole Geneau on December 9, 2011 to try and address HSM's concerns over the list of questions they put forward for <b>Bluewater, Goshen, Jericho and East Durham</b> , their proposed MOU, update HSM on NEECs program development and to discuss how to move forward.	<ul style="list-style-type: none"> <li>• Communication</li> <li>• Process</li> </ul>	<p>An e-mail reply was received from Audrey Erin Holden stating the meeting would be with all available HSM Council members and stating,</p> <p>"HSM has every intention of listening to NextEra and hearing their point of view. HSM also intends to discuss the capacity issues laid out under the REA- Aboriginal Consultation document as well as the other responsibilities of both parties under REA. HSM hopes that NextEra has a strong intention to discuss the next step forward in the relationship and follow through on their REA responsibilities.</p> <p>After HSM's letter to NextEra we had hoped for a formal response from NextEra executive but hopefully that is still being processed internally and we will receive a formal commitment to HSM soon.</p> <p>HSM looks forward to taking the next steps in the relationship and accomplishing all the REA goals."</p>

Date	Contact By	Contact With	Description	Purpose	Follow-up and Results
2011-12-07	R. Waldon	Audrey Erin Holden Patsy McArthur	<p>E-Mail reply to Audrey's 2011-12-05 e-mail to clarify that the informal meeting suggested to Patsy was to respond to the concerns in President Indoe's November 15, 2011 letter to Nicole Geneau, hear each other out, and confirm where we are in the process, but it wasn't anticipated to get into the substance of the proposed MOU for <b>Bluewater, Goshen, Jericho and East Durham</b> at that time.</p> <p>Since HSM suggested a formal meeting with all available councillors, the following agenda was suggested:</p> <ol style="list-style-type: none"> <li>1. Discuss President Indoe's letter of November 15, 2011</li> <li>2. Draft 2011 MOE Aboriginal Consultation Guide w.r.t capacity</li> <li>3. Status of NextEra projects (i.e. expected timing of REA reports and which ones are of interest to HSM)</li> <li>4. 2011-12-21	R. Waldon	Audrey Erin Holden Patsy McArthur	<p>E-mail follow-up to 2011-12-07 asking for confirmation of meeting date and agenda for <b>Bluewater, Goshen, Jericho and East Durham</b>. Which resulted in the following exchange of e-mails with Audrey Erin Holden:</p> <p>Audrey replied that it is better to postpone the January 4th meeting. She explained that HSM's policy is to have all their consultation team at all meetings, they are dealing with a high workload and that they incur costs (mileage, etc.) to attend meetings. HSM cannot use funding from other proponents to support consultation with NEEC.</p> <p>R. Waldon requested information on the HSM consultation team's out of pocket costs to try and address these up front, and also requested HSM's expectations for capacity funding to review REA reports.</p> <p>Audrey replied that HSM prefers these be addressed as part of the whole HSM MOU agreement, not individually, and could not provide specific costs or estimates at this time.</p> <p>R. Waldon replied with a request that HSM consider providing information on capacity costs so these can be set up in advance of the REA reports in February 2012, and that hopefully there will be a broader NEEC program rollout in the New Year to directly address the remaining MOU issues.</p>	<ul style="list-style-type: none"> <li>• Administrative</li> <li>• Communication</li> <li>• Process</li> </ul>	See 2012-01-20

2012-02-02	R. Waldon	Audrey Erin Holden Patsy McArthur Bennie Indoe Goldie Meilhausen	<p>HSM provided an agenda for the meeting about <b>Bluelwater, Goshen, Jericho and East Durham</b>. A few hours prior to the meeting, HSM changed the location from their office to the Colonial Hotel.</p> <p>See detailed meeting notes on file. Key points included:</p> <ul style="list-style-type: none"> <li>• NextEra's new policy was reviewed and explained.</li> <li>• A budget is available to support consultation. We need to agree on steps, costs and how to document them in an agreement or agreements.</li> <li>• NextEra has also developed a budget to support "benefits" as a good neighbour voluntary initiative.</li> <li>• NextEra's Relationship Protocol was tabled and discussed. It is not aimed at benefits but addresses procedural consultation process and capacity funding.</li> <li>• HSM's proposed MOU combines both procedural consultation capacity costs and benefits. There is a need to approach these separately, with consultation capacity costs being the priority.</li> <li>• Bob stressed that time was of the essence to agree on consultation capacity costs given impending release of draft REA reports.</li> <li>• The group discussed and agreed on a process for third party review of draft REA reports, which would be part of the capacity funding agreement(s) to be negotiated.</li> <li>• Patsy reiterated her concern about potential cumulative impacts from regional wind development. Bob reiterated NextEra's prior responses on this issue.</li> </ul>	<ul style="list-style-type: none"> <li>• Process</li> <li>• Communication</li> </ul>	<ol style="list-style-type: none"> <li>1. HSM to provide a proposed consultation budget (Received 2012-02-17)</li> <li>2. Bob to provide updated project schedule milestone dates (Sent 2012-02-03)</li> <li>3. Bob to provide draft NextEra Negotiation Agreement ("benefits issue") for further discussion as alternative to HSM's MOU (Sent 2012-02-03)</li> <li>4. Arrange another meeting to decide which documents to use and negotiate a budget (Done 2012-03-24.</li> </ol>
2012-02-03	R. Waldon	Audrey Erin Holden	E-mails enclosing draft of Negotiation Agreement, meetings notes for HSM review and updated schedule of milestone dates concerning <b>Bluelwater, Goshen, Jericho and East Durham</b> .	<ul style="list-style-type: none"> <li>• Process</li> <li>• Communication</li> <li>• Information-sharing</li> </ul>	N/A
2012-02-17	Audrey Erin Holden	R. Waldon	E-mail enclosing proposed HSM "per project" consultation budget of \$28,000 applicable to <b>Bluelwater, Goshen, Jericho and East Durham</b> .	<ul style="list-style-type: none"> <li>• Process</li> <li>• Information-sharing</li> </ul>	See 2012-02-24

2012-02-24	R. Waldon	Audrey Erin Holden Patsy McArthur	<p>Tele-meeting to discuss proposed HSM consultation budget for <b>Bluewater, Goshen, Jericho and East Durham</b>. It was again pointed out that HSM is not on the Director's list for <b>Jericho</b> but NextEra is including them in consultations for the project given their rights assertions.</p> <p>See detailed meeting notes on file which were shared with HSM. The following was agreed to as proposals to HSM leadership and NextEra:</p> <ul style="list-style-type: none"> <li>HSM community meetings to cover multiple projects to cover generic project information and then follow-up with regular community updates.</li> <li>Items included in HSM fees to negotiate (administration, honourariums, staff, etc.), which are well understood.</li> <li>HSM Legal fees "per project" will be presented to NextEra but cannot be recommended when the same documents will be used for each project and especially if they were drafted by HSM's lawyer.</li> <li>Capacity costs for technical review and process seems reasonable. Reviewers should attend the community meeting to hear citizen's questions firsthand.</li> <li>Cost and rationale for archaeology review is sound</li> <li>Bob suggested whatever agreement is used should also cover construction and operations consultation (overlooked in HSM's MOU)</li> </ul> <p>I offered to reimburse HSM for the costs of their holding the 2012-02-02 meeting at the Colonial Hotel, but Patsy declined to accept.</p>	<ul style="list-style-type: none"> <li>Process</li> <li>Budget negotiation</li> </ul>	<ol style="list-style-type: none"> <li>Bob to obtain formation on:               <ol style="list-style-type: none"> <li>NEEC operations annual meeting with HSM</li> <li>Insertion of an assignment clause in all agreements</li> </ol> </li> <li>HSM to provide information on possible topics for an Operations annual meeting</li> </ol>
2012-03-13	Audrey Erin Holden	R. Waldon	<p>E-mail confirming the 2012-02-24 meeting notes concerning <b>Bluewater, Goshen, Jericho and East Durham</b> were complete and depict the details of the meeting. She advised "there has been a bit of a stall in the process". No decision has been made by HSM Council about whose documents to use and another proponent has signed HSM's MOU including a schedule C (budget) and per MW profit-sharing.</p>	<ul style="list-style-type: none"> <li>Communication</li> </ul>	<p>Bob replied asking if Council would consider signing a letter-agreement so that 3rd party reviews of the project draft REA reports could go ahead? No direct reply received.</p>

2012-04-13	A. Indoe, President, HSM	Tom Bird, NextEra	Letter in response to Bluewater REA report deliveries but concerning <b>Bluewater, Goshen, Jericho and East Durham</b> . The letter expressed frustration that no capacity funding had been provided to review draft REA reports, which was characterized as a "stalemate". HSM believes this is a requirement because it is stated in the MOE consultation guide. The letter requested to meet directly with NextEra. The letter incorrectly stated Bob Waldon had told HSM no costs would be paid for the previous work with NextEra and, also incorrectly, that he has refused to offer capacity to conclude a legally binding agreement unless HSM's accepts "his" form. The letter also reminded NextEra that as a historic Métis Community with Aboriginal rights, HSM expects to receive community benefits from the NextEra projects that will impact harvesting on traditional Métis lands.	<ul style="list-style-type: none"> <li>Budget negotiation</li> <li>Communication</li> </ul>	Meeting held 2012-04-16 to discuss letter and response.
2012-05-22	A. Indoe	N. Geneau	Letter acknowledging N. Geneau's letter of May 11th and explaining that Annie Thuan of Reuter, Scargall, Bennett would facilitate negotiations on behalf of HSM	<ul style="list-style-type: none"> <li>Process</li> </ul>	Annie Thuan to contact NextEra external counsel Richard King at Norton Rose to obtain information on Foreign Corrupt Practices Act issues, then arrange a meeting with Nicole Geneau.

### **H.3 Walpole Island First Nation**

## Contact Record

Projects:	<b>Adelaide, Bluewater, Bornish, Goshen and Jericho Wind Energy Centres</b>
Community:	<b>Walpole Island First Nation</b>
Main Contact:	Chief Joseph Gilbert Dr. Dean Jacobs, Consultation Manager William Big Bull (2009), Consultant Lee White, Director Economic Development Jared Macbeth, Project Review Coordinator

NextEra Energy Canada ULC (“NEEC”) proposes to develop, construct and operate a number of wind energy projects in Ontario. This report details all communications with the Aboriginal community identified above, in support of the Ontario Regulation 359/09 Renewable Energy Approval requirement for consulting with Aboriginal peoples. Information is current to the date shown at the bottom of this report. Please contact NEEC for clarification or to receive any available updates.

The projects for which this Aboriginal community has expressed interest, or that have been confirmed by the Director of Renewable Energy Approvals “list of aboriginal communities” are identified above. Please refer to the Project Description Reports and supporting reports as set out in Table 1 of Ontario Regulation 359/09 for information about these projects, potential impacts and proposed mitigation. All available reports may be found at:

<http://www.tcirenewables.com/default.aspx?lang=en&page=projects-ontario>

- **Adelaide** Wind Energy Centre
- <http://www.canadianwindproposals.com>
- **Bluewater** Wind Energy Centre
- **Bornish** Wind Energy Centre
- **Goshen** Wind Energy Centre
- **Jericho** Wind Energy Centre

*Please note that this report summarizes all communications related to this Aboriginal Community, which may include more than one NEEC project. Such an overview is important because information-sharing and knowledge-building about wind energy, as well as relationship building with communities takes place across all projects. This report is therefore an overall summary of contacts with this Aboriginal community, their purpose and content. **Issues that are specific to a single project, however, are identified.***

---

***discussed and reported in the individual project Aboriginal Consultation report, which forms part of NEEC's Renewable Energy Application under Ontario Regulation 359/09.***

2012-05-29	R. Waldon	Jared Macbeth Dean Jacobs	E-mail following up to obtain signed copy of letter agreements.	<ul style="list-style-type: none"> <li>Process</li> </ul>	2012-05-30 Both letter agreements were received signed on behalf of the JAC by Walpole Island First Nation. The review work can proceed for <b>Adelaide, Bornish, Bluewater, Goshen and Jericho</b> . Draft reports for discussion anticipated end of June or early July, 2012.
2012-05-30	R. Waldon	Jared Macbeth	E-mail enclosing draft copy of Walpole Island section from the <b>Bluewater</b> Aboriginal consultation report and the Walpole Island Table of Concordance for review and approval.	<ul style="list-style-type: none"> <li>Information sharing</li> </ul>	No reply as of 2012-06-22.

#### **H.4 Munsee-Delaware First Nation**

## Contact Record

**Projects:** **Adelaide, Bluewater, Bornish, Goshen and Jericho Wind Energy Centres**

**Community:** **Munsee-Delaware First Nation**      **Main Contact:** Chief Patrick Waddilove  
<2011 Paul Henry, Band Administrator  
>2010 Dan Miskokomon, Band Manager

NextEra Energy Canada ULC (“NEEC”) proposes to develop, construct and operate a number of wind energy projects in Ontario. This report details all communications with the Aboriginal community identified above, in support of the Ontario Regulation 359/09 Renewable Energy Approval requirement for consulting with Aboriginal peoples. Information is current to the date shown at the bottom of this report. Please contact NEEC for clarification or to receive any available updates.

The projects for which this Aboriginal community has expressed interest, or that have been confirmed by the Director of Renewable Energy Approvals “list of aboriginal communities” are identified above. Please refer to the Project Description Reports and supporting reports as set out in Table 1 of Ontario Regulation 359/09 for information about these projects, potential impacts and proposed mitigation. All available reports may be found at:

<http://www.tcirenewables.com/default.aspx?lang=en&page=projects-ontario>

- **Adelaide** Wind Energy Centre

<http://www.canadianwindproposals.com>

- **Bluewater** Wind Energy Centre
- **Bornish** Wind Energy Centre
- **Goshen** Wind Energy Centre
- **Jericho** Wind Energy Centre

*Please note that this report summarizes all communications related to this Aboriginal Community, which may include more than one NEEC project. Such an overview is important because information-sharing and knowledge-building about wind energy, as well as relationship building with communities takes place across all projects. This report is therefore an overall summary of contacts with*

**this Aboriginal community, their purpose and content. Issues that are specific to a single project, however, are identified, discussed and reported in the individual project Aboriginal Consultation report, which forms part of NEEC's Renewable Energy Application under Ontario Regulation 359/09.**

2012-05-22	T. Bird	Chief Waddilove	Letter enclosing updated (venue change) Notice of July 11-12 Public Meeting for <b>Adelaide</b> .	<ul style="list-style-type: none"> <li>• Regulatory compliance</li> </ul>	No reply was received.

## H.5 Métis Nation of Ontario

## Contact Record

**Projects:** Adelaide, Bluewater, Bornish, Conestogo, East Durham, Goshen, Jericho and Summerhaven Wind Energy Centres

**Community:** Métis Nation of Ontario, Region 9  
 Métis Nation of Ontario, Region 7\*  
 (\*Georgian Bay Regional Protocol Committee)

**Main Contact:** Peter Rivers, Region 9 Councillor  
 Pauline Saulnier, Region 7, Regional Councillor and Chair\*  
 Melanie Paradis, Director, Land, Resources and Consultations;  
 James Wagar, Coordinator, Land, Resources and Consultations

NEEC Energy Canada, ULC (“NEEC”) proposes to develop, construct and operate a number of wind energy projects in Ontario. This report details all communications with the Aboriginal community identified above, in support of the Ontario Regulation 359/09 Renewable Energy Approval requirement for consulting with Aboriginal peoples. Information is current to the date shown at the bottom of this report. Please contact NEEC for clarification or to receive any available updates.

The projects for which this Aboriginal community has expressed interest, or that have been confirmed by the Director of Renewable Energy Approvals “list of aboriginal communities” are identified above. Please refer to the Project Description Reports and supporting reports as set out in Table 1 of Ontario Regulation 359/09 for information about these projects, potential impacts and proposed mitigation. All available reports may be found at:

<http://www.tcirenewables.com/default.aspx?lang=en&page=projects-ontario>

- **Adelaide** Wind Energy Centre

<http://www.CanadianWindProposals.com>

- **Bluewater** Wind Energy Centre
- **Bornish** Wind Energy Centre
- **Conestogo** Wind Energy Centre
- **East Durham** Wind Energy Centre
- **Goshen** Wind Energy Centre
- **Jericho** Wind Energy Centre

- **Summerhaven** Wind Energy Centre

*Please note that this report summarizes all communications related to this Aboriginal Community, which may include more than one NEEC project. Such an overview is important because information-sharing and knowledge-building about wind energy, as well as relationship building with communities takes place across all projects. This report is therefore an overall summary of contacts with this Aboriginal community, their purpose and content. Issues that are specific to a single project, however, are identified, discussed and reported in the individual project Aboriginal Consultation report, which forms part of NEEC's Renewable Energy Application under Ontario Regulation 359/09.*

Date	Contact By	Contact With	Description	Purpose	Follow-up and Results
2008-09-30	AET TCi Renewables	Métis Nation of Ontario ("MNO")	Notice of Commencement for Nanticoke (now named <b>Summerhaven</b> ) mailed. The notice included an invitation to participate in the upcoming environmental screening process, an overview of AET TCi Renewables, the Nanticoke Project and its study area.	<ul style="list-style-type: none"> <li>• For information purposes.</li> </ul>	

Date	Contact By	Contact With	Description	Purpose	Follow-up and Results
2009-09-24	R. Waldon	M. Paradis H. Rowlinson	<p>E-Mail follow-up inquiring about the type of information package MNO staff would like to see in regard to NEEC wind energy projects. M. Paradis replied:</p> <p>“Sittings of the turbines, the ESR plus a more detailed breakdown of impacts to watercourses (sedimentation from culverts, etc), length of construction period, number of construction workers on site at any given time, estimated number of trucks per turbine (hauling turbines and concrete), archaeological work on site, biodiversity plans, willingness to plant Metis species of interest over the turbine footings if they meet proponent needs, impacts on migratory species during construction and permanently... Will they need to construct a transmission connection line and if so will they use chemical sprays to maintain the line? Is it on private agricultural land or Crown land? Are there any ANSI's or SAR's in the area, if so what are they and what are their plans to avoid impacting them? Are any of the water crossings cold water streams? Are any unidentified? Any significant wetlands?</p>	<ul style="list-style-type: none"> <li>Information-sharing</li> </ul>	<p>Issues list reported to NEEC for consideration as part of the REA studies.</p>

Date	Contact By	Contact With	Description	Purpose	Follow-up and Results
2009-09-24 (continued)			Are there any non-significant and if so are they insignificant because the province has not yet classified them? How would that proponent like to incorporate Metis traditional knowledge into their project?" While H. Rowlinson asked what set-asides may be available through the proponent or its contractor.		
2009-11-09	R. Waldon	M. Paradis	Telephone call and e-mail to set up a technical staff introductory meeting.	<ul style="list-style-type: none"> <li>• Process</li> </ul>	MNO staff not available until December 8, 2009.

Date	Contact By	Contact With	Description	Purpose	Follow-up and Results
2009-12-08	T. Bird N. Geneau B. Greenhouse R. Waldon	A. Barty, MNO M. Paradis, MNO J. Wagar, MNO	<p>Introductory and project overview meeting between NEEC and MNO technical staff.</p> <p>NEEC provided an overview of their company and its expertise in wind development. NEEC also provided an <b>overview of all current projects in Ontario</b>, focusing on those for which FIT and REA applications are in progress, but also mentioning TCi purchases and the possibility of a northwestern interest. NEEC is to follow-up with information packages for projects where REA process has started. MNO requested a meeting with leadership take place in Region 9, and explained their system for circulating project summaries to the Georgian Bay Consultation Committee. A meeting will be arranged with the committee if required.</p> <p>See meeting notes on file.</p>	<ul style="list-style-type: none"> <li>• Information-sharing</li> <li>• Process</li> </ul>	<ol style="list-style-type: none"> <li>1. NEEC to send information packages for Region 9 and for Georgian Bay regional Consultation Committee (Both COMPLETED)</li> </ol>

Date	Contact By	Contact With	Description	Purpose	Follow-up and Results
2009-12-18	J. Wagar, MNO	R. Waldon	<p>J. Wagar advised that MNO Region 9 leadership cannot meet until after January 28, 2010 and asked if this posed any concerns.</p> <p>R. Waldon replied by confirming dates of Public Open Houses to ensure staff was aware and asked if it was possible to avoid multiple “project-specific” information sessions with MNO to share as complete an information package as possible.</p> <p>James was requested to propose preferred and alternate dates to meet with Georgian Bay Regional Consultation Protocol Committee (“GBRCPC”).</p>	<ul style="list-style-type: none"> <li>Process</li> </ul>	<ol style="list-style-type: none"> <li>MNO to suggest meeting dates.</li> </ol>
2009-12-17	T. Bird	Pauline Saulnier Regional Councillor	Information package (copies to MNO staff) about all projects.	<ul style="list-style-type: none"> <li>Information-sharing.</li> </ul>	
2009-12-17	T. Bird	Peter Rivers Regional Councillor	Information package (copies to MNO staff) about all projects. The <b>Adelaide</b> PIC was specifically mentioned.	<ul style="list-style-type: none"> <li>Information-sharing.</li> </ul>	
2010-01-18	J. Wagar, MNO	R. Waldon	James advised the other wind developer in Region 9 is having a meeting with the leadership but does not want a joint meeting at this time. James asked about critical dates for <b>Bornish</b> .	<ul style="list-style-type: none"> <li>Process</li> </ul>	

Date	Contact By	Contact With	Description	Purpose	Follow-up and Results
2010-01-19	R. Waldon	J. Wagar	Reply to Wagar 2010-01-18 e-mail explaining there will be a PIC for <b>Adelaide</b> on January 26th and requesting reply to the MNO issue of a joint developer meeting in Region 9, and also requesting MNO Region 7 feedback on <b>Conestogo</b> and <b>East Durham</b> .	<ul style="list-style-type: none"> <li>• Communication</li> <li>• Process</li> </ul>	
2010-01-20	R. Waldon	J. Wagar	Forwarded information on recent health and property value studies vis-a-vis wind farms.	<ul style="list-style-type: none"> <li>• Information-sharing.</li> </ul>	N/A
2010-01-20	J. Wagar, MNO	R. Waldon	Reply to 2010-01-19 e-mail as follows: James explained that: "Region 9 is meeting with the Nanticoke Wind Project team next week – I am going to follow up with them and have their "next steps" for you. Region 7 is currently a bit overwhelmed – I'll have something for you by the end of the month regarding <b>[East] Durham</b> and <b>Conestoga</b> [sic]."	<ul style="list-style-type: none"> <li>• Process</li> <li>• Information-sharing</li> </ul>	
2010-01-22	B. Greenhouse	M. Paradis	Exchange of e-mails. Paradis stated that MNO does not want anyone other than MNO to represent Harvest Territories graphically.	<ul style="list-style-type: none"> <li>• Information-sharing</li> </ul>	MNO Harvest Territory areas removed from NEEC project mapping.

2010-04-19	R. Waldon	J. Wagar	<p>R. Waldon advised James that: "You may have heard about the FIT contract announcements last week. NEEC received (or will receive) contracts for <b>Summerhaven</b> (a.k.a. "Nanticoke"), and <b>Conestogo</b>. Was there any feedback from Georgian Bay Protocol Committee (Region 7) concerning <b>Conestogo</b>?"</p> <p>On <b>Summerhaven</b>, did you mean Councillor Rivers and the Council Presidents in Region 9 were meeting with the TCi Renewables people when you referred to the "Nanticoke Wind Project Team"?</p> <p><b>Goshen, East Durham, Jericho</b> and <b>Bluewater</b> are in the Economic Connection Test category, and I am advised this should take place this Summer, but of course the proponents don't control that schedule.</p> <p>Nevertheless, there's no harm in keeping these projects on the radar screen, especially if there are common issues among the projects that we can address in advance. Do you have enough information to confirm their location relative to Georgian Bay Harvest Territory?</p>	<ul style="list-style-type: none"> <li>• Information-sharing</li> <li>• Regulatory compliance</li> </ul>	<p>Reply from MNO regarding <b>Conestogo</b> for REA documents was requested.</p>

Date	Contact By	Contact With	Description	Purpose	Follow-up and Results
2010-04-19 (continued)			The <b>Bornish</b> and <b>Adelaide</b> REA's will be filed soon, and as you know, both are west of London."	<ul style="list-style-type: none"> <li>• Communication</li> </ul>	
2010-04-30	R. Waldon	J. Wagar	Call and voicemail asking if the Region 7 (Georgian Bay Consultation Committee) had any input for the <b>Conestogo</b> REA documents.	<ul style="list-style-type: none"> <li>• Regulatory compliance</li> </ul>	
2010-05-03	James Wagar	R. Waldon	E-mail asking what additional reports are available for <b>Summerhaven</b> and <b>Conestogo</b> .	<ul style="list-style-type: none"> <li>• Information-sharing</li> </ul>	R. Waldon offered to send CD's or paper copies of the draft Project Description Reports and explained that the REA reports had not been completed. James Wagar replied that MNO prefers to wait for the REA reports before commenting.
Dated as of 2010-06-04	M. Paradis	N. Geneau	Community Reference Binder including draft Project Description Reports for <b>Bluewater</b> , <b>Goshen</b> and <b>Jericho</b> and a map of all current NEEC projects in southwestern Ontario	<ul style="list-style-type: none"> <li>• Information-sharing</li> <li>• Regulatory compliance</li> </ul>	Delivered 2010-09-03 (see below).
2010-06-14	R. Waldon	M. Paradis J. Wagar	E-mail to introduce <b>Bluewater</b> , <b>Goshen</b> and <b>Jericho</b> projects and to ask if MNO prefers to wait for draft REA documents as per James Wagar instructions 2010-05-03. Provided dates and locations for upcoming open houses.	<ul style="list-style-type: none"> <li>• Information-sharing</li> </ul>	

Date	Contact By	Contact With	Description	Purpose	Follow-up and Results
2010-06-18	M. Paradis	R. Waldon B. Greenhouse N. Geneau	M. Paradis replied that MNO's preference is to wait for the draft REA documents before starting the review process and commenting. She confirmed the list of Métis issues and interests provided last September will be helpful to informing the REA reports for <b>Bluewater, Goshen and Jericho</b> . She asked if Ben Greenhouse or Nicole Geneau are the right person for MNO's business development person to follow-up regarding potential partnerships.	<ul style="list-style-type: none"> <li>Request for business partnership</li> <li>Process</li> <li>Information-sharing</li> </ul>	Forward draft REA "Table 1 reports" for each project as they become available.
2010-09-03	B. Greenhouse	M. Paradis	Copy of Community Reference Binder with industry, company and project location information delivered.	<ul style="list-style-type: none"> <li>Information-sharing</li> <li>Regulatory compliance</li> </ul>	
2010-09-09	R. Waldon	M. ## **H.6 Chippewas of the Thames First Nation**

## Contact Record

**Projects:** **Adelaide, Bornish and Jericho Wind Energy Centres (Bluewater and Goshen to be confirmed)**

**Community:** **Chippewas of the Thames**      **Main Contact:** Chief Vaughan Albert (<2009)  
Chief R. K. “Joe” Miskokomon

NextEra Energy Canada ULC (“NEEC”) proposes to develop, construct and operate a number of wind energy projects in Ontario. This report details all communications with the Aboriginal community identified above, in support of the Ontario Regulation 359/09 Renewable Energy Approval requirement for consulting with Aboriginal peoples. Information is current to the date shown at the bottom of this report. Please contact NEEC for clarification or to receive any available updates.

The projects for which this Aboriginal community has expressed interest, or that have been confirmed by the Director of Renewable Energy Approvals “list of aboriginal communities” are identified above. Please refer to the Project Description Reports and supporting reports as set out in Table 1 of Ontario Regulation 359/09 for information about these projects, potential impacts and proposed mitigation. All available reports may be found at:

<http://www.tcirenewables.com/default.aspx?lang=en&page=projects-ontario>

- **Adelaide** Wind Energy Centre
- <http://www.canadianwindproposals.com>
- **Bluewater** Wind Energy Centre
- **Bornish** Wind Energy Centre
- **Goshen** Wind Energy Centre
- **Jericho** Wind Energy Centre
- (Potential and to be confirmed) **Summerhaven** Wind Energy Centre

*Please note that this report summarizes all communications related to this Aboriginal Community, which may include more than one NEEC project. Such an overview is important because information-sharing and knowledge-building about wind energy, as well as relationship building with communities takes place across all projects. This report is therefore an overall summary of contacts with this Aboriginal community, their purpose and content. **Issues that are specific to a single project, however, are identified.***

**discussed and reported in the individual project Aboriginal Consultation report, which forms part of NEEC's Renewable Energy Application under Ontario Regulation 359/09.**

Dated as of 2010-06-04	Nicole Geneau	Raymond Deleary	Community Reference Binder that included draft project description reports for Bluewater, Goshen and Jericho and a map of all current NEEC projects in southwestern Ontario	<ul style="list-style-type: none"> <li>Information-sharing</li> </ul>	Delivered 2010-06-15
2010-06-04	Bob Waldon	Raymond Deleary	Eldon French Band Manager explained that Raymond Deleary is handling all consultation files. An e-mail was sent to Mr. Deleary to request a meeting to review the NEEC Community Reference binder and determine which projects are of interest to Chippewas of the Thames.	<ul style="list-style-type: none"> <li>Process</li> </ul>	No reply received.
2010-06-14	Bob Waldon	Raymond Deleary	Two calls made to Band office and one to Mr. Deleary's cell number to attempt to arrange a meeting to deliver the Community Reference binder and clarify the extend of Chippewas of the Thames traditional territory.	<ul style="list-style-type: none"> <li>Communication</li> </ul>	Mr. Deleary was booked in meetings but requested that Community Reference Binder be dropped off and that we would meet sometime thereafter.
2010-06-15	Bob Waldon	Raymond Deleary	Community Reference Binder delivered to Band Administration office with draft project descriptions of <b>Bluewater, Goshen and Jericho</b> .	<ul style="list-style-type: none"> <li>Regulatory compliance</li> <li>Information-sharing</li> </ul>	E-mailed Raymond Deleary on 2010-06-16 as a follow-up to ask for a telephone conversation to go through the Community Reference Binder and clarify the Chippewas of the Thames interests in all NEEC projects.

Date	Contact By	Contact With	Description	Purpose	Follow-up and Results
2010-06-17	Raymond Deleary	R. Waldon	<p>In a telephone call, Mr. Deleary advised that the <b>Bornish, Adelaide</b> and <b>Jericho</b> projects appeared to be within traditional territory ("TT") of the Chippewas of the Thames. He described the TT as running from the mouth of the Thames River to its source, between Lakes Erie and Huron. A TT map is not yet available. He advised that work is underway respecting a land claim for future reserve land but was not at liberty to describe the area. He described the key interests in the project:</p> <ul style="list-style-type: none"> <li>• Potential land claim pending</li> <li>• Archaeological information is of high importance. Need to know what, if any artifacts are found, and their disposition.</li> <li>• There would be concern if migratory bird species that are harvested by community members are affected by project.</li> <li>• Not aware of any cultural or spiritual values to be considered in REA studies.</li> </ul>	<ul style="list-style-type: none"> <li>• Information-sharing</li> </ul>	<p>Advise NEEC concerning the issues identified for consideration as part of natural heritage and archaeology. (Done June 21)</p> <p>Ray Deleary to confirm only <b>Adelaide, Bornish</b> and <b>Jericho</b> are of interest within their traditional territory.</p>
2010-08-13 (Receipt date)	Raymond Deleary, Policy Analyst	Mark Gallagher	<p>Undated letter from Chippewas of the Thames confirming interest in <b>Adelaide</b>. Letter explained the Chippewas of the Thames reside on lands never ceded to the Crown and their traditional territory prior to european contact stretched from the eastern states to the Great Lakes.</p>	<ul style="list-style-type: none"> <li>• Information-sharing</li> <li>• Process</li> </ul>	<p>Chippewas of the Thames consultation staff to review Adelaide documentation and were to follow-up with a letter indicating their interest.</p>

Date	Contact By	Contact With	Description	Purpose	Follow-up and Results
2010-10-26	R. Waldon	Chief Miskokomon Raymond Deleary	E-mail to explain intention to commence archaeological field work for <b>Bluewater</b> , <b>Goshen</b> and <b>Jericho</b> projects in 2 weeks and asking if Chippewas of the Thames wish to participate in a field meeting and the possibility of a single monitor for all interested communities.	<ul style="list-style-type: none"> <li>Information-sharing</li> <li>Communication</li> </ul>	No reply received.
2010-11-04	R. Waldon	Raymond Deleary	Follow-up e-mail to ask if further information was forthcoming in regard to the 2010-08-13 letter to Mark Gallagher. Chippewas of the Thames consultation staff were to review <b>Adelaide</b> documentation and were to follow-up with a letter indicating their interest. Also inquired about interest in using a single independent monitor for <b>Bluewater</b> , <b>Goshen</b> and <b>Jericho</b> archaeology.	<ul style="list-style-type: none"> <li>Process</li> <li>Communication</li> </ul>	See 2010-11-15 entry
2010-11-10	Ben Greenhouse	Chief Miskokomon	<b>Letter enclosing Adelaide draft Addendum report and EIA as per s. 17.</b>	<ul style="list-style-type: none"> <li>Regulatory compliance</li> <li>Information-sharing</li> </ul>	No reply received.
2010-11-15	Raymond Deleary	R. Waldon	Raymond Deleary replied and requested possible dates for a meeting. 2012-05-15	R. Waldon	Rolanda Elijah	E-Mail follow-up to confirm that the Walpole, Aamjiwnaang, Kettle & Stony joint review process for <b>Adelaide, Bluewater, Bornish, Goshen and Jericho</b> will be proceeding and that Chippewas of the Thames would be very welcome to participate.	<ul style="list-style-type: none"> <li>Process</li> </ul>	No reply received.
2012-05-22	T. Bird	Chief Miskokomon	Letter enclosing updated (venue change) Notice of July 11-12 Public Meeting for <b>Adelaide</b> .	<ul style="list-style-type: none"> <li>Regulatory compliance</li> </ul>	No reply was received.
2012-05-30	R. Waldon	Rolanda Elijah	E-mail enclosing a copy of the draft text for the <b>Bluewater</b> Aboriginal consultation report for review and comment.	<ul style="list-style-type: none"> <li>Communication</li> </ul>	Rolanda replied confirming how busy she was and that she would try to reply as soon as possible.
2012-06-06	Phyllis Rauws-George	R. Waldon	E-mail explaining that Phyllis has been hired as COTTFN's renewable energy representative. Her role is to ensure COTTFN's interests are protected and specifically asked about status of <b>Bluewater</b> project.	<ul style="list-style-type: none"> <li>Communication</li> </ul>	R. Waldon replied by e-mail the same day, enclosing a map showing <b>all NextEra projects</b> and offering to meet or speak by phone to discuss their status. Asked how much information had been passed on from Rolanda Elijah and if COTTFN would consider joining the Aamjiwnaang-Walpole-Kettle & Stony Point Joint Assessment Committee. No reply received as of June 22, 2012.

## **H.7 Aamjiwnaang First Nation**

## Contact Record

Projects: **Adelaide, Bornish, Bluewater, Goshen and Jericho Wind Energy Centres**

Community: **Chippewas of Aamjiwnaang** Main Contact: Chief Chris Plain  
Sharilyn Johnston,  
Environmental Officer

NextEra Energy Canada ULC (“NEEC”) proposes to develop, construct and operate a number of wind energy projects in Ontario. This report details all communications with the Aboriginal community identified above, in support of the Ontario Regulation 359/09 Renewable Energy Approval requirement for consulting with Aboriginal peoples. Information is current to the date shown at the bottom of this report. Please contact NEEC for clarification or to receive any available updates.

The projects for which this Aboriginal community has expressed interest, or that have been confirmed by the Director of Renewable Energy Approvals “list of aboriginal communities” are identified above. Please refer to the Project Description Reports and supporting reports as set out in Table 1 of Ontario Regulation 359/09 for information about these projects, potential impacts and proposed mitigation. All available reports may be found at:

<http://www.NextEraEnergyCanada.com>

- **Adelaide** Wind Energy Centre
- **Bluewater** Wind Energy Centre
- **Bornish** Wind Energy Centre
- **Goshen** Wind Energy Centre
- **Jericho** Wind Energy Centre

*Please note that this report summarizes all communications related to this Aboriginal Community, which may include more than one NEEC project. Such an overview is important because information-sharing and knowledge-building about wind energy, as well as relationship building with communities takes place across all projects. This report is therefore an overall summary of contacts with this Aboriginal community, their purpose and content. **Issues that are specific to a single project, however, are identified, discussed and reported in the individual project Aboriginal Consultation report, which forms part of NEEC’s Renewable Energy Application under Ontario Regulation 359/09.***

2012-05-30	F. Allen Wiley, VP Development	Allen Deleary, Walpole Island FN, for JAC	Fully signed letter-agreements received for capacity funding of two Joint Assessment Committee ("JAC") third party reports, namely: (a) REA review of <b>Adelaide, Bluewater, Bornish</b> , and (b) Issues List for <b>Adelaide, Bornish, Bluewater, Goshen and Jericho</b> .	<ul style="list-style-type: none"> <li>Consultation</li> </ul>	Consultant proceeding with scope of work.

## H.8.1 Oneida Nation of the Thames<sup>1</sup>

## Contact Record

Projects:	TBC: <b>Adelaide, Bluewater, Bornish, Conestogo, Goshen and Jericho Wind Energy Centres</b>
Community:	<b>Oneida Nation of the Thames (elected council)</b> Main Contact: Chief Randy Phillips Chief Joel Abram (2009) April Varewyck, Environment Officer

NEEC Energy Canada ULC (“NEEC”) proposes to develop, construct and operate a number of wind energy projects in Ontario. This report details all communications with the Aboriginal community identified above, in support of the Ontario Regulation 359/09 Renewable Energy Approval requirement for consulting with Aboriginal peoples. Information is current to the date shown at the bottom of this report. Please contact NEEC for clarification or to receive any available updates.

The projects for which this Aboriginal community has expressed interest, or that have been confirmed by the Director of Renewable Energy Approvals “list of aboriginal communities” are identified above. Oneida of the Thames (elected) deferred **Summerhaven** project consultation “to Six Nations” and verbally indicated others were not of interest, or for **Conestogo**, also deferred to Six Nations.

Please refer to the Project Description Reports and supporting reports as set out in Table 1 of Ontario Regulation 359/09 for information about these projects, potential impacts and proposed mitigation. All available reports may be found at:

[www.NextEraEnergyCanada.com](http://www.NextEraEnergyCanada.com)

- **Adelaide** Wind Energy Centre
- **Bluewater** Wind Energy Centre
- **Bornish** Wind Energy Centre
- **Conestogo** Wind Energy Centre
- **Goshen** Wind Energy Centre
- **Jericho** Wind Energy Centre

Please note that this report summarizes all communications related to this Aboriginal Community, which may include more than one NEEC project. Such an overview is important because information-sharing and knowledge-building about wind energy, as well as relationship building with communities takes place across all projects. This report is therefore an overall summary of contacts with this Aboriginal community, their purpose and content. **Issues that are specific to a single project, however, are identified, discussed and reported in the individual project Aboriginal Consultation report, which forms part of NEEC's Renewable Energy Application under Ontario Regulation 359/09.**

## **H.8.2 Oneida Council of Chiefs**

## Contact Record

Projects:	<b>Adelaide, Conestogo, Bluewater, Bornish, Conestogo, Goshen, Jericho and Summerhaven Wind Energy Centres (Oneida Council of Chiefs participating as part of Haudenosaunee Development Institute Board consultation and negotiation team)</b>	Main Contact:	Chief Alfred Day, Oneida Council of Chiefs <2011 Howard Elijah, Secretary >2011 Charlene Deleary, Secretary
Community:	<b>Oneida Council of Chiefs (Haudenosaunee)</b>		

NEEC Energy Canada ULC (“NEEC”) proposes to develop, construct and operate a number of wind energy projects in Ontario. This report details all communications with the Aboriginal community identified above, in support of the Ontario Regulation 359/09 Renewable Energy Approval requirement for consulting with Aboriginal peoples. Information is current to the date shown at the bottom of this report. Please contact NEEC for clarification or to receive any available updates.

The projects for which this Aboriginal community has expressed interest, or that have been confirmed by the Director of Renewable Energy Approvals “list of aboriginal communities” are identified above. Please refer to the Project Description Reports and supporting reports as set out in Table 1 of Ontario Regulation 359/09 for information about these projects, potential impacts and proposed mitigation. All available reports may be found at:

[www.NextEraEnergyCanada.com](http://www.NextEraEnergyCanada.com)

- **Adelaide** Wind Energy Centre
- **Conestogo** Wind Energy Centre
- **Bluewater** Wind Energy Centre
- **Bornish** Wind Energy Centre
- **Conestogo** Wind Energy Centre
- **Goshen** Wind Energy Centre

- **Jericho** Wind Energy Centre
- **Summerhaven** Wind Energy Centre

Communications with Oneida of the Thames (elected) council and staff before the first contact with Oneida Council of Chiefs (2010-01-11) are included in this summary. Prior to that time, the traditional council had not been identified by Indian and Northern Affairs, Ontario Ministry of Aboriginal Affairs, or the Ministry of Environment, however, information from the Council's representative was that the practice of elected Council and traditional Council was to share information about projects that may be of interest.

This chronology should also be read in conjunction with Six Nations (Haudenosaunee) Confederacy Council, (the Haudenosaunee Confederacy Chiefs Council), due to the participation of an Oneida Council of Chiefs representative on the board of the Haudenosaunee Development Institute, who have been delegated authority to represent Six Nations (Haudenosaunee) Confederacy Council in matters pertaining to land use developments.

Please note that this report summarizes all communications related to this Aboriginal Community, which may include more than one NEEC project. Such an overview is important because information-sharing and knowledge-building about wind energy, as well as relationship building with communities takes place across all projects. This report is therefore an overall summary of contacts with this Aboriginal community, their purpose and content. Issues that are specific to a single project, however, are identified, discussed and reported in the individual project Aboriginal Consultation report, which forms part of NEEC's Renewable Energy Application under Ontario Regulation 359/09.

Dated as of 2010-06-04	N. Geneau	Howard Elijah	Community Reference Binder including a map showing all current NEEC projects in southwestern Ontario and draft PDR's for <b>Bluewater, Goshen and Jericho</b>	<ul style="list-style-type: none"> <li>Information-sharing</li> </ul>	Delivered by courier 2010-06-18
2010-06-14	R. Waldon	Chief Day	E-mailed to request a follow-up meeting to the CanWEA seminar and to deliver the Community Reference Binder. Let Chief Day know I would be in the vicinity tomorrow.	<ul style="list-style-type: none"> <li>Communication</li> </ul>	See 2010-06-17
2010-06-17	Alfred Day	R. Waldon	Alfred Day called in response to the June 14th e-mail. The Oneida Council of Chiefs and Six Nations (traditional) Council may develop a protocol setting out which takes the lead for developments within the Nanfan Treaty area. The intent is to foster more consistency and a unified approach.	<ul style="list-style-type: none"> <li>Communications and consultation protocols</li> </ul>	As a general rule of thumb until a protocol is developed contact Oneida first for locations west of a line drawn north-south at Ingersol/Nilestown and Six Nations traditional Council % HDI for locations to its east. Keep both parties informed by copying correspondence to staff. This would indicate <b>Summerhaven</b> is a "Six Nations" lead.

## H.9 Moravian of the Thames

## Contact Record

**Project:**

**Based on information from Delaware Nation (Moravian of the Thames) it does NOT appear any NEEC projects fall within their traditional territory, but the Directors List of 2011-04-08 suggests:**

- **Bluewater Wind Energy Centre**
- **Goshen Wind Energy Centre**
- **Jericho Wind Energy Centre**

**Community:**

**Moravian of the Thames Delaware First Nation**      Main Contact:      Chief Greg Peters

NextEra Energy Canada ULC (“NextEra”) proposes to develop, construct and operate a number of wind energy projects in Ontario. This report details all communications with the Aboriginal community identified above, in support of the Ontario Regulation 359/09 Renewable Energy Approval requirement for consulting with Aboriginal peoples. Information is current to the date shown at the bottom of this report. Please contact NextEra for clarification or to receive any available updates.

The projects for which this Aboriginal community has expressed interest, or that have been confirmed by the Director of Renewable Energy Approvals “list of aboriginal communities” are identified above. Please refer to the Project Description Reports and supporting reports as set out in Table 1 of Ontario Regulation 359/09 for information about these projects, potential impacts and proposed mitigation. All available reports may be found at:

<http://www.canadianwindproposals.com>

- **Bluewater** Wind Energy Centre
- **Goshen** Wind Energy Centre
- **Jericho** Wind Energy Centre.

2012-05-04	T. Bird	Chief Peters	Letter enclosing <b>Adelaide</b> draft REA Table 1 reports, Turbine Visualization, MTCS and MNR sign-off letters and Notice of Public Meeting and requesting comments as per O/Reg 359/09, s. 17.	<ul style="list-style-type: none"> <li>• Regulatory Compliance</li> </ul>	No reply was received.
2012-05-07	T. Bird	Chief Peters	Letter enclosing <b>Bornish</b> draft REA Table 1 reports, Turbine Visualization, MTCS and MNR sign-off letters and Notice of Public Meeting and requesting comments as per O/Reg 359/09, s. 17.	<ul style="list-style-type: none"> <li>• Regulatory Compliance</li> </ul>	No reply was received.
2012-05-22	T. Bird	Chief Peters	Letter enclosing updated (venue change) Notice of July 11-12 Public Meeting for <b>Adelaide</b> .	<ul style="list-style-type: none"> <li>• Regulatory compliance</li> </ul>	No reply was received.

## **H.10 Saugeen Ojibway Nations**

## Contact Record

Projects: **Bluewater (subject to check), Conestogo and East Durham Wind Energy Centres**

Community: **Saugeen Ojibway Nation (SON)**

Main Contacts:  
Chief Scott Lee

>2011 Chief Ralph Akiwenzie, Chippewas of (Chippewas of Nawash Unceded First Nation) Nawash (deceased)  
Chief Randall Kahgee Jr, Chippewas of Saugeen  
Jake Linklater, Environmental Coordinator, SON  
>2011 Katrina Keeshig, Environmental Coordinator, SON  
Joselyn Keeshig, Renewable Energy Coordinator, SON

NextEra Energy Canada ULC (“NEEC”) proposes to develop, construct and operate a number of wind energy projects in Ontario. This report details all communications with the Aboriginal community identified above, in support of the Ontario Regulation 359/09 Renewable Energy Approval requirement for consulting with Aboriginal peoples. Information is current to the date shown at the bottom of this report. Please contact NEEC for clarification or to receive any available updates.

The projects for which this Aboriginal community has expressed interest, or that have been confirmed by the Director of Renewable Energy Approvals “list of aboriginal communities” are identified above. Please refer to the Project Description Reports and supporting reports as set out in Table 1 of Ontario Regulation 359/09 for information about these projects, potential impacts and proposed mitigation. All available reports may be found at:

<http://www.NextEraEnergyCanada.com>

- **Bluewater** Wind Energy Centre
- **Conestogo** Wind Energy Centre
- **East Durham** Wind Energy Centre

*Please note that this report summarizes all communications related to this Aboriginal Community, which may include more than one NEEC project. Such an overview is important because information-sharing and knowledge-building about wind energy, as well as relationship building with communities takes place across all projects. This report is therefore an overall summary of contacts with this Aboriginal community, their purpose and content. **Issues that are specific to a single project, however, are identified.***

**discussed and reported in the individual project Aboriginal Consultation report, which forms part of NEEC's Renewable Energy Application under Ontario Regulation 359/09.**

2010-08-09	K. Keeshig	R. Waldon	E-mail requesting copies of the natural heritage and archaeology reports for Conestogo to set up a technical meeting with the biologist Linda Sober and archaeologist Bill Fitzgerald.	<ul style="list-style-type: none"> <li>Communication</li> </ul>	R. Waldon replied on 2010-08-10 that the information would be sent and that Conestogo draft REA documents were also planned to be delivered that week (delayed to 2010-09-03).
2010-08-12	T. Bird	K. Keeshig	Letter delivering copies of the following Conestogo reports: <ol style="list-style-type: none"> <li>Natural heritage</li> <li>Bat study</li> <li>Stage 1 archaeology</li> <li>Stage 2 archaeology</li> </ol>	<ul style="list-style-type: none"> <li>Information-sharing</li> </ul>	
2010-08-08	R. Waldon	K. Keeshig	Telephone call which touched on these topics: <ol style="list-style-type: none"> <li>SON wish to have 2 observers for remaining archaeology field work</li> <li>Linda Sober wants a field meeting with GENIVAR technical experts</li> <li>There is a need to have a framework for working together that encompasses common expectations, process, timing and costs</li> <li>Status of the communicate about the SON-MOEI agreement.</li> <li>Project schedules for Bluewater and Conestogo</li> <li>SON's review may extend past the Conestogo filing date.</li> </ol>	<ul style="list-style-type: none"> <li>Process</li> </ul>	Katrina to obtain more direction on framework tomorrow. We agreed to meet as soon as possible to discuss concepts.  SON will send information about the SON-MOEI agreement as soon as possible.
2010-09-13	Terry Rasmussen, GENIVAR	Chief Akiwenzie	Letter enclosing draft REA reports for Conestogo and requesting response as per s. 14 and s. 17 of the REA.	<ul style="list-style-type: none"> <li>Regulatory compliance</li> </ul>	

Date	Contact By	Contact With	Description	Purpose	Follow-up and Results
2010-09-13	Terry Rasmussen, GENIVAR	Chief Kahgee	Letter enclosing draft REA reports for Conestogo and requesting response as per s. 14 and s. 17 of the REA.	<ul style="list-style-type: none"> <li>Regulatory compliance</li> </ul>	
2010-09-13	Terry Rasmussen, GENIVAR	K. Keeshig	Letter enclosing draft REA reports for Conestogo and requesting response as per s. 14 and s. 17 of the REA.	<ul style="list-style-type: none"> <li>Regulatory compliance</li> </ul>	
2010-09-15	R. Waldon	K. Keeshig	<p>E-mail advising there is some remaining avian field work to be done on Bluewater this fall and that archaeology may begin next month. More natural heritage work will be done in spring 2011.</p> <p>Requested information on the SON-MOEI agreement.</p>	<ul style="list-style-type: none"> <li>Communication</li> <li>Information-sharing</li> </ul>	
2010-09-16	K. Keeshig	R. Waldon	An outline of the SON-MOEI agreement terms was received. Additional information from the joint SON-MOEI working group is to be provided. K. Keeshig is not available until the following week to discuss the process for moving forward on Conestogo and Bluewater.	<ul style="list-style-type: none"> <li>Information-sharing</li> </ul>	
2010-09-17	R. Waldon	K. Keeshig	E-mail asking what are the options for a field meeting because there are two different firms each with their own sub contractors who did the field work Linda Sober wants to discuss.	<ul style="list-style-type: none"> <li>Communication</li> </ul>	

Date	Contact By	Contact With	Description	Purpose	Follow-up and Results
2010-09-20	R. Waldon	K. Keeshig	During a phone call about the field meeting and an agreement, Katrina explained that costs are already being incurred for staff time and reviews.	<ul style="list-style-type: none"> <li>• Communication</li> <li>• Process</li> </ul>	I asked that we put the field meeting on hold until there is more information about the costs SON expects to charge and sent a follow-up e-mail (below).
2010-0-20	R. Waldon	K. Keeshig	E-mail to confirm telephone conversation and reiterating the request to meet and discuss an agreement or framework for working together that establishes common expectations on principles, activities, costs and timing.	<ul style="list-style-type: none"> <li>• Process</li> </ul>	
2010-09-20	K. Keeshig	R. Waldon	E-mail enclosing Bill Fitzgerald's comments dated August 23, 2010 on the ASI Archaeological reports	<ul style="list-style-type: none"> <li>• Information-sharing</li> </ul>	Forwarded to NEEC and ASI for review.
2010-09-28	K. Keeshig	R. Waldon	SON has drafted a workplan and budget but cannot send it or describe specifics until next week due to a death in the community.	<ul style="list-style-type: none"> <li>• Communication</li> </ul>	I requested a chance to meet during the week and discuss the high level principles and goals of a document for working together, which would inform activities and budgets.  I also requested an update on the SON-MOEI agreement information.
2010-10-05	K. Keeshig	R. Waldon	Draft SON workplan and budget received with an e-mail inviting comments.	<ul style="list-style-type: none"> <li>• Process</li> </ul>	

Date	Contact By	Contact With	Description	Purpose	Follow-up and Results
2010-10-12	R. Waldon	K. Keeshig	<p>Telephone call to discuss the work plan and budget. Linda provided further information on the budget line items numbered as follows:</p> <ol style="list-style-type: none"> <li>1. Two monitors are proposed as a learning opportunity. Linda Sober wants the species occurrence lists and technical people at field meeting;</li> <li>2. Avoidance of site P-1 may be acceptable;</li> <li>3. Linda Sober does the document review and prepares a summary for leadership;</li> <li>4. The draft report is presented to leadership and both communities but there's no explanation of the cost;</li> <li>5. If there are no impacts, a technical meeting with NEEC is not necessary;</li> <li>6. The follow-up meeting includes SON legal fees; mileage and leadership per diems but there is no breakdown or explanation if other funding covers this (e.g. NRF). It is not clear if the meeting is SON internal or with NEEC.</li> <li>7. Administrative costs are a straight percentage of total.</li> </ol>	<ul style="list-style-type: none"> <li>• Information-sharing</li> <li>• Process</li> </ul>	<p>Katrina is to provide:</p> <ul style="list-style-type: none"> <li>• More of a cost breakdown</li> <li>• Confirmation there is no other funding applicable</li> <li>• A proposal for billing process</li> <li>• C.V's of the two external consultants (Linda Sober and Bill Fitzgerald)</li> <li>• Proposed dates for the field meeting with Linda Sober</li> <li>• Confirmation that avoidance of site P-1 is acceptable (i.e. Stage 3 is not being requested for information purposes)</li> </ul>
2010-10-21	R. Waldon	K. Keeshig	<p>E-mail exchange to confirm field meeting date on October 27, attendees and information required by Linda Sober. I also requested we continue our discussion of the work plan from October 12th.</p>	<ul style="list-style-type: none"> <li>• Communication</li> </ul>	

Date	Contact By	Contact With	Description	Purpose	Follow-up and Results
2010-10-23	R. Waldon	K. Keeshig	E-mail to confirm meeting date time and place. I again requested that we discuss putting the SON work plan and budget into an overall framework and offered to travel to Nawash or Saugeen to meet and do this.	<ul style="list-style-type: none"> <li>• Communication</li> </ul>	
2020-10-27	K. Keeshig L. Sober	R. Waldon Allison Featherstone LGL Limited	<p>The meeting took place in Arthur in two parts. We met at the public library and Allison and Linda discussed the natural heritage study report methodology (methods, dates, staff, locations) and data sources, as well as general findings. This was followed by a drive around the project site. To view natural features identified in the draft REA reports.</p> <p>A request for the two SON consultant CV's was refused. SON does not do this and are comfortable with their consultants.</p> <p>Katrina declined to further discuss a framework or agreement for the work plan and budget.</p>	<ul style="list-style-type: none"> <li>• Information-sharing</li> <li>• Process</li> </ul>	<p>Linda requested access to interview other sub-consultants. This was arranged before the end of the meeting with Tom Bird by e-mail and access is to be through Tom.</p> <p>SON also requested to be able to review the Conestogo REA documents with the review agencies themselves (MNR, MTC, MOE).</p>

Date	Contact By	Contact With	Description	Purpose	Follow-up and Results
2010-11-17	R. Waldon	K. Keeshig	E-mail to reiterate questions and issues concerning the proposed draft SON-NEEC work plan and budget for <b>Conestogo</b> . A meeting was offered to discuss the work plan and budget issues and explore an overall framework agreement. Information was also provided concerning archaeology work for <b>Bluewater, Goshen and Jericho</b> , and a reply to Bill Fitzgerald's <b>Conestogo</b> archaeology comments from ASI was enclosed.	<ul style="list-style-type: none"> <li>• Information-sharing</li> <li>• Process</li> </ul>	
2010-11-17 Dated Nov 18 on computer system)	K. Keeshig	R. Waldon	Reply to 2010-11-17 advising that SON monitors would be sent to <b>Bluewater, Goshen and Jericho</b> at NEEC's cost. A conference call was proposed to speak to the Conestogo work plan and budget issues and ASI's response has been passed on.	<ul style="list-style-type: none"> <li>• Process</li> <li>• Information-sharing</li> </ul>	R. Waldon replied that the Bluewater, Goshen and Jericho archaeology does have an independent monitor on site; Brandy George and that discussion is necessary before SON monitors attend on site. Additionally, only the <b>Jericho</b> work will be completed this Fall. Dates were proposed for the conference call or meeting at SON's office.

Date	Contact By	Contact With	Description	Purpose	Follow-up and Results
2010-11-23	R. Waldon	K. Keeshig Jake Linklater	<p>Conference call:</p> <ul style="list-style-type: none"> <li>We are at a preliminary stage therefore SON has not felt a framework document was necessary to this point. The next stage will encompass more meaningful dialogue in a more formalized process</li> <li>There is an internal meeting of the Consultation Team ("CT") this Thursday at which further instruction on this issue may be given.</li> <li>SON's view is that consultation and accommodation does not take place within the provincial environmental assessment process.</li> <li>Discussion regarding back-up requested by NEEC for budget items in the work plan</li> <li>Bill Fitzgerald's comments on the ASI memo are to be provided after November 25 meeting.</li> <li>Confirmed "step 6" (the Follow-up Meeting) of the work plan includes NEEC</li> </ul>	<ul style="list-style-type: none"> <li>Communication</li> <li>Information-sharing</li> </ul>	<p>R. Waldon provided a short e-mail summary as follows:</p> <p>R. Waldon to:</p> <ul style="list-style-type: none"> <li>Discuss "CV" question with NEEC and get back to Katrina and Jake to discuss</li> <li>Explain additional cost breakdown to NEEC and follow-up with Katrina and Jake if required</li> <li>Provide draft text of Aboriginal Consultation report relevant to SON for Katrina and Jake to review and comment</li> </ul> <p>Jake Linklater and Katrina Keeshig to:</p> <ul style="list-style-type: none"> <li>Send Bill Fitzgerald's response to ASI's memo after CT meeting this Thursday</li> <li>Send copy of Linda Sober's report to CT to initiate a "confirm and qualify" discussion with NEEC before it goes to Joint Chiefs and Council</li> </ul> <p>R. Waldon requested confirmation that it is acceptable to describe these discussions as technical level discussion to clarify procedure and administrative matters.</p>

Date	Contact By	Contact With	Description	Purpose	Follow-up and Results
2010-11-24	Jake Linklater	R. Waldon	<p>E-mail reply to 2010-11-23 e-mail concurring with follow-up points but reinforcing that these preliminary discussions are not to be represented as consultation. The following points were also reinforced:</p> <ol style="list-style-type: none"> <li>SON does not use the EA process to carry out a Consultation &amp; accommodation process – under any given EA process, SON via its experts weighs the findings of the review activities and any possible impacts the project may have on its rights, claims and way of life. From there, SON will discuss next steps with the proponent;</li> <li>SON carries out robust and thorough review and discussion processes;</li> <li>SON remains independent and participates meaningfully for the life of the project; and,</li> <li>SON views this process as a start point to formulate a meaningful Consultation &amp; Accommodation process.</li> </ol>	<ul style="list-style-type: none"> <li>Communication</li> <li>Information-sharing</li> </ul>	<p>Reply acknowledged and confirmation that the administrative issues have been discussed with NEEC. Copy of Conestogo Aboriginal Consultation report to be forwarded to SON after internal NEEC sign-off.</p> <p>Exchange of e-mails resulted in plans for a meeting by telephone on 2010-12-15.</p>

Date	Contact By	Contact With	Description	Purpose	Follow-up and Results
2010-12-15	R. Waldon	Jake Linklater, SON	<p>Telephone call for planning and update purposes:</p> <ul style="list-style-type: none"> <li>• Work is progressing on the NEEC file but there are many deadlines.</li> <li>• SON is very sensitive about proponents asking for qualification statements for SON's consultants; it is seen as "intrusive".</li> <li>• Explained the administrative and audit reasons for NEEC's request for qualifications statement.</li> </ul>	<ul style="list-style-type: none"> <li>• Communication</li> </ul>	<p>The idea of exploring a document that provides more of a framework to work together, or to operationalize the SON and NEEC principles was agreed to. This will be done at a technical level on a no-commitment basis to determine what solutions might be workable for recommendations to leadership at SON and NEEC. R. Waldon is to prepare an outline and Jake Linklater will review it over the holiday break and respond.</p>
2010-12-23	R. Waldon	Jake Linklater, SON	Forwarded a copy of the <b>Conestogo</b> Aboriginal consultation report.	<ul style="list-style-type: none"> <li>• Information-sharing</li> </ul>	<p>On 2011-03-03 Jake acknowledged receipt and that he would touch base next week. He also advised that Dale Jacobs would be the contact person until further notice.</p>
2010-12-27	R. Waldon	Jake Linklater, SON	Outline of a framework concept document sent to Jake for review and comment on a no-commitment basis.	<ul style="list-style-type: none"> <li>• Communication</li> <li>• Process</li> </ul>	
2011-01-03	Jake Linklater	R. Waldon	Cannot open the Word file of the framework concept document.	<ul style="list-style-type: none"> <li>• Administrative</li> </ul>	<p>R. Waldon sent another file saved as an earlier MS Word file.</p>
2011-01-14	R. Waldon	Jake Linklater, SON	Follow-up e-mail inquiring if Jake Linklater had had a chance to review the framework concept document.	<ul style="list-style-type: none"> <li>• Communication</li> </ul>	

Date	Contact By	Contact With	Description	Purpose	Follow-up and Results
2011-01-24	R. Waldon	Jake Linklater, SON	Telephone call to inquire about status of review by Linda Sober and Bill Fitzgerald. Spoke to Dale Jacobs. I explained my understanding he was the new coordinator for NextEra files but Dale said this was not the case. I explained my call was to inquire about progress of the reviews and then left a voicemail for Jake Linklater requesting that he call back when free.	<ul style="list-style-type: none"> <li>• Communication</li> </ul>	
2011-01-26	Jake Linklater	R. Waldon	E-mail enclosing an invoice titled SON Preliminary Project Review Costs ( <b>Conestogo</b> WP) for \$18,571. The costs invoiced were for (1) SON Environment Office & SON Leadership Engagement; (2) Professional Services and (3) Administrative Overhead.	<ul style="list-style-type: none"> <li>• Communication</li> </ul>	<p>There were general line items of costs but no break down or back up, and no update or other report from the consultant SAAR Environmental.</p> <p>The invoice was forwarded to NEEC.</p> <p>I e-mailed Jake Linklater asking him to call me to discuss the invoice.</p>

Date	Contact By	Contact With	Description	Purpose	Follow-up and Results
2011-01-31	R. Waldon	Jake Linklater, SON	Telephone call to discuss the invoice received from Jake Linklater by e-mail on 2011-01-26.	<ul style="list-style-type: none"> <li>Communication</li> </ul>	<p>The receptionist indicated Jake was not in the office today and took a message asking him to return the call concerning NEEC.</p> <p>The invoice stated to call Dale Jacobs with any questions. I also dialed Dale's extension (X222) and left a voice mail acknowledging receipt of the invoice, explaining that I'd left messages for Jake Linklater and asking if there was additional information available on the invoice.</p>
2011-02-01	Jake Linklater	R. Waldon	E-Mail exchange to arrange a phone call 2011-02-03 with Jake Linklater and Dale Jacobs, but Jake Linklater stipulated it would be to discuss the framework concept document and any questions about the invoice were to be sent to Dale Jacobs.	<ul style="list-style-type: none"> <li>Communication</li> </ul>	R. Waldon e-mailed a reply on 2011-02-02 asking to speak to Jake Linklater by phone before the 2011-02-03 call.

## **H.11 Six Nations of the Grand River Elected Council**

## Contact Record

Projects: **Adelaide, Bluewater, Bornish, Conestogo, East Durham, Goshen, Jericho and Summerhaven Wind Energy Centres**

Communities: **Six Nations of the Grand River** Main Contacts: Chief William K. Montour, Six Nations of the Grand River  
Lonny Bomberly, Director, Lands and Resources  
Joanne Thomas, Consultation Point Person, Lands and Resources

NextEra Energy Canada ULC (“NEEC”) proposes to develop, construct and operate a number of wind energy projects in Ontario. This report details all communications with the Aboriginal community identified above, in support of the Ontario Regulation 359/09 Renewable Energy Approval requirement for consulting with Aboriginal peoples. Information is current to the date shown at the bottom of this report. Please contact NEEC for clarification or to receive any available updates.

The projects for which this Aboriginal community has expressed interest, or that have been confirmed by the Director of Renewable Energy Approvals “list of aboriginal communities” are identified above. Please refer to the Project Description Reports and supporting reports as set out in Table 1 of Ontario Regulation 359/09 for information about these projects, potential impacts and proposed mitigation. All available reports may be found at:

[www.nextEraEnergyCanada.com](http://www.nextEraEnergyCanada.com)

- **Adelaide** Wind Energy Centre
- **Bluewater** Wind Energy Centre
- **Bornish** Wind Energy Centre
- **Conestogo** Wind Energy Centre
- **East Durham** Wind Energy Centre
- **Goshen** Wind Energy Centre
- **Jericho** Wind Energy Centre
- **Summerhaven** (formerly **Nanticoke**) Wind Energy Centre

*Please note that this report summarizes all communications related to this Aboriginal Community, which may include more than one NEEC project. Such an overview is important because information-sharing and knowledge-building about wind energy, as well as relationship building with communities takes place across all projects. This report is therefore an overall summary of contacts with this Aboriginal community, their purpose and content. **Issues that are specific to a single project, however, are identified, discussed and reported in the individual project Aboriginal Consultation report, which forms part of NEEC's Renewable Energy Application under Ontario Regulation 359/09.***

2011-10-17	Ben Greenhouse Jeff Wright (Golder) R. Waldon (Bedford)	SNEC CAP Team	Meeting held to discuss <b>Conestogo, Summerhaven, Adelaide and Bornish</b> . An update was given on <b>all current NEEC projects</b> and updates to the <b>Community Reference Materials binder</b> was delivered. It is hoped that questions raised in Dr. Hostovsky's draft review reports may be answered with the recently submitted <b>Conestogo and Summerhavn</b> REA reports. Concerns about archaeology field work were raised and follow-up agreed to. SNEC CAP team feel the process has reached a point where capacity and an agreement will be helpful. The issue of deer harvest was raised and SNEC CAP team will inquire about this with harvesters and determine Dr. Hostovsky's availability to meet and discuss final REA reports relative to questions he had previously raised. A request for information on concerns over health effects was made.  See meeting notes on file for discussion and follow-up items.	<ul style="list-style-type: none"> <li>Information-sharing</li> <li>Process</li> </ul>	Information on health issues mailed 2011-1017. Archaeology concerns followed up and were found to apply to another developer's project. Archaeology maps were provided 2011-11-21.
2011-11-03	Tom Bird	Chief Montour	Letter enclosing copies of notices for public open houses for <b>Adelaide, Bornish and Jericho</b> (November 10) and <b>Bluewater</b> (December 7) and <b>Goshen</b> (December 8) in compliance with O. Reg. 359/09 and enclosing updated PDRs.	<ul style="list-style-type: none"> <li>Regulatory compliance</li> </ul>	No reply
2011-11-03	R. ## **H.12 Haudenosaunee Confederacy Chiefs Council**

### Contact Record

Projects:	<b>Adelaide, Bluewater, Bornish, Conestogo, East Durham, Goshen, Jericho and Summerhaven Wind Energy Centres</b>	
Communities:	<b>Six Nations Haudenosaunee Confederacy Council (Haudenosaunee)</b>	<p>Chief A. MacNaughton Haudenosaunee Confederacy Council; Chief Bomberly, Haudenosaunee Confederacy Council Leroy Hill, Secretary Six Nations Confederacy Council; Hazel Hill, Acting Secretary Haudenosaunee Development Institute; Aaron Detlor, Haudenosaunee Development Institute</p>

NextEra Energy Canada ULC (“NEEC”) proposes to develop, construct and operate a number of wind energy projects in Ontario. This report details all communications with the Aboriginal community identified above, in support of the Ontario Regulation 359/09 Renewable Energy Approval requirement for consulting with Aboriginal peoples. Information is current to the date shown at the bottom of this report. Please contact NEEC for clarification or to receive any available updates.

The projects for which this Aboriginal community has expressed interest, or that have been confirmed by the Director of Renewable Energy Approvals “list of aboriginal communities” are identified above.

Please note that contacts with **Tyendenaga Mohawk (Mohawk of the Bay of Quinte), Mohawk of Akwesasne and Wahta Mohawk**, who were identified on the Director’s List for **Summerhaven**, are included in this summary. **Oneida Council of Chiefs or Onyota a:ka Lotiyaneshu** are summarized within the Oneida of the Thames contact report.

Please refer to the Project Description Reports and supporting reports as set out in Table 1 of Ontario Regulation 359/09 for information about these projects, potential impacts and proposed mitigation. All available reports may be found at:

<http://www.NextEraEnergyCanada.com>

- **Adelaide** Wind Energy Centre
- **Bluewater** Wind Energy Centre
- **Bornish** Wind Energy Centre
- **Conestogo** Wind Energy Centre

- **East Durham** Wind Energy Centre
- **Goshen** Wind Energy Centre
- **Jericho** Wind Energy Centre
- **Summerhaven** (formerly **Nanticoke**) Wind Energy Centre

Please note that this report summarizes all communications related to this Aboriginal Community, which may include more than one NEEC project. Such an overview is important because information-sharing and knowledge-building about wind energy, as well as relationship building with communities takes place across all projects. This report is therefore an overall summary of contacts with this Aboriginal community, their purpose and content. **Issues that are specific to a single project, however, are identified, discussed and reported in the individual project Aboriginal Consultation report, which forms part of NEEC's Renewable Energy Application under Ontario Regulation 359/09.**

## **Appendix I**

### **Letters Evidencing Deliveries Pursuant to Ontario Regulation 359/09**

## **I.1 Notice of Open House #1 and Draft Updated PDR**

November 2, 2011

Chief Christopher Plain  
Chippewas of Aamjiwnaang (Chippewas of Sarnia)  
978 Tashmoo Avenue  
Sarnia, Ontario  
N7T 7H5

Dear Chief Plain:

**Subject: NextEra Energy Canada, ULC Wind Energy Projects**

We are writing this letter (in accordance with Ontario Regulation 359/09) to share updated information with you about our wind projects in southwestern Ontario.

First, we want to let you know about a Public Open House concerning the transmission line route for three of our projects (the Adelaide, Bornish and Jericho projects). The enclosed *Notice of Project Update Meeting* explains that a Public Open House will be held on November 10, 2011 at the Ailsa Craig Community Centre, 155 Annie Ada Shipley Street, Municipality of North Middlesex. The purpose of this meeting is to provide information about proposed changes to the transmission line route for these three projects. Each of these three wind projects has already had at least one public open house for the wind centres (i.e., the wind turbine generators). The enclosed notice is for an open house that focuses on a transmission line route change, not the wind energy centres.

Second, we want to let you know about Public Open Houses to be held on December 7 and 8, 2011 for our Bluewater and Goshen projects, respectively. Although Public Open Houses have been held for these projects before, these are considered “first” open houses in the municipalities of Bluewater and Huron East.

Ontario Regulation 359/09 requires us to provide you with these notices. We also want to keep you informed about public activities that may prompt questions, or be of interest to you and your community.

*We also wish to acknowledge that these public open houses are separate from (and in addition to) our ongoing dialogue with you and your community and do not replace our procedural consultation efforts.*

In addition to the Bluewater and Goshen *Notices of Public Meetings* we are enclosing copies of updated Project Description Reports for five projects (i.e., Adelaide, Bluewater, Bornish, Goshen and Jericho). These reports describe projects that you, or the Director of Renewable Energy Approvals has indicated are relevant to your community. In addition to these copies, the reports

can be downloaded from our web site at [www.NextEraEnergyCanada.com](http://www.NextEraEnergyCanada.com). Please let us know if you feel the above list of five projects is not correct.

These updated Project Description Reports are general documents. They will be followed by draft studies that contain more specific information on these projects. Once finalized, the studies will be part of our submission to Ministry of Environment for a Renewable Energy Approval.

Our consultant Bob Waldon has been in contact with your staff about these projects since they were first announced, and will follow-up soon to discuss the information with you. Please feel free to contact him at (905) 838-4256 or [rdwaldon@bedfordC4.com](mailto:rdwaldon@bedfordC4.com) with any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "T. Bird".

November 2, 2011

Chief Scott Lee  
Chippewas of Nawash Unceded First Nation  
135 Lakeshore Boulevard, RR #5  
Warton, ON  
N0H 2T0

Dear Chief Lee:

**Subject: NextEra Energy Canada, ULC Wind Energy Projects**

We are writing this letter (in accordance with Ontario Regulation 359/09) to share updated information with you about our wind projects in southwestern Ontario.

We want to let you know about a Public Open House to be held on December 7 2011 for our Bluewater project. Although a Public Open House has been held for this project before, this is considered the “first” open house in the municipality of Huron East. Ontario Regulation 359/09 requires us to provide you with this notice. We also want to keep you informed about public activities that may prompt questions, or be of interest to you and your community.

We also wish to acknowledge that the public open house is separate from (and in addition to) our ongoing dialogue with you and your community and do not replace our procedural consultation efforts.

In addition to the Bluewater *Notice of public meeting* we are enclosing an updated copy of the Bluewater Project Description Report. The report describes the project that you, or the Director of Renewable Energy Approvals has indicated are relevant to your community. In addition to this copy, the report can be downloaded from our web site at [www.NextEraEnergyCanada.com](http://www.NextEraEnergyCanada.com). Please let us know if you feel the project, identified above, is not correct.

The updated Project Description Report is a general document. It will be followed by draft studies that contain more specific information on the project. Once finalized, the studies will be part of our submission to Ministry of Environment for a Renewable Energy Approval.

Our consultant Bob Waldon has been in contact with your staff about these projects since they were first announced, and will follow-up soon to discuss the information with you. Please feel free to contact him at (905) 838-4256 or [rdwaldon@bedfordC4.com](mailto:rdwaldon@bedfordC4.com) with any questions.

Sincerely,

Enclosures Bluewater Open House Notice  
Bluewater Project Description Report

November 2, 2011

Chief Randall Kahgee Jr.  
Chippewas of Saugeen First Nation  
6493 Highway 2, RR #1  
Southampton, ON  
N0H 2L0

Dear Chief Kahgee:

**Subject: NextEra Energy Canada, ULC Wind Energy Projects**

We are writing this letter (in accordance with Ontario Regulation 359/09) to share updated information with you about our wind projects in southwestern Ontario.

We want to let you know about a Public Open House to be held on December 7 2011 for our Bluewater project. Although a Public Open House has been held for this project before, this is considered the “first” open house in the municipality of Huron East. Ontario Regulation 359/09 requires us to provide you with this notice. We also want to keep you informed about public activities that may prompt questions, or be of interest to you and your community.

*We also wish to acknowledge that the Public Open House is separate from (and in addition to) our ongoing dialogue with you and your community, and do not replace our procedural consultation efforts.*

In addition to the Bluewater *Notice of Public Meeting*, we are enclosing an updated copy of the Bluewater Project Description Report. The report describes the project that you, or the Director of Renewable Energy Approvals has indicated are relevant to your community. In addition to this copy, the report can be downloaded from our web site at [www.NextEraEnergyCanada.com](http://www.NextEraEnergyCanada.com). Please let us know if you feel the project, identified above, is not correct.

The updated Project Description Report is a general document. It will be followed by draft studies that contain more specific information on the project. Once finalized, the studies will be part of our submission to Ministry of Environment for a Renewable Energy Approval.

Our consultant Bob Waldon has been in contact with your staff about these projects since they were first announced, and will follow-up soon to discuss the information with you. Please feel free to contact him at (905) 838-4256 or [rdwaldon@bedfordC4.com](mailto:rdwaldon@bedfordC4.com) with any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "T. Bird".

Enclosures Bluewater Open House Notice  
Bluewater Project Description Report

November 2, 2011

Chief Joe Miskokomon  
Chippewas of the Thames First Nation  
320 Chippewa Road RR#1  
Muncey, Ontario  
N0L 1Y0

Dear Chief Miskokomon:

**Subject: NextEra Energy Canada, ULC Wind Energy Projects**

We are writing this letter (in accordance with Ontario Regulation 359/09) to share updated information with you about our wind projects in southwestern Ontario.

First, we want to let you know about a Public Open House concerning the transmission line route for three of our projects (the Adelaide, Bornish and Jericho projects). The enclosed *Notice of Project Update Meeting* explains that a Public Open House will be held on November 10, 2011 at the Ailsa Craig Community Centre, 155 Annie Ada Shipley Street, Municipality of North Middlesex. The purpose of this meeting is to provide information about proposed changes to the transmission line route for these three projects.

Each of these three wind projects has already had at least one public open house for the wind centres (i.e., the wind turbine generators). The enclosed notice is for an open house that focuses on a transmission line route change, not the wind energy centres.

Second, we want to let you know about Public Open Houses to be held on December 7 and 8, 2011 for our Bluewater and Goshen projects, respectively. Although Public Open Houses have been held for these projects before, these are considered “first” open houses in the municipalities of Bluewater and Huron East.

Ontario Regulation 359/09 requires us to provide you with these notices. We also want to keep you informed about public activities that may prompt questions, or be of interest to you and your community.

*We also wish to acknowledge that these Public Open Houses are separate from (and in addition to) our ongoing dialogue with you and your community, and do not replace our procedural consultation efforts.*

In addition to the Bluewater and Goshen *Notices of Public Meetings*, we are enclosing copies of updated Project Description Reports for five projects (i.e., Adelaide, Bluewater, Bornish, Goshen and Jericho). These reports describe projects that you, or the Director of Renewable Energy Approvals has indicated are relevant to your community. In addition to these copies, the reports

can be downloaded from our web site at [www.NextEraEnergyCanada.com](http://www.NextEraEnergyCanada.com). Please let us know if you feel the above list of five projects is not correct.

These updated Project Description Reports are general documents. They will be followed by draft studies that contain more specific information on these projects. Once finalized, the studies will be part of our submission to Ministry of Environment for a Renewable Energy Approval.

Our consultant Bob Waldon has been in contact with your staff about these projects since they were first announced, and will follow-up soon to discuss the information with you. Please feel free to contact him at (905) 838-4256 or [rdwaldon@bedfordC4.com](mailto:rdwaldon@bedfordC4.com) with any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "T. Bird".

1086 River Road  
Southwold, Ontario  
N0L 2G0

Dear Chief Day:

**Subject: NextEra Energy Canada, ULC Wind Energy Projects**

We are writing this letter (in accordance with Ontario Regulation 359/09) to share updated information with you about our wind projects in southwestern Ontario.

First, we want to let you know about a Public Open House concerning the transmission line route for three of our projects (the Adelaide, Bornish and Jericho projects). The enclosed *Notice of Project Update Meeting* explains that a Public Open House will be held on November 10, 2011 at the Ailsa Craig Community Centre, 155 Annie Ada Shipley Street, Municipality of North Middlesex. The purpose of this meeting is to provide information about proposed changes to the transmission line route for these three projects. Each of these three wind projects has already had at least one public open house for the wind centres (i.e., the wind turbine generators). The enclosed notice is for an open house that focuses on a transmission line route change, not the wind energy centres.

Second, we want to let you know about Public Open Houses to be held on December 7 and 8, 2011 for our Bluewater and Goshen projects, respectively. Although Public Open Houses have been held for these projects before, these are considered “first” open houses in the municipalities of Bluewater and Huron East. Ontario Regulation 359/09 requires us to provide you with these notices. We also want to keep you informed about public activities that may prompt questions, or be of interest to you and your community.

*We also wish to acknowledge that these Public Open Houses are separate from (and in addition to) our ongoing dialogue with you and your community, and do not replace our procedural consultation efforts.*

In addition to the Bluewater and Goshen *Notices of Public Meetings*, we are enclosing copies of updated Project Description Reports for five projects (i.e., Adelaide, Bluewater, Bornish, Goshen and Jericho). These reports describe projects that you, or the Director of Renewable Energy Approvals has indicated are relevant to your community. In addition to these copies, the reports can be downloaded from our web site at [www.NextEraEnergyCanada.com](http://www.NextEraEnergyCanada.com). Please let us know if you feel the above list of five projects is not correct.

These updated Project Description Reports are general documents. They will be followed by draft studies that contain more specific information on these projects. Once finalized, the studies will be part of our submission to Ministry of Environment for a Renewable Energy Approval.

Our consultant Bob Waldon has been in contact with your staff about these projects since they were first announced, and will follow-up soon to discuss the information with you. Please feel free to contact him at (905) 838-4256 or rdwaldon@bedfordC4.com with any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "T. Bird".

## I.2 Draft Site Plan

**DELIVERED**

December 19, 2011

Chief Christopher Plain  
Chippewas of Aamjiwnaang  
978 Tashmoo Avenue  
Sarnia, Ontario  
N7T 7H5

Dear Chief Plain:

**Subject: NextEra Energy Canada, ULC – Bluewater Wind Energy Project**

We are writing this letter (in accordance with Ontario Regulation 359/09) to share more information with you about our Bluewater Wind Energy Project in southwestern Ontario.

First, we enclose a copy of a Notice, which explains that a Draft Site Plan is being issued for the Bluewater Wind Energy Project. Issuing this Draft Site Plan confirms the existing noise receptors (houses, etc.) that we must consider in planning our Project.

Second, we enclose a copy of the actual Draft Site Plan. This Draft Site Plan will provide you with information on the Project Components and their proposed locations.

Our consultant Bob Waldon has been in contact with your staff about this Project since it was first announced, and will continue to follow-up as additional information is developed. Please feel free to contact him at (905) 838-4256 or rdwaldon@bedfordC4.com with any questions.

Sincerely,

Walpole Island First Nation  
(Bkejwanong Territory)  
R.R. #3  
Wallaceburg, ON  
N8A 4K9

Dear Chief Gilbert:

**Subject: NextEra Energy Canada, ULC – Bluewater Wind Energy Project**

We are writing this letter (in accordance with Ontario Regulation 359/09) to share more information with you about our Bluewater Wind Energy Project in southwestern Ontario.

First, we enclose a copy of a Notice, which explains that a Draft Site Plan is being issued for the Bluewater Wind Energy Project. Issuing this Draft Site Plan confirms the existing noise receptors (houses, etc.) that we must consider in planning our Project.

Second, we enclose a copy of the actual Draft Site Plan. This Draft Site Plan will provide you with information on the Project Components and their proposed locations.

Our consultant Bob Waldon has been in contact with your staff about this Project since it was first announced, and will continue to follow-up as additional information is developed. Please feel free to contact him at (905) 838-4256 or rdwaldon@bedfordC4.com with any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "T. Bird".

Thomas Bird

DELIVERED

Dear Chief Plain:

**Subject: Proposed NextEra Energy Canada, ULC Bluewater Wind Energy Centre**

Varna Wind, Inc., a wholly owned subsidiary of NextEra Energy Canada (ULC) is proposing to construct a wind energy project in the Municipalities of Bluewater and Huron East in Huron County, Ontario. The Project will be referred to as the Bluewater Wind Energy Centre and will be located on private lands east of Highway 21 in the vicinity of the shoreline of Lake Huron. With a total nameplate capacity of 60 MW, the Project is categorized as a Class 4 Facility. Although NextEra is seeking a Renewable Energy Approval (REA) for 41 wind turbines, up to a total of 37 are proposed to be constructed for the Project.

NextEra is pleased to provide you with one paper copy and two CDs of the draft REA Reports for your review. Please also find enclosed one paper copy of the draft REA Report summaries. The summaries explain the purpose, methods and results of each report. A copy of the summaries is also included on the CDs. The summaries are provided for convenience, and to assist in your review of this Project proposal and the supporting studies. Please see the draft Reports for complete data and information.

Copies of each of the draft reports are also available on the Project website at: [www.NextEraEnergyCanada.com](http://www.NextEraEnergyCanada.com).

As per Ontario Regulation 359/09, NextEra Energy Canada must request a written response to the Project proposal from your community. We respectfully request that at this time, you provide us with your written response to the Bluewater Wind Energy Centre proposal. We ask that your response include any information that you and/or your community feel should be considered as part of the final REA Reports to be submitted to the Ministry of the Environment.

Kindly advise us of your views on:

1. Any anticipated adverse impacts you feel that the Project may have on your constitutionally protected Aboriginal or treaty rights;
2. Any other concerns over potential negative impacts to the environment that you anticipate and that you may have an interest in; and,
3. Any suggestions you have for mitigating the impacts identified in #1 and #2.

Chief Christopher Plain  
March 12, 2012  
Page 2 of 2

---

Your response will be included as part of the First Nations and Métis Consultation Report, which is required as part of the REA submission for the Project. As part of the application to Ministry of the Environment, that report will become a public document.

We are available to meet with you to answer any questions or to address concerns and would like to do so prior to submitting the Renewable Energy Approval Application to the Ministry of the Environment. Please contact Bob Waldon at (905) 838-4256 if you wish to make these arrangements right away; however, we will be in touch within a week of this letter to follow-up on scheduling a meeting.

NextEra anticipates filing the REA with the Ministry of the Environment in mid-June 2012. Once the Ministry determines the application is "complete", a Proposal Notice will be posted on the Environmental Registry to begin a minimum 30 day comment period and the Ministry will make a decision on the REA application within six months. When the REA Director makes a decision on the application, a Decision Notice will be posted on the Environmental Registry to notify the public. Both Notices will be posted on the Ontario Environmental Registry at [www.ebr.gov.on.ca](http://www.ebr.gov.on.ca).

While this formal process is available to you to express any concerns, as explained above, it is our intention and hope that we can work directly with you for any matters you feel should be discussed about the Project. In this regard, Bob Waldon will contact you or your staff representative to discuss these draft REA Reports and your response as requested above.

Please contact Bob Waldon (see above) or myself at (905) 335-4904 or e-mail: [Thomas.Bird@nexteraenergy.com](mailto:Thomas.Bird@nexteraenergy.com) with any questions.

Yours very truly,

A handwritten signature in black ink, appearing to read "T. Bird", is written over a light blue circular stamp.

Thomas Bird,  
Environmental Services Project Manager

□□□□□□□□

Dear Ms. Saulnier:

**Subject: Proposed NextEra Energy Canada, ULC Bluewater Wind Energy Centre**

Varna Wind, Inc., a wholly owned subsidiary of NextEra Energy Canada (ULC) is proposing to construct a wind energy project in the Municipalities of Bluewater and Huron East in Huron County, Ontario. The Project will be referred to as the Bluewater Wind Energy Centre and will be located on private lands east of Highway 21 in the vicinity of the shoreline of Lake Huron. With a total nameplate capacity of 60 MW, the Project is categorized as a Class 4 Facility. Although NextEra is seeking a Renewable Energy Approval (REA) for 41 wind turbines, up to a total of 37 are proposed to be constructed for the Project.

As a courtesy, based on our discussion with you indicating that you desire to continue to be informed about this Project, NextEra is pleased to provide you with one paper copy and two CDs of the draft REA Reports for your review. Please also find enclosed one paper copy of the draft REA Report summaries. The summaries explain the purpose, methods and results of each report. A copy of the summaries is also included on the CDs. The summaries are provided for convenience, and to assist in your review of this Project proposal and the supporting studies. Please see the draft Reports for complete data and information.

As you may know, Métis Nation of Ontario was not identified on the list of communities to be consulted for this project, which list was issued by the Director of Renewable Energy Approvals. We wish to provide you with this information, however, as stated above, as a courtesy, and in view of our ongoing discussions with the Georgian Bay Traditional Harvest Territory Consultation Committee and Métis Nation of Ontario staff.

Copies of each of the draft reports are also available on the Project website at: [www.NextEraEnergyCanada.com](http://www.NextEraEnergyCanada.com).

As per Ontario Regulation 359/09, NextEra Energy Canada must request a written response to the Project proposal from your community. We respectfully request that at this time, you provide us with your written response to the Bluewater Wind Energy Centre proposal. We ask that your response include any information that you and/or your community feel should be considered as part of the final REA Reports to be submitted to the Ministry of the Environment.

Kindly advise us of your views on:

1. Any anticipated adverse impacts you feel that the Project may have on your constitutionally protected Aboriginal or treaty rights;
2. Any other concerns over potential negative impacts to the environment that you anticipate and that you may have an interest in; and,
3. Any suggestions you have for mitigating the impacts identified in #1 and #2.

Your response will be included as part of the First Nations and Métis Consultation Report, which is required as part of the REA submission for the Project. As part of the application to Ministry of the Environment, that report will become a public document.

We are available to meet with you to answer any questions or to address concerns and would like to do so prior to submitting the Renewable Energy Approval Application to the Ministry of the Environment. Please contact Bob Waldon at (905) 838-4256 if you wish to make these arrangements right away; however, we will be in touch within a week of this letter to follow-up on scheduling a meeting.

NextEra anticipates filing the REA with the Ministry of the Environment in mid-June 2012. Once the Ministry determines the application is "complete", a Proposal Notice will be posted on the Environmental Registry to begin a minimum 30 day comment period and the Ministry will make a decision on the REA application within six months. When the REA Director makes a decision on the application, a Decision Notice will be posted on the Environmental Registry to notify the public. Both Notices will be posted on the Ontario Environmental Registry at [www.ebr.gov.on.ca](http://www.ebr.gov.on.ca).

While this formal process is available to you to express any concerns, as explained above, it is our intention and hope that we can work directly with you for any matters you feel should be discussed about the Project. In this regard, Bob Waldon will contact you or your staff representative to discuss these draft REA Reports and your response as requested above.

Please contact Bob Waldon (see above) or myself at (905) 335-4904 or e-mail: [Thomas.Bird@nexteraenergy.com](mailto:Thomas.Bird@nexteraenergy.com) with any questions.

Yours very truly,

A handwritten signature in black ink, appearing to read "T. Bird".

□□□□□□□□

Dear Chief Peters:

**Subject: Proposed NextEra Energy Canada, ULC Bluewater Wind Energy Centre**

Varna Wind, Inc., a wholly owned subsidiary of NextEra Energy Canada (ULC) is proposing to construct a wind energy project in the Municipalities of Bluewater and Huron East in Huron County, Ontario. The Project will be referred to as the Bluewater Wind Energy Centre and will be located on private lands east of Highway 21 in the vicinity of the shoreline of Lake Huron. With a total nameplate capacity of 60 MW, the Project is categorized as a Class 4 Facility. Although NextEra is seeking a Renewable Energy Approval (REA) for 41 wind turbines, up to a total of 37 are proposed to be constructed for the Project.

As a courtesy, based on our discussion with you indicating that you desire to continue to be informed about this Project, NextEra is pleased to provide you with one paper copy and two CDs of the draft REA Reports for your review. Please also find enclosed one paper copy of the draft REA Report summaries. The summaries explain the purpose, methods and results of each report. A copy of the summaries is also included on the CDs. The summaries are provided for convenience, and to assist in your review of this Project proposal and the supporting studies. Please see the draft Reports for complete data and information.

We understand this project is north of your traditional territory, but wish to provide these reports as a courtesy, as stated above, and for information sharing.

Copies of each of the draft reports are also available on the Project website at: [www.NextEraEnergyCanada.com](http://www.NextEraEnergyCanada.com).

As per Ontario Regulation 359/09, NextEra Energy Canada must request a written response to the Project proposal from your community. We respectfully request that at this time, you provide us with your written response to the Bluewater Wind Energy Centre proposal. We ask that your response include any information that you and/or your community feel should be considered as part of the final REA Reports to be submitted to the Ministry of the Environment.

Kindly advise us of your views on:

1. Any anticipated adverse impacts you feel that the Project may have on your constitutionally protected Aboriginal or treaty rights;
2. Any other concerns over potential negative impacts to the environment that you anticipate and that you may have an interest in; and,

Chief Greg Peters

March 12, 2012

Dear Chief Montour:

**Subject: Proposed NextEra Energy Canada, ULC Bluewater Wind Energy Centre**

Varna Wind, Inc., a wholly owned subsidiary of NextEra Energy Canada (ULC) is proposing to construct a wind energy project in the Municipalities of Bluewater and Huron East in Huron County, Ontario. The Project will be referred to as the Bluewater Wind Energy Centre and will be located on private lands east of Highway 21 in the vicinity of the shoreline of Lake Huron. With a total nameplate capacity of 60 MW, the Project is categorized as a Class 4 Facility. Although NextEra is seeking a Renewable Energy Approval (REA) for 41 wind turbines, up to a total of 37 are proposed to be constructed for the Project.

As a courtesy, based on our discussion with you indicating that you desire to continue to be informed about this Project, NextEra is pleased to provide you with two paper copies and two CDs of the *draft* REA Reports for your review. Please also find enclosed two paper copies of the draft REA Report summaries. The summaries explain the purpose, methods and results of each report. A copy of the summaries is also included on the CDs. The summaries are provided for convenience, and to assist in your review of this Project proposal and the supporting studies. Please see the draft Reports for complete data and information.

As you may know, Six Nations of the Grand River was not identified on the list of communities to be consulted for this project, which list was issued by the Director of Renewable Energy Approvals. We wish to provide you with this information, however, as stated above, as a courtesy and in respect of Six Nations Elected Council's stated responsibility to protect air, lands and waters in this area, as set out in the Six Nations of the Grand River Consultation and Accommodation Policy.

Copies of each of the draft reports are also available on the Project website at: [www.NextEraEnergyCanada.com](http://www.NextEraEnergyCanada.com).

As per Ontario Regulation 359/09, NextEra Energy Canada must request a written response to the Project proposal from your community. We respectfully request that at this time, you provide us with your written response to the Bluewater Wind Energy Centre proposal. We ask that your response include any information that you and/or your community feel should be considered as part of the final REA Reports to be submitted to the Ministry of the Environment.

Kindly advise us of your views on:

1. Any anticipated adverse impacts you feel that the Project may have on your constitutionally protected Aboriginal or treaty rights;
2. Any other concerns over potential negative impacts to the environment that you anticipate and that you may have an interest in; and,
3. Any suggestions you have for mitigating the impacts identified in #1 and #2.

Your response will be included as part of the First Nations and Métis Consultation Report, which is required as part of the REA submission for the Project. As part of the application to Ministry of the Environment, that report will become a public document.

We are available to meet with you to answer any questions or to address concerns and would like to do so prior to submitting the Renewable Energy Approval Application to the Ministry of the Environment. Please contact Bob Waldon at (905) 838-4256 if you wish to make these arrangements right away; however, we will be in touch within a week of this letter to follow-up on scheduling a meeting.

NextEra anticipates filing the REA with the Ministry of the Environment in mid-June 2012. Once the Ministry determines the application is "complete", a Proposal Notice will be posted on the Environmental Registry to begin a minimum 30 day comment period and the Ministry will make a decision on the REA application within six months. When the REA Director makes a decision on the application, a Decision Notice will be posted on the Environmental Registry to notify the public. Both Notices will be posted on the Ontario Environmental Registry at [www.ebr.gov.on.ca](http://www.ebr.gov.on.ca).

While this formal process is available to you to express any concerns, as explained above, it is our intention and hope that we can work directly with you for any matters you feel should be discussed about the Project. In this regard, Bob Waldon will contact you or your staff representative to discuss these draft REA Reports and your response as requested above.

Please contact Bob Waldon (see above) or myself at (905) 335-4904 or e-mail: [Thomas.Bird@nexteraenergy.com](mailto:Thomas.Bird@nexteraenergy.com) with any questions.

□□□□□□□□

Dear Chief Plain:

**Subject: Proposed NextEra Energy Canada, ULC Bluewater Wind Energy Centre**

Varna Wind, Inc., a wholly owned subsidiary of NextEra Energy Canada (ULC) is proposing to construct a wind energy project in the Municipalities of Bluewater and Huron East in Huron County, Ontario. The Project will be referred to as the Bluewater Wind Energy Centre and will be located on private lands east of Highway 21 in the vicinity of the shoreline of Lake Huron. With a total nameplate capacity of 60 MW, the Project is categorized as a Class 4 Facility. Although NextEra is seeking a Renewable Energy Approval (REA) for 41 wind turbines, up to a total of 37 are proposed to be constructed for the Project.

Further to our letter of March 15, 2012 about the review of the DRAFT REA reports, we enclose a copy of the Notice of Public Meetings to take place at the Seaforth Community Centre on June 13, 2012 and the Stanley Complex on June 14, 2012. We wish to provide you with this notice to ensure you are aware of events that your community may take note of, as it will be published in local newspapers. As you know, the public consultation process is separate from the Aboriginal consultation requirements of the Renewable Energy Approval Regulation 359/09.

As previously noted, NextEra provided you with draft copies of the REA Reports on March 15, 2012. Given that the Natural Heritage Assessment Report (NHA), the Cultural Heritage Assessment Report and the Stage 2 Archaeological Assessment Reports have been updated based on comments received from the Ministry of Natural Resources (MNR) and the Ministry of Tourism, Culture and Sport (MTCS), we have provided you with an updated copy of each to replace the previous versions sent to you. We are also enclosing sign-off letters for these reports from the MNR and MTCS in addition to the recently-completed Shadow Flicker Report and Turbine Visualizations for your reference. Due to the size of the documents, we are providing the NHA and Shadow Flicker Report appendices on the enclosed CD.

Please contact Bob Waldon (see above) or myself at (905 335-4904 or e-mail: Thomas.Bird@nexteraenergy.com with any questions.

Yours very truly,

A handwritten signature in black ink, appearing to read "T. Bird".

Thomas Bird,  
Environmental Services Project Manager

Finally, as a courtesy, based on our discussion with you indicating that you desire to continue to be informed about this Project, NextEra provided you with draft copies of the REA Reports on March 15, 2012. Given that the Natural Heritage Assessment Report (NHA), the Cultural Heritage Assessment Report and the Stage 2 Archaeological Assessment Reports have been updated based on comments received from the Ministry of Natural Resources (MNR) and the Ministry of Tourism, Culture and Sport (MTCS), we have provided you with an updated copy of each to replace the previous versions sent to you. We are also enclosing sign-off letters for these reports from the MNR and MTCS in addition to the recently-completed Shadow Flicker Report and Turbine Visualizations for your reference. Due to the size of the documents, we are providing the NHA and Shadow Flicker Report appendices on the enclosed CD.

Please contact Bob Waldon (905 838-4256) or myself at (905 335-4904 or e-mail: Thomas.Bird@nexteraenergy.com) with any questions.

Yours very truly,

□□□□□□□□

Dear Chief Miskokomon:

**Subject: Proposed NextEra Energy Canada, ULC Bluewater Wind Energy Centre**

Varna Wind, Inc., a wholly owned subsidiary of NextEra Energy Canada (ULC) is proposing to construct a wind energy project in the Municipalities of Bluewater and Huron East in Huron County, Ontario. The Project will be referred to as the Bluewater Wind Energy Centre and will be located on private lands east of Highway 21 in the vicinity of the shoreline of Lake Huron. With a total nameplate capacity of 60 MW, the Project is categorized as a Class 4 Facility. Although NextEra is seeking a Renewable Energy Approval (REA) for 41 wind turbines, up to a total of 37 are proposed to be constructed for the Project.

Further to our letter of March 15, 2012 about the review of the DRAFT REA reports, we enclose a copy of the Notice of Public Meetings to take place at the Seaforth Community Centre on June 13, 2012 and the Stanley Complex on June 14, 2012. We wish to provide you with this notice to ensure you are aware of events that your community may take note of, as it will be published in local newspapers. As you know, the public consultation process is separate from the Aboriginal consultation requirements of the Renewable Energy Approval Regulation 359/09.

As previously noted, NextEra provided you with draft copies of the REA Reports on March 15, 2012. Given that the Natural Heritage Assessment Report (NHA), the Cultural Heritage Assessment Report and the Stage 2 Archaeological Assessment Reports have been updated based on comments received from the Ministry of Natural Resources (MNR) and the Ministry of Tourism, Culture and Sport (MTCS), we have provided you with an updated copy of each to replace the previous versions sent to you.
